FOREWORD

This curriculum evolved in two parts is for the National Diploma (ND) and Higher National Diploma (HND) Programmes in Computer Engineering Technology.

The curriculum has been structured in unit courses in line with the provision of the National Policy on Education (NPE) which makes it mandatory for all institutions to introduce the credit unit system that allows for the transfer of courses completed in one institution to another similar or higher institution.

Also, the content of each course has been spelt out in behavioral objectives to enhance the articulation process if the transfer of the credit between institutions is to be meaningful and acceptable to all institutions and for employers to know the behavior of diplomats of the programme seeking entry level employment in industry.

The Board's policy that the producers (institutions) who run the programme should initiate the new curriculum based on the guidelines issued by the Board was fully implemented. Critique workshops where representatives of the academic community, professional bodies, users (employers) and practitioners were present also took place.

It is the believe of the Board that the new programme is adequate for the level of programme; and if properly taught, it will produce the type of manpower required by the nation at the technician level provided the resources – qualified teaching staff in number and mix, consumable teaching materials and other facilities are available to teach the programme to students with the correct entry behavior.

I wish to express my deep appreciation to the Federal Polytechnic Offa, for initiating the drafts, the academic community, represented by universities, polytechnics, employers' associations – NECA professional association NSE, COAN and the Regulatory body COREN for their very valuable contributions to the new curriculum.

It is hoped that the new curriculum if properly implemented, will produce the technical and technologists of our dreams.

GENERAL INFORMATION ON THE PROGRAMME NATIONAL DIPLOMA (ND)

Programme Goal and Objectives

The National Diploma Programme in Computer Engineering Technology is designed to produce computer technician to install, maintain and repair computer hardware and its peripherals. More specifically, diplomats of the programme should be able to:

- a). Carry out routine maintenance and repair of computer;
- b). Design and map out the layout for computers;
- c). Install, set up and operate computers;
- d). Prepare simple bill of quantities and specifications for computers;
- e). Select and use appropriate instruments to carry out simple tests and measurements on all Subsystems in a computer and its peripherals.

NATIONAL DIPLOMA (HND)

Programme Goal and Objectives

The Higher National Diploma (HND) programme in Computer Engineering Technology is designed to impact on the students specialized and useable skills in this field of engineering.

The programme is designed to produce higher technicians in computer engineering technology for the manufacturing and servicing industries. On completion of the programme, the diplomats should be able to:

- a). Design electronic circuits for use in modification of computer system;
- b). Design electronic and computer installations, wiring and circuit project;
- c). Assemble, install and configure computer systems;
- d). Carry out routine maintenance and reports on computer hardware and installations

1.0 ENTRY REQUIREMENTS

1.1 National Diploma

The entry requirements into National Diploma in Computer Engineering Technology are as follows:

- a. Four credit level passes at SSCE or its equivalent at not more than two sittings. The four subjects must include Mathematics, Physics and any two other Science subjects. At least a pass in English Language is required.
- b. A pass in an engineering trade and credit passes in Mathematics & Physics and one other subject in the National Technical certificate. Also a pass in English Language in NTCE is mandatory.
- c. Four credit passes in an NBTE recognized preliminary ND course offered in a polytechnic or similar post secondary technical institution. The credit passes must include Mathematics, Physics and two science subjects. Candidates must in addition obtain at least a pass in English Language.

1.2 Higher national Diploma

The general entry requirements for the HND programme include:

- a. All the requirement for admission into the ND programme;
- b. Minimum of lower credit pass in the ND examination in Computer Technology or equivalent professional qualifications as approved by the NBTE
- c. A minimum of one year cognate work experience;
- d. In exceptional cases, ND diplomats with a pass in the ND examination that had two or more years of cognate experience in the specific field may be considered for admission into the HND programme.

2.0 CURRICULUM

- 2.1 The curriculum of the ND and HND programme consist of four main components for ND and three main area for HND;
 - (i) General studies/Education
 - (ii) Foundation courses
 - (iii) Professional courses
 - (iv) Supervised Industrial Work Experience Scheme (SIWES) (for ND only)
- 2.2 The general education components shall include courses in:
 - a). Art and Humanities English Language, Communication. These are compulsory.
 - b). Social studies Citizenship (the Nigerian Constitution) Economics,

- Engineering in the Society, Industrial Management.
- c). Political Science, Sociology, Philosophy, Geography, Entrepreneurship studies. The course in Citizenship is compulsory.
- 2.3 The General Education component shall account for not more than 15% of total contact hours for the programme.
- 2.4 Foundation courses include courses in Mathematics, Pure Science, Technical drawing, descriptive geometry, statistics etc. The number of hours may account for about 25-35% of the total contact hours.
- 2.5 Professional courses are courses which give the student the theory and practical skill he needs to practice his field of calling at the technician/technologist level. These may account for between 60-70% of the contact hours.
- 2.6 Supervised Industrial Work Experience Scheme (SIWES) shall be taken during the long vacation following the end of the second semester of the first year. See details of SIWES at paragraph 7.0

3.0 CURRICULUM STRUCTURE

3.1 ND Programme

The structure of the ND & HND programme consist of four semesters of classrooms, laboratory and workshop activities in the College – and a semester (3-4 months) of supervised Industrial Work Experience Scheme for ND. Each semester shall be of 17 weeks duration made up as follows:

15 contact weeks of teaching i.e. lecture, recitation and practical exercise, etc. and 2 weeks for tests, quizzes, examinations and registration. SIWES shall take at the end of the second semester of the first year for the ND programme.

4.0 ACCREDITATION

Each programme offered either at the ND and HND level shall be accredited by the NBTE before the diplomats can be awarded either of the two diploma certificate. Details about the process of accrediting a programme for the award of the ND or HND are available from the Executive Secretary, Programmes Department, National Board for Technical Education, Plot B, Bida Road, P.M.B. 2239, Kaduna Nigeria.

5.0 CONDITIONS FOR THE AWARD OF THE NATIONAL DIPLOMA

Institution offering accredited programmes will award the National Diploma (ND) or Higher National Diploma (HND) to candidates who successfully completed the programme after passing prescribed course work, examinations, diploma project and supervised industrial work experience. Such candidate should have completed a minimum of 72 and 80 semester credit units.

Diploma result shall be classified as follows:

| Distinction | - | GPA of 3.50 | - | 4.00 |
|--------------|---|--------------|---|------|
| Upper Credit | - | GPA of 3.00 | - | 3.49 |
| Lower Credit | - | GPA of 2.50 | - | 2.99 |
| Pass | - | GPA of 2.00 | - | 2.49 |
| Fail | - | GPA of below | - | 2.00 |

6.0 GUIDANCE NOTES FOR TEACHERS TEACHING THE PROGRAMME

- 6.1 The new curriculum is drawn in unit courses. This is in keeping with the provisions of the National Policy on Education which stress the need to introduce the semester credit units which will enable a student who so wish to transfer the units already completed in an institution of similar standard from which he is transferring.
- 6.2 In designing the units, the principle of the modular system by product has been adopted; thus making each of the professional modules, when completed, provides the student with technician operative skills which can be used for employment purposes.

6.3 As the success of the credit unit system depends on the articulation of programmes between the institutions and industry, the curriculum content has been written in behavioral objectives, so that it is clear to all, the expected performance of the student who successfully completed some aspect of the courses. These are a slight departure in the presentation of the performance. It is a deliberate attempt to further involve the staff of the department teaching the programme to write their own curriculum stating the condition existing in their institutions under which he performance can take place and to follow that with the criteria for determining an acceptable level of performance.

Departmental submission on the final curriculum may be vetted by the Academic Board of the institutions. Our aim is to continue to see to it so that a solid internal evaluation system exists in each institution for ensuring minimum standard and quality of education in the programmes offered throughout the Polytechnic system.

6.4 The teaching of the theory and practical work should, as much as possible be integrated. Practical exercise, especially those in professional courses and laboratory work should not be taught in isolation from the theory. For each course, there should not be a balance of theory practice in the ratio of 50:50 or 60:40 or the reverse.

7.0 GUIDELINES ON SIWES PROGRAMME

7.1 For the smooth operation of the SIWES the following guidelines shall apply.

Responsibility for placement of students.

- a) Institutions offering the ND programme shall arrange to place the students in industry. By April 30 of each year, six copies of the master list showing where each student has been placed shall be submitted to the Executive Secretary, NBTE who shall, in turn, authenticate the LIST and forward it to the Industrial Training Fund, Jos.
- b) The placement officer should discuss and agree with industry on the following:
 - i. A task inventory of what the students should be expected to experience during the period of attachment. It may be wise to adopt the one already approved for each field.
 - ii. The industry based supervision of the students during the period likewise the institution based supervisor.

iii. The evaluation of the student during the period. It should be noted that the final grading of the student during the period of attachment should be weighted more on the evaluation by his industry – based supervisor.

7.2 Evaluation of Students During the Siwes

In the evaluation of the student, cognizance should be taken of the following items:

- a). Punctuality
- b). Attendance
- c). General Attitude to work
- d). Respect for authority
- e). Interest in the field/technical area
- f). Technical competence as a potential technician in his field.

7.3 Grading of SIWES

To ensure uniformity of grading scales, the institution should ensure that the uniform grading of students' work which has been agreed to by all Polytechnics is adopted.

7.4 The Institution Based Supervisor

The institution based supervisor should initial the Log book during each visit. This will enable him to check and determine to what extent the objective of the scheme are being met and to assist students having any problems regarding the specific assignments given to them by their industry based supervisor.

7.5 Frequency of Visit

Institution should ensure that students placed on attachment are visited within one month of their placement. Other visits shall be arranged so that:

- i. There is another visit six weeks after the first visit; and
- ii. A final visit in the last month of the attachment.

7.6 Stipend for Students in SIWES

The rate of stipend payable shall be determined from time to time by the Federal Government after due consultation with the Federal Ministry of Education, the Industrial Training Fund and the NBTE.

7.7 SIWES as a Component of the Curriculum

The completion of SIWES is important in the final determination of whether the student is successful in the programme or not. Failure in the SIWES is an indication that the student has not shown sufficient interest in the field or has no potential to become a skilled technician in his field. The SIWES should be graded on a fail or pass basis. Where a student has satisfied all other requirements but failed SIWES, he may only be allowed to repeat another four months SIWES at his own expense

DRAWING AND MECHANICAL ENGINEERING COURSES

| PROGRAMME: | NATIONAL | DIPLOMA | IN | COMPUTER | CODE: MEC 101 | CREDIT HRS: 60 HRS |
|--------------------|-------------|-----------|----|----------|---------------|--------------------|
| ENGINEERING | | | | | | |
| COURSE: TECH | NICAL DRAWI | NG | | | PRE-REQUISITE | |
| FIRST SEMESTE | R | | | | | |

Goal: This course is designed to acquaint the students with the fundamentals of technical drawing and their applications in engineering and technology.

GENERAL OBJECTIVES:

On completion of this module, the student should be able to:

- 1. Know different drawing instruments, equipment and materials.
- 2. Understand the essentials in graphical communications.
- 3. Know the construction of simple geometrical figures and shapes.
- 4. Know the construction of isometric and oblique drawings and projection.
- 5. Understand the principles of orthographic projections.
- 6. Understand the intersections of irregular solids.

| Theoret | Theoretical Content | | | | | | | | |
|---------|--|---------------------|--------------|--|--|--|--|--|--|
| GENE | GENERAL OBJECTIVE 1: know different drawing instruments, equipment and materials | | | | | | | | |
| Week | Specific Learning Outcomes | Teacher's Learning | | | | | | | |
| | | Activities | Resources | | | | | | |
| | 1.1 Identify the different types of drawing | | | | | | | | |
| | instruments, equipment and materials. | | | | | | | | |
| | 1.2 Outline the uses of the various | | | | | | | | |
| | instruments, equipment and materials | | | | | | | | |
| | 1.3 State the precautions necessary to | | | | | | | | |
| | preserve the items in 1.1 above | | | | | | | | |
| | Maintain the various instruments and | | | | | | | | |
| | equipment. | | | | | | | | |
| GENE | RAL OBJECTIVE 2: Understand the essenti | als in graphical co | mmunications | | | | | | |
| Week | 1 Explain graphics and the different types | | | | | | | | |

| | T | · · · · · · · · · · · · · · · · · · · | | |
|--|-------------------|---------------------------------------|--------|--|
| of graphical presentations. | | | | |
| 2.2 Illustrate the various conventional, | | | | |
| representations in graphical | | | | |
| productions of construction lines, | | | | |
| finished lines, hidden and overhead | | | | |
| details projections, centre lines, break | | | | |
| lines, dimensioning of plane, | | | | |
| elevations and sections of objects. | | | | |
| 2.3 Layout drawing sheets with the | | | | |
| following: | | | | |
| (a) margin Lines (b) title block, etc. | | | | |
| 2.4 State the various standards of drawing | | | | |
| sheets. | | | | |
| 2.5 Print letters and figures of various | | | | |
| forms and characters. | | | | |
| 2.6 Illustrate conventional signs and | | | | |
| symbols. | | | | |
| 2.7 Layout a given set of drawing on a | | | | |
| given sheet using the conventional | | | | |
| signs, symbols and appropriate | | | | |
| lettering characters | | | | |
| GENERAL OBJECTIVE 3: Know the construction | of simple geometr | rical figures and | shapes | |
| 1 Explain the purpose of geometrical | or simple geometr | icai iigaics and | snupes | |
| construction in drawings. | | | | |
| 3.2 Construct parallel and perpendicular | | | | |
| lines. | | | | |
| 3.3 Construct bisect lines, angles and | | | | |
| areas. | | | | |
| 3.4 Dived a straight line into given number | | | | |
| of equal parts. | | | | |
| 3.5 Identify polygon (regular or irregular). | | | | |
| 3.6 Construct regular polygon with (a) N | | | | |
| sides in a given circle (b) a given side, | | | | |
| length and N sides on a straight line | | | | |
| 3.7 Define a circle. | | | | |
| 3.8 Explain the properties of a circle, e.g. | | | | |
| 5.6 Explain the properties of a circle, e.g. | <u> </u> | | | |

| | 1 1 1 | | | | |
|------|--|-------------------|----------------|--------------|--|
| | radius, diameter, normal, tangent, | | | | |
| | circumference etc. | | | | |
| | 3.9 Carry out simple geometrical | | | | |
| | constructions on circles. E.g. | | | | |
| | a). The diameter of a circle given the | | | | |
| | circumference. | | | | |
| | b). The circumference of a circle of a | | | | |
| | given diameter. | | | | |
| | c). A circle to pass through 3 points. | | | | |
| | d). A circle to pass through 2 points | | | | |
| | and touch a given line. | | | | |
| | e). A circle to touch a given smaller | | | | |
| | circle and a given line. | | | | |
| | f). Tangents to circle at various points | | | | |
| | g). An arc of known radius tangent to | | | | |
| | two lines at an angle of less than | | | | |
| | and more than 90° | | | | |
| | h). An arc externally tangent to two | | | | |
| | circles. | | | | |
| | i). Inscribing/enscribing circles | | | | |
| | 3.10. Define an ellipse. | | | | |
| | 3.11. Construct an ellipse by using: | | | | |
| | a). Trammel method. | | | | |
| | b). Concentric circle method. | | | | |
| | 3.12. Explain the following draughting | | | | |
| | techniques: | | | | |
| | a). Projection method. | | | | |
| | b). Measurement method. | | | | |
| | c). Transposition method. | | | | |
| | RAL OBJECTIVE 4: Know the construction of | f isometric and o | blique drawing | & projection | |
| Week | 1 Explain isometric and oblique | | | | |
| | projections | | | | |
| | 4.2 Draw a square in isometric and oblique | | | | |
| | forms | | | | |
| | 4.3 Draw a circle in isometric and oblique | | | | |
| | forms | | | | |

| | , | | | ı | 1 | |
|-------|---|-----------------------|-------------|---|---|--|
| | 4.4 Draw an ellipse in isometric and | | | | | |
| | oblique forms | | | | | |
| | 4.5 Draw a polygon with a minimum of | | | | | |
| | eight sides in isometric and oblique | | | | | |
| | forms | | | | | |
| | 4.6 Dimension holes, circles, arcs angles | | | | | |
| | correctly on isometric and oblique | | | | | |
| | drawing | | | | | |
| | 4.7 Use appropriate conventional symbols | | | | | |
| | and abbreviations. | | | | | |
| GENEI | RAL OBJECTIVE 5: Understand the princip | les of orthographic | projections | | | |
| Week | 5.1 Explain the principles of orthographic | | | | | |
| | projections. | | | | | |
| | 5.2 Illustrate the principal planes of | | | | | |
| | projection. | | | | | |
| | a). Vertical plane. | | | | | |
| | b). Horizontal plane. | | | | | |
| | 5.3 Explain why the first and third angles | | | | | |
| | are used and the second and fourth | | | | | |
| | angles not used. | | | | | |
| | 5.4 project views of three-dimensional | | | | | |
| | objects on to the basic planes of | | | | | |
| | projection in both first and third angle | | | | | |
| | to obtain. | | | | | |
| | a). The front view or elevation | | | | | |
| | b). The top view or plan. | | | | | |
| GENE | RAL OBJECTIVE 6: Understand the intersec | ctions of irregular s | solids | | | |
| | 6.1 Explain interpretation or intersections | | | | | |
| | of solids | | | | | |
| | 6.2 Draw the lines of inter-sections of | | | | | |
| | solids following regular solids and | | | | | |
| | planes in both first and third angles. | | | | | |
| | a). Two square prisms meeting at right | | | | | |
| | angles. | | | | | |
| | b). Two dissimilar square prism at | | | | | |
| | right angles. | | | | | |
| | | • | | | | |

| c). A hexagonal prism meeting a | | | |
|---|--|--|--|
| square prism at right angles. | | | |
| d). Two dissimilar cylinders meeting at | | | |
| angle. | | | |
| e). Two dissimilar cylinder meeting at | | | |
| right angle. | | | |
| f). Two dissimilar cylinder meeting at | | | |
| right angles. Their centre not being in | | | |
| the same vertical plane. | | | |

| PROGRAMME: | NATIONAL | DIPLOMA | IN | COMPUTER | CODE: MEC 102 | CREDIT HRS: 60 HRS |
|--------------------|--------------|---------|----|----------|-----------------------|--------------------|
| ENGINEERING | | | | | | |
| COURSE: DESCR | RIPTIVE GEON | METRY | | | PRE-REQUISITE MEC 101 | |
| FIRST SEMESTE | CR CR | | | | | |

Goal: This course is designed to develop the student's skill in descriptive geometry and application of graphical technique.

GENERAL OBJECTIVES:

On completion of this module, the student should be able to:

- 1. Know the construction of different geometrical figures and shapes.
- 2. Understand orthographic projections.
- 3. Understand the developments and intersections of regular solids and planes.

Theoretical Content

| Theoretical Content | | | | | |
|-----------------------------|-------------------|----------------------|-----------------|--------------------|--|
| GENERAL OBJECTIVES | 1: Know the const | truction of differen | ent geometrical | figures and shapes | |
| Specific Learning | Teacher's | Learning | | | |
| Outcomes | Activities | Resources | | | |
| 1.1 Carry out simple | | | | | |
| geometric construction | | | | | |
| of an ellipse e.g. | | | | | |
| a). Tangent to an ellipse | | | | | |
| at any given on the | | | | | |
| ellipse, tangent an | | | | | |
| ellipse from a given | | | | | |
| point P outside the | | | | | |
| ellipse etc. | | | | | |
| 1.2 Dived areas of plane | | | | | |
| figure. | | | | | |
| 1.3 Enlarge and reduce from | | | | | |
| the given areas of plane | | | | | |
| figure. | | | | | |
| 1.4 Define parabola and | | | | | |
| hyperbola. | | | | | |
| 1.5 Construct parabola and | | | | | |
| hyperbola using: | | | | | |
| a). Rectangular method; | | | | | |
| b). Ordinate method; | | | | | |
| c). Tangent method; | | | | | |

| d). Offset method. | | | |
|------------------------------|--|--|--|
| 1.6 Locate the directrix and | | | |
| focus of a given | | | |
| parabolic curve. | | | |
| 1.7 Construct a curve of a | | | |
| parabolic form through | | | |
| two given points. | | | |
| 1.8 Define locus of a point. | | | |
| 1.9 Define involute to a | | | |
| square, circle, cycloid | | | |
| and Archimedean spiral. | | | |
| 1.10 Construct involute to a | | | |
| square, circle cycloid | | | |
| and Archimedean | | | |
| spiral. | | | |
| 1.11 Describe the various | | | |
| types of link | | | |
| mechanism. | | | |
| 1.12. Plot the locus of a | | | |
| point e.g. | | | |
| a). Mechanism with a | | | |
| link, constrained to | | | |
| pass through a fixed | | | |
| point. | | | |
| b). Mechanism with | | | |
| the end of the link | | | |
| constrained to move | | | |
| in a horizontal line. | | | |
| c). Three links | | | |
| mechanism. | | | |
| d). Linkages of a | | | |
| mechanically | | | |
| operated level | | | |
| system. | | | |
| e). Mechanism of a | | | |
| printing press. | | | |

| 0.35.1 | | | | | 1 | | | |
|---|--|--|--|--|---|--|--|--|
| f). Mechanism of a | | | | | | | | |
| pair of secatours. | | | | | | | | |
| GENERAL OBJECTIVES 2: Understand orthographic projections | | | | | | | | |
| 2.1 Identify the third plane | | | | | | | | |
| (the auxiliary or side | | | | | | | | |
| vertical plane) of | | | | | | | | |
| projection. | | | | | | | | |
| 2.2 Project on the end view | | | | | | | | |
| of a three dimensional | | | | | | | | |
| object. | | | | | | | | |
| 2.3 Sketch from an object | | | | | | | | |
| (with chamfer, round | | | | | | | | |
| hole, stepped block, etc) | | | | | | | | |
| the plan and elevators | | | | | | | | |
| and draw the sketched | | | | | | | | |
| view in first and third | | | | | | | | |
| angle orthographic | | | | | | | | |
| projection. | | | | | | | | |
| 2.4 Draw plan, elevators and | | | | | | | | |
| section of a simple | | | | | | | | |
| object such as hollow | | | | | | | | |
| sandcrete block | | | | | | | | |
| 2.5 Explain the properties of | | | | | | | | |
| a point, a line and a | | | | | | | | |
| plane in space. | | | | | | | | |
| 2.6 Locate given points, | | | | | | | | |
| lines and planes in space | | | | | | | | |
| on the projection planes. | | | | | | | | |
| 2.7 Determine the true | | | | | | | | |
| length of a line in space | | | | | | | | |
| using: | | | | | | | | |
| a). Auxiliary method. | | | | | | | | |
| b). Rotational method. | | | | | | | | |
| 2.8 State practical | | | | | | | | |
| applications of the | | | | | | | | |
| methods in 2.7. | | | | | | | | |

| 2.9 Apply successive | | | | | | |
|-----------------------------|-------------------|-----------------|-----------------|----------------------|-----------|--|
| auxiliary projections to | | | | | | |
| determine: | | | | | | |
| a). The true position of a | | | | | | |
| point to both | | | | | | |
| horizontal and | | | | | | |
| vertical planes. | | | | | | |
| b). The true length of | | | | | | |
| line inclined to both | | | | | | |
| horizontal and | | | | | | |
| vertical planes. | | | | | | |
| c). The true shape of a | | | | | | |
| plane inclined to | | | | | | |
| both horizontal and | | | | | | |
| vertical planes. | | | | | | |
| d). The shortest distance | | | | | | |
| between two lines to | | | | | | |
| the planes. | | | | | | |
| e). The angle of | | | | | | |
| inclination of a line | | | | | | |
| inclined to two given | | | | | | |
| planes. | | | | | | |
| 2.10 Explain dihedral angle | | | | | | |
| and give examples of | | | | | | |
| where it is commonly | | | | | | |
| used; hipped roofs, | | | | | | |
| hoppers etc. | | | | | | |
| 2.11Determine dihedral | | | | | | |
| angle of two | | | | | | |
| intersecting surfaces. | | | | | | |
| GENERAL OBJECTIVES | 3: Understand the | developments an | d intersections | of regular solids an | d planes. | |
| 3.1 Define developments | | | | | | |
| 3.2 Develop patterns of | | | | | | |
| regular solids such as | | | | | | |
| truncated prism, circular | | | | | | |
| cylinder, truncated | | | | | | |

| cylinder, frustrum of a | | | |
|---------------------------|--|--|--|
| pyramid, truncated cone | | | |
| etc. | | | |
| 3.3 Draw the lines of | | | |
| intersections of the | | | |
| following regular solids | | | |
| and planes in both first | | | |
| and third angles: | | | |
| a). A cylinder meeting a | | | |
| square pyramids at | | | |
| right angle. | | | |
| b). A cylinder meeting a | | | |
| square pyramids at an | | | |
| angle. | | | |
| c). A cylinder meeting a | | | |
| cone, the cone at an | | | |
| angle. | | | |
| d). A cylinder meeting a | | | |
| cone, the cone | | | |
| enveloping the | | | |
| cylinder. | | | |
| e). A cylinder and a | | | |
| cone, the cylinder | | | |
| enveloping the cone. | | | |
| f). A square prism | | | |
| meeting a rectangular | | | |
| plane at an angle. | | | |
| g). A square prism | | | |
| meeting an ellipse at | | | |
| an angle. | | | |
| h). A square prism | | | |
| meeting a circle an | | | |
| angle. | | | |
| i). A cylinder meeting a | | | |
| pentagon at an angle. | | | |
| j). A cylinder meeting an | | | |

| ellipse at an angle. | | | |
|---------------------------|--|--|--|
| k). A cone meeting an | | | |
| ellipse at an angle. | | | |
| l). A circle cutting | | | |
| through a pyramid at | | | |
| an angle. | | | |
| m). An ellipse being | | | |
| enveloped by a | | | |
| pyramid at an angle | | | |
| etc. | | | |
| 3.4 Draw the patterns | | | |
| (developments) of the | | | |
| regular solids and planes | | | |
| in 3.3 above. | | | |
| 3.5 Make models of the | | | |
| patterns referred to 3.3 | | | |
| above. | | | |

| PROGRAMME: NATIONAL DIPLOMA IN COMPUTER | CODE: MEC 104 | CREDIT HRS: 60 HRS |
|--|---------------|--------------------|
| ENGINEERING | | |
| COURSE: MECHANICAL WORKSHOP TECHNOLOGY AND | | |
| PRACTICE 1 | | |
| FIRST SEMESTER | | |

Goal: This course is intended with basic practical skills in mechanical engineering practice.

GENERAL OBJECTIVES:

On completion of this module, the student should be able to:

- 1. Know the hazards in a workshop environment and the appropriate procedure to take in the event of an accident in a workshop.
- 2. Know the composition, properties, choice and use of a range of Engineering materials.
- 3. Understand the general principles of cutting and the application of various cutting tools.
- 4. Demonstrate the knowledge of the use of common measuring and marking-out instruments.
- 5. Know the functions and uses of a drilling machine and a center lathe.
- 6. Know the functions and use of shaping and milling machines.

Theoretical Content

GENERAL OBJECTIVES 1: Know the hazards in a workshop environment and the appropriate procedure to take in the event of an accident in a workshop.

| Specific Learning | Teacher's Activities | Learning | | |
|----------------------------|----------------------|-----------|--|--|
| Outcomes | | Resources | | |
| 1.1 List the major | | | | |
| responsibilities of the | | | | |
| employee under the | | | | |
| health and safety at | | | | |
| work "Act" | | | | |
| 1.2 Identify the dangers | | | | |
| associated with | | | | |
| unsuitable clothing, hair, | | | | |
| and the importance of | | | | |
| machine guards. | | | | |
| 1.3 List the dangers | | | | |
| associated with the | | | | |
| improper use of | | | | |
| electricity in the | | | | |
| workshop. | | | | |
| 1.4 State the need for eye | | | | |

| | T | Г | Г | | T | |
|-------------------------------|----------------------------|--------------------|------------------|----------------|------------------|---|
| protection in relation to | | | | | | |
| sparks, dust, etc. | | | | | | |
| 1.5 Identify hazardous | | | | | | |
| conditions covered by | | | | | | |
| the "ACT" in 1.1 above. | | | | | | |
| 1.6 State the relevant | | | | | | |
| procedures to be taken | | | | | | |
| to deal successfully with | | | | | | |
| various types of fire and | | | | | | |
| accident: oil, electrical, | | | | | | |
| mechanical and | | | | | | |
| chemical. | | | | | | |
| 1.7 List the procedures to be | | | | | | |
| taken in the event of | | | | | | |
| physical injury. | | | | | | |
| 1.8 List the procedures for | | | | | | |
| the care and use of | | | | | | |
| various workshop tools | | | | | | |
| and machines. | | | | | | |
| 1.9 State the power | | | | | | |
| requirements for most | | | | | | |
| workshop power | | | | | | |
| machines. | | | | | | |
| GENERAL OBJECTIVES | 2: Know the composition, p | properties, choice | ce and uses of a | range of Engir | neering material | S |
| 2.1 State the properties and | | | | | | |
| the uses of plain carbon | | | | | | |
| steels, malleable, cast, | | | | | | |
| and wrought irons. | | | | | | |
| 2.2 State the properties and | | | | | | |
| the uses of plain brasses | | | | | | |
| and bronzes, nickel and | | | | | | |
| nickel-chrome | | | | | | |
| constructional steel. | | | | | | |
| 2.3 Describe the properties | | | | | | |
| of light alloys, metals | | | | | | |
| used for diecasting, | | | | | | |

| 1 1 1 1 1 1 1 | | | | | | |
|-------------------------------|-----------------------------|------------------|------------------|------------------|------------------|--------|
| bearing metals and their | | | | | | |
| uses. | | | | | | |
| 2.4 List plastic materials in | | | | | | |
| common use, their | | | | | | |
| advantages and | | | | | | |
| limitations compared | | | | | | |
| with metals. | | | | | | |
| 2.5 State the typical uses of | | | | | | |
| plastic materials. | | | | | | |
| GENERAL OBJECTIVES 3 | 3: Understand the general p | rinciples of cut | ting and the app | plication of var | ious cutting too | ls |
| 3.1 Describe the general | | | | | | |
| principles of filling and | | | | | | |
| identify grades of files | | | | | | |
| (Rough file, dead file, | | | | | | |
| smooth file). | | | | | | |
| 3.2 Identify the features of | | | | | | |
| twist drills, reamers, taps | | | | | | |
| dies and tapering tools. | | | | | | |
| 3.3 State the reasons for | | | | | | |
| using cutting fluids. | | | | | | |
| 3.4 Select suitable fluid for | | | | | | |
| various cutting | | | | | | |
| operations. | | | | | | |
| 3.5 Estimate suitable speeds | | | | | | |
| and feeds for common | | | | | | |
| metal-cutting operations | | | | | | |
| GENERAL OBJECTIVES | 4: Demonstrate the knowled | dge of the use o | of common mea | suring and mar | king-out instrur | nents. |
| 4.1 Use correct, rules | | 8 | | 8 | 8 | |
| dividers, odd-legs centre | | | | | | |
| punch protractors vee | | | | | | |
| blocks, etc | | | | | | |
| 4.2 Explain the principle of | | | | | | |
| non-digital 1 | | | | | | |
| micrometer. | | | | | | |
| 4.3 Explain the principle of | | | | | | |
| the Vernier protractor, | | | | | | |
| the vermer protractor, | | | | | | |

| _ | | 1 | | 1 | T | |
|--|----------------------------------|-------------------|----------------|----------------|---|--|
| micrometer and their | | | | | | |
| common applications. | | | | | | |
| 4.4 Demonstrate the use of | | | | | | |
| the instrument in 4.1 to | | | | | | |
| 4.3. | | | | | | |
| GENERAL OBJECTIVES 5 | 5: Know the functions and | uses of a drillin | g machine and | a center lathe | | |
| 5.1 Identify the features of | | | | | | |
| drilling machine centre | | | | | | |
| lathe. | | | | | | |
| 5.2 Differentiate between | | | | | | |
| various types of drilling | | | | | | |
| machines and their uses. | | | | | | |
| 5.3 Use drilling machine to | - | | | | | |
| drill holes to a specified | | | | | | |
| depth. | | | | | | |
| 5.4 Position accurately work | - | | | | | |
| on the face plate. | - | | | | | |
| 5.5 Describe three methods | | | | | | |
| of taper turning | | | | | | |
| 5.6 Fix taper turning | - | | | | | |
| attachments. | - | | | | | |
| 5.7 Carry out exercise using | | | | | | |
| drilling and lathe | - | | | | | |
| machine. | - | | | | | |
| GENERAL OBJECTIVES | 6: Know the functions and | uses of shaping | and milling ma | achines. | | |
| 6.1 State the process of | | | | | | |
| shaping. | | | | | | |
| 6.2 List the basic motion of | - | | | | | |
| tool on the work piece. | - | | | | | |
| 6.3 Explain briefly the | | | | | | |
| following: | - | | | | | |
| a). Reciprocating motion | | | | | | |
| of tool; | | | | | | |
| · · · · · · · · · · · · · · · · · · · | | | | | | |
| · · · · · · · · · · · · · · · · · · · | | | | | | |
| · · | | | | | | |
| b). Feed motion for horizontal surfaces;c). Feed motion for | | | | | | |

| vertical surfaces; | | | |
|-------------------------------|--|--|--|
| d). Feed motion for | | | |
| inclined surfaces | | | |
| 6.4 Describe the various | | | |
| parts of the shaping | | | |
| machine. | | | |
| 6.5 Explain the following | | | |
| methods of alignment | | | |
| testing: | | | |
| a). Parallelism | | | |
| b). Squareness | | | |
| 6.6 List methods of holding | | | |
| a work-piece in the | | | |
| machine. | | | |
| 6.7 Describe various parts of | | | |
| the milling machine. | | | |
| 6.8 List various types of | | | |
| milling machine. | | | |
| 6.9 Explain briefly cutting | | | |
| and feed motions. | | | |
| 6.10 Explain machine | | | |
| alignment. | | | |
| 6.11 Describe methods of | | | |
| holding a workpiece. | | | |
| 6.12 Describe various | | | |
| cutting tools used in the | | | |
| milling process. | | | |
| 6.13 Carry out exercises | | | |
| using the shaping and | | | |
| milling machines. | | | |

| COURSE: N SCIENCE | MECHANICAL | ENGINEERING | COURSES UNIT 3.0 | |
| | | | | |

Goal: This course is designed to provide the student with basic knowledge in statics and dynamics material, mechanic and operation of simple machines

GENERAL OBJECTIVES:

On completion of this module, the student should be able to:

- 1. Understand the concept of statics and solve problems associated with it.
- 2. Understand the concept of dynamics and solve problems related to it.
- 3. Understand the concept of frictional forces and solve related problems.
- 4. Understand the concept of work, power and energy and solve problems involving them.
- 5. Understand the principles of simple machines.
- 6. Understand the concept of stress and strain.
- 7. Understand the effects of pressure due to static fluids.
- 8. Know the properties of fluids and solve problems involving them
- 9. Understand and apply the principles of fluid flow.

| Theoretical Content | | | | | | | | |
|----------------------------|---|--|--|---|-----------|--|--|--|
| GENERAL OBJECTIVES | GENERAL OBJECTIVES 1: Understand the concept of statics and solve problems associated with it. | | | | | | | |
| Specific Learning | Teacher's | | | L | earning | | | |
| Outcomes | Activities | | | R | Resources | | | |
| 1.1 Differentiate between | | | | | | | | |
| scalar vector quantities. | | | | | | | | |
| 1.2 Computer the addition | | | | | | | | |
| and subtraction vectors | | | | | | | | |
| 1.3 Resolve vectors. | | | | | | | | |
| 1.4 Define force. | | | | | | | | |
| 1.5 Determine magnitude | | | | | | | | |
| and line of action of | | | | | | | | |
| force. | | | | | | | | |
| 1.6 Represent force by | | | | | | | | |

| | | | |
|------------------------------|------|------|--|
| vectors. | | | |
| 1.7 Describe concept of | | | |
| equilibrium and triangle | | | |
| of forces. | | | |
| 1.8 Resolve force both | | | |
| analytically and | | | |
| graphically. | | | |
| 1.9 Define coplanar and | | | |
| concurrent forces. | | | |
| 1.10 Define the effects of | | | |
| force and moment of a | | | |
| force. | | | |
| 1.11 Determine resultant | | | |
| and equilibrant of | | | |
| forces. | | | |
| 1.12 Define couple. | | | |
| 1.13 Draw polygon of | | | |
| forces. | | | |
| 1.14 Determine by | | | |
| experiment using the | | | |
| force board to verify. | | | |
| a). Triangle of forces. | | | |
| b). Parallelogram of | | | |
| forces. | | | |
| 1.15 Construct the following | | | |
| using universal | | | |
| mechanic kits: | | | |
| a). Parallelogram of | | | |
| forces; | | | |
| b). Moment of forces; | | | |
| c). Parallel force on | | | |
| beam. | | | |
| 1.16 Define centre of | | | |
| gravity. | | | |
| 1.17 Determine centre of | | | |
| gravity of at least 3 | | | |

| different bodies. | | | |
|-----------------------------|--|--|--|
| 1.18 Determine centre of | | | |
| area of a lamina. | | | |
| 1.19 Determine centroid. | | | |
| 1.20 Describe type of | | | |
| support, joints, and | | | |
| reactions. | | | |
| 1.21 Determine internal | | | |
| forces on a member. | | | |
| 1.22 Explain the | | | |
| equilibrium of forces | | | |
| at a pin joint. | | | |
| 1.23 Draw force diagram for | | | |
| a frame structure. | | | |
| 1.24 Explain the redundant | | | |
| member in a frame | | | |
| structure. | | | |
| 1.25 Solve simple problems | | | |
| relating to 1.2 to 1.24. | | | |
| 1.26 Verify by experiment | | | |
| the following: | | | |
| i. Principle of | | | |
| moments; | | | |
| ii. Centre of gravity of | | | |
| plane figures. | | | |
| 1.27 Demonstrate the | | | |
| following by | | | |
| experiment, using | | | |
| moment of couple | | | |
| apparatus: | | | |
| i. Equilibrium of | | | |
| parallel forces. | | | |
| ii. Equilibrium of | | | |
| moments and | | | |
| iii. Equilibrium of | | | |
| couples | | | |

| GENERAL OBJECTIVES 2: | Understand the cond | cept of dynamics and so | olve problen | ns related t | o it. | |
|-----------------------------|---------------------|-------------------------|--------------|--------------|-------|--|
| 2.1 Differentiate between | | | | | | |
| linear and angular | | | | | | |
| motion. | | | | | | |
| 2.2 Define speed, velocity | | | | | | |
| and acceleration. | | | | | | |
| 2.3 Define torque. | | | | | | |
| 2.4 Explain linear | | | | | | |
| displacement, angular | | | | | | |
| displacement, linear and | | | | | | |
| angular velocity and | | | | | | |
| acceleration. | | | | | | |
| 2.5 Plot speed time graph. | | | | | | |
| 2.6 Derive equations of | | | | | | |
| motion of a body having | | | | | | |
| constant acceleration. | | | | | | |
| 2.7 Solve problem involving | | | | | | |
| 2.2 to 2.6. | | | | | | |
| 2.8 Explain displacement | | | | | | |
| and velocity as vector | | | | | | |
| quantities. | | | | | | |
| 2.9 Describe change of | | | | | | |
| velocity. | | | | | | |
| 2.10 Determine resultant | | | | | | |
| displacement and | | | | | | |
| resultant velocity. | | | | | | |
| 2.11 Verify by experiment | | | | | | |
| the equation of linear | | | | | | |
| motion. | | | | | | |
| 2.12 Derive equation of | | | | | | |
| motion of freely | | | | | | |
| falling bodies. | | | | | | |
| 2.13 State Newton's laws of | | | | | | |
| motion. | | | | | | |
| 2.14 Describe principle of | | | | | | |
| conservation of | | | | | | |

| energy. | | | | | | | |
|--|--------------------|---------------|----------------|--------------|-------------|-------|--|
| 2.15 Determine potential | | | | | | | |
| and Kinetic energy by | | | | | | | |
| calculation. | | | | | | | |
| 2.16 Define momentum and | | | | | | | |
| energy. | | | | | | | |
| 2,17 Explain impulse forces. | | | | | | | |
| 2.18 Determine Kinetic | | | | | | | |
| energy of rotation. | | | | | | | |
| 2.19 Explain centripetal and | | | | | | | |
| centrifugal forces. | | | | | | | |
| 2.20 State the application of | | | | | | | |
| 2.18 to 2.19. | | | | | | | |
| 2.21 Perform an experiment | | | | | | | |
| to verify that | | | | | | | |
| centrifugal forces vary | | | | | | | |
| with mass, speed and | | | | | | | |
| distance. | | | | | | | |
| | | | | | | | |
| GENERAL OBJECTIVES 3: | Understand the con | ncept of fric | ctional forces | and solve r | elated prob | lems. | |
| GENERAL OBJECTIVES 3: 3.1 Explain friction. | Understand the con | ncept of fric | ctional forces | and solve re | elated prob | lems. | |
| GENERAL OBJECTIVES 3: | Understand the cor | ncept of fric | ctional forces | and solve r | elated prob | lems. | |
| GENERAL OBJECTIVES 3: 3.1 Explain friction. 3.2 State laws of friction. 3.3 Determine angle of | Understand the cor | ncept of fric | ctional forces | and solve r | elated prob | lems. | |

| GENERAL OBJECTIVES 3: 3.1 Explain friction. 3.2 State laws of friction. 3.3 Determine angle of friction and total reaction. | Understand the cor | ncept of fric | ctional forces | and solve r | elated prob | lems. | |
| GENERAL OBJECTIVES 3: 3.1 Explain friction. 3.2 State laws of friction. 3.3 Determine angle of friction and total reaction. 3.4 Differentiate between | Understand the cor | ncept of fric | ctional forces | and solve r | elated prob | lems. | |
| GENERAL OBJECTIVES 3: 3.1 Explain friction. 3.2 State laws of friction. 3.3 Determine angle of friction and total reaction. 3.4 Differentiate between static and dynamic | Understand the cor | ncept of fric | ctional forces | and solve r | elated prob | lems. | |
| GENERAL OBJECTIVES 3: 3.1 Explain friction. 3.2 State laws of friction. 3.3 Determine angle of friction and total reaction. 3.4 Differentiate between static and dynamic friction. | Understand the cor | ncept of fric | ctional forces | and solve r | elated prob | lems. | |
| GENERAL OBJECTIVES 3: 3.1 Explain friction. 3.2 State laws of friction. 3.3 Determine angle of friction and total reaction. 3.4 Differentiate between static and dynamic friction. 3.5 State merits and | Understand the con | ncept of fric | ctional forces | and solve r | elated prob | lems. | |
| GENERAL OBJECTIVES 3: 3.1 Explain friction. 3.2 State laws of friction. 3.3 Determine angle of friction and total reaction. 3.4 Differentiate between static and dynamic friction. 3.5 State merits and demerits of frictional | Understand the cor | ncept of fric | ctional forces | and solve r | elated prob | lems. | |
| GENERAL OBJECTIVES 3: 3.1 Explain friction. 3.2 State laws of friction. 3.3 Determine angle of friction and total reaction. 3.4 Differentiate between static and dynamic friction. 3.5 State merits and demerits of frictional forces. | Understand the cor | ncept of fric | ctional forces | and solve r | elated prob | lems. | |
| GENERAL OBJECTIVES 3: 3.1 Explain friction. 3.2 State laws of friction. 3.3 Determine angle of friction and total reaction. 3.4 Differentiate between static and dynamic friction. 3.5 State merits and demerits of frictional forces. 3.6 Solve problems | Understand the cor | ncept of fric | ctional forces | and solve r | elated prob | lems. | |
| GENERAL OBJECTIVES 3: 3.1 Explain friction. 3.2 State laws of friction. 3.3 Determine angle of friction and total reaction. 3.4 Differentiate between static and dynamic friction. 3.5 State merits and demerits of frictional forces. 3.6 Solve problems involving 3.2 to 3.4 | Understand the cor | ncept of fric | ctional forces | and solve r | elated prob | lems. | |
| GENERAL OBJECTIVES 3: 3.1 Explain friction. 3.2 State laws of friction. 3.3 Determine angle of friction and total reaction. 3.4 Differentiate between static and dynamic friction. 3.5 State merits and demerits of frictional forces. 3.6 Solve problems involving 3.2 to 3.4 3.7 Perform experiment | Understand the con | ncept of fric | ctional forces | and solve r | elated prob | lems. | |
| GENERAL OBJECTIVES 3: 3.1 Explain friction. 3.2 State laws of friction. 3.3 Determine angle of friction and total reaction. 3.4 Differentiate between static and dynamic friction. 3.5 State merits and demerits of frictional forces. 3.6 Solve problems involving 3.2 to 3.4 3.7 Perform experiment using the screw jaw, to | Understand the cor | ncept of fric | ctional forces | and solve r | elated prob | lems. | |
| GENERAL OBJECTIVES 3: 3.1 Explain friction. 3.2 State laws of friction. 3.3 Determine angle of friction and total reaction. 3.4 Differentiate between static and dynamic friction. 3.5 State merits and demerits of frictional forces. 3.6 Solve problems involving 3.2 to 3.4 3.7 Perform experiment | Understand the cor | ncept of fric | ctional forces | and solve r | elated prob | lems. | |

| b). Velocity ratio, | | | | | | |
|-------------------------------|-------------------|---------------|---------------|---------------|------------------------------|------|
| mechanical | | | | | | |
| advantage and | | | | | | |
| efficiency. | | | | | | |
| 3.8 Perform experiment | | | | | | |
| using friction | | | | | | |
| apparatus: | | | | | | |
| a). To determine | | | | | | |
| coefficient of | | | | | | |
| frictions | | | | | | |
| b). To verify the law of | | | | | | |
| friction | | | | | | |
| | Undonstand the ac | magnt of wa | alr mayyan an | d anamary and | l solvo problems involvina t | 2000 |
| GENERAL OBJECTIVES 4: | Understand the co | nicept of wo | rk, power and | d energy and | i solve problems involving u | nem. |
| 4.1 Define work, power, | | | | | | |
| energy and their unit. | | | | | | |
| 4.2 Determine work done | | | | | | |
| and power transmitted | | | | | | |
| by a torque. | | | | | | |
| 4.3 Solve problems | | | | | | |
| involving work, power | | | | | | |
| and energy. | | | | | | |
| 4.4 Determine by | | | | | | |
| experiment torque, | | | | | | |
| speed and energy and | | | | | | |
| solve problems | | | | | | |
| involving them. | | | | | | |
| GENERAL OBJECTIVES 5: | Understand the pr | inciples of s | imple machin | nes. | | |
| 5.1 Define a machine. | | | | | | |
| 5.2 State the law of | | | | | | |
| machine. | | | | | | |
| 5.3 Define mechanical | | | | | | |
| advantage, velocity ratio | | | | | | |
| 5.4 Plot load-mechanical | | | | | | |
| advantage graph. | | | | | | |
| 5.5 State the formula for the | | | | | | |
| efficiency of a machine. | | | | | | |

| 5.6 Give examples of simple | | | | | |
|------------------------------|--------------------|---------------|---------------|--|--|
| machines. | | | | | |
| 5.7 Explain the operation of | | | | | |
| differential wheel and | | | | | |
| axle. | | | | | |
| 5.8 Describe screw jack. | | | | | |
| 5.9 Explain the operation of | | | | | |
| a simple gear train. | | | | | |
| 5.10 Explain the operation | | | | | |
| of compound gear train. | | | | | |
| 5.11 Explain the operation | | | | | |
| of worm and worm | | | | | |
| wheel. | | | | | |
| 5.12 Explain the operation | | | | | |
| of belt drives | | | | | |
| 5.13 Solve problems | | | | | |
| involving 5.3 to 5.12 | | | | | |
| 5.14 Demonstrate | | | | | |
| differential pulley | | | | | |
| system of load lifting. | | | | | |
| GENERAL OBJECTIVE 6: U | Inderstand the con | cept of stres | s and strain. | | |
| 6.1 Define load. | | | | | |
| 6.2 Relate load and | | | | | |
| deformation. | | | | | |
| 6.3 Describe elastic and | | | | | |
| plastic ranges. | | | | | |
| 6.4 Define tensile, | | | | | |
| comprehensive, and | | | | | |
| shear stress and strain. | | | | | |
| 6.5 Relate stress and strain | | | | | |
| 6.6 State Hooke's law. | | | | | |
| 6.7 Perform tensile test for | | | | | |
| mild steel. | | | | | |
| 6.8 Determine ultimate | | | | | |
| tensile and | | | | | |
| comprehensive stress. | | | | | |

| 6.9 Define Ductility. | | | | | |
|-----------------------------|-------------------|---------------|----------------|---------------|--|
| 6.10 Plot load-extension | | | | | |
| diagrams for | | | | | |
| nonferrous materials. | | | | | |
| 6.11 Explain shear and | | | | | |
| shear stress. | | | | | |
| 6.12 Describe proof stress | | | | | |
| and brittle fracture. | | | | | |
| 6.13 Explain shearing cause | | | | | |
| by punching of flat | | | | | |
| plate. | | | | | |
| 6.14 Explain simple riveted | | | | | |
| and bolted joints. | | | | | |
| 6.15 Explain temperature | | | | | |
| stress. | | | | | |
| 6.16 Explain bending | | | | | |
| moments. | | | | | |
| 6.17 Solve simple problems | | | | | |
| involving 6.2 to 6.16 | | | | | |
| 6.18 Explain poisons ratio. | | | | | |
| GENERAL OBJECTIVES 7: | Understand the ef | fects of pres | sure due to st | tatic fluids. | |
| 7.1 Define pressure. | | | | | |
| 7.2 State the unit of | | | | | |
| pressure. | | | | | |
| 7.3 Determine hydrostatic | | | | | |
| pressure. | | | | | |
| 7.4 Derive the formula for | | | | | |
| the pressure at any depth | | | | | |
| of a liquid. | | | | | |
| 7.5 Describe instrument | | | | | |
| used for pressure | | | | | |
| measurements. | | | | | |
| 7.6 State the sources of | | | | | |
| errors in manometers. | | | | | |
| 7.7 Describe pressure | | | | | |
| gauges. | | | | | |

| 7.8 State sources of errors in | | | | | | |
|--------------------------------|------------------|---------------|----------------|--------------|-------------|--|
| pressure gauge. | | | | | | |
| 7.9 Describe pressure | | | | | | |
| transducers. | | | | | | |
| 7.10 Explain Archimedes | | | | | | |
| principle. | | | | | | |
| 7.11 Solve problems | | | | | | |
| involving hydrostatic | | | | | | |
| pressure. | | | | | | |
| 7.12 Verify by an | | | | | | |
| experiment the | | | | | | |
| Archimedes principle. | | | | | | |
| GENERAL OBJECTIVES 8: | Know the propert | ies of fluids | and solve pro | oblems invol | lving them. | |
| 8.1 State properties of | | | | | | |
| fluids. | | | | | | |
| 8.2 Explain the difference | | | | | | |
| between compressible | | | | | | |
| and incompressible | | | | | | |
| fluids. | | | | | | |
| 8.3 Define density, specific | | | | | | |
| weight and specific | | | | | | |
| gravity. | | | | | | |
| 8.4 State the application | | | | | | |
| units of quantities in 8.3. | | | | | | |
| 8.5 Solve problems | | | | | | |
| involving 8.3 | | | | | | |
| 8.6 Explain viscosity. | | | | | | |
| GENERAL OBJECTIVES 9: | Understand and a | pply the prin | ciples of flui | d flow | | |
| 9.1 Explain fluid flow and | | | | | | |
| volume, and rate of | | | | | | |
| flow. | | | | | | |
| 9.2 Derive the equation of | | | | | | |
| continuity of flow. | | | | | | |
| 9.3 Explain Kinematic | | | | | | |
| viscosity. | | | | | | |
| 9.4 Derive an expression for | | | | | | |

| COURSE: INTRODUCTION TO | | | COURSES UNIT 3.0 | |
| THEMODYNAMICS | | | | |
| | | | | |

Goal: This course is designed to enable the student acquire the basic knowledge of thermodynamic principles and their applications in engineering.

GENERAL OBJECTIVES:

- 1. Understand and apply the basic principles of Thermodynamics.
- 2. Understand the different types of Thermodynamics processes.
- 3. Understand the basic principles of heat engines and standard cycles.
- 4. Know the basic properties of different quality steams using the steam tables.
- 5. Know different types of fuels and their compositions.
- 6. Understand the different types of heat transfer and laws governing them.
- 7. Understand the principle and the use of air conditions and refrigeration.
- 8. Understand the effect of vibration on machine elements.

| Theoretical Content | | | | | | | | | |
|--|------------|---|----------|--|--|--|--|--|--|
| GENERAL OBJECTIVES 1: Understand and apply the basic principles of Thermodynamics. | | | | | | | | | |
| Specific Learning | Teacher's | L | earning | | | | | | |
| Outcomes | Activities | R | esources | | | | | | |
| 1.1 Define thermodynamics | | | | | | | | | |
| 1.2 List the different | | | | | | | | | |
| thermodynamic media | | | | | | | | | |
| and their properties. | | | | | | | | | |
| 1.3 Identify the internal | | | | | | | | | |
| energy of gasses | | | | | | | | | |
| 1.4 Compare the two | | | | | | | | | |
| specific heats. | | | | | | | | | |
| 1.5 Find the ratio of 1.4 | | | | | | | | | |

| | | | - | | | |
|-------------------------------|-------------------|---------------|--------------|-------------|---------|--|
| above in the form | | | | | | |
| m=Cp/Cv. | | | | | | |
| 1.6 State Boyle's law and | | | | | | |
| Charles's law for | | | | | | |
| gasses. | | | | | | |
| 1.7 Derive the characteristic | | | | | | |
| equation of gasses i.e. | | | | | | |
| $PV^2 = MRT.$ | | | | | | |
| 1.8 Solve problems | | | | | | |
| involving change of | | | | | | |
| pressure, volume and | | | | | | |
| temperature for ideal | | | | | | |
| gasses. | | | | | | |
| 1.9 State the first law of | | | | | | |
| thermodynamics. | | | | | | |
| 1.10 State the relationship | | | | | | |
| between heat transfer | | | | | | |
| (Q), Work Transfer | | | | | | |
| (W) and elated | | | | | | |
| changes in the | | | | | | |
| properties of the | | | | | | |
| working substance or | | | | | | |
| system. | | | | | | |
| 1.11 Derive the energy | | | | | | |
| equation i.e. Heat | | | | | | |
| supplied – Work done | | | | | | |
| + changes in internal | | | | | | |
| energy. | | | | | | |
| 1.12 Solve problem | | | | | | |
| involving first law of | | | | | | |
| thermodynamics. | | | | | | |
| GENERAL OBJECTIVES | 2: Understand the | different typ | es of Thermo | odynamic pr | ocesses | |
| 2.1 Explain the constant | | | | | | |
| volume process. | | | | | | |
| 2.2 Show that the work | | | | | | |
| done is equal to zero. | | | | | | |

| 2.3 Explain constant | | | | | | |
|-------------------------------|-------------------|--------------|----------------|--------------|-----------------|--|
| volume process. | | | | | | |
| 2.4 Show that the work | | | | | | |
| done = change in | | | | | | |
| internal energy and | | | | | | |
| heat added. | | | | | | |
| 2.5 Explain constant | | | | | | |
| temperature process | | | | | | |
| and determine the work | | | | | | |
| done. | | | | | | |
| GENERAL OBJECTIVES | 3: Understand the | basic princi | ples of heat e | ngines and s | tandard cycles. | |
| 3.1 State the second law of | | | | | | |
| Thermodynamics. | | | | | | |
| 3.2 Define heat engine as | | | | | | |
| device which uses 2 | | | | | | |
| thermal reservoir as a | | | | | | |
| source and sink in order | | | | | | |
| to deliver work output | | | | | | |
| on a continuous basis. | | | | | | |
| 3.3 Explain the Carnot | | | | | | |
| cycle. | | | | | | |
| 3.4 Illustrate Carnot cycle | | | | | | |
| with the aid of a P.V. | | | | | | |
| diagram. | | | | | | |
| 3.5 Point out the limitations | | | | | | |
| and assumptions made | | | | | | |
| in 3.3. | | | | | | |
| 3.6 Determine the | | | | | | |
| efficiency of the Carnot | | | | | | |
| cycle using 3.3. | | | | | | |
| 3.7 Describe Otto cycle | | | | | | |
| with the aid of PV | | | | | | |
| diagram. | | | | | | |
| 3.8 Determine the | | | | | | |
| efficiency of the Otto | | | | | | |
| cycle using 3.6 above. | | | | | | |
| cycle using 3.0 above. | | | | | | |

| | | | ı |
|-------------------------------|--|--|---|
| 3.9 Point out the limitations | | | |
| and assumptions made | | | |
| in 3.6. | | | |
| 3.10 Explain the Diesel | | | |
| cycle. | | | |
| 3.11 Compare the PV | | | |
| diagram of the diesel | | | |
| cycle with the Otto | | | |
| cycle. | | | |
| 3.12 Calculate the | | | |
| efficiency of the diesel | | | |
| cycle. | | | |
| 3.13 Explain the dual cycle. | | | |
| 3.14 Compare the PV | | | |
| diagram with that of the | | | |
| Diesel and the Otto | | | |
| cycles. | | | |
| 3.15 Describe the rankine | | | |
| cycle. | | | |
| 3.16 Draw the line diagram | | | |
| of a steam power plant | | | |
| 3.17 Define internal | | | |
| combustion and external | | | |
| combustion engines. | | | |
| 3.18 List the classes of heat | | | |
| engine according to:- | | | |
| i. The position of | | | |
| combustion; | | | |
| ii. The methods of | | | |
| combustion; | | | |
| iii. Type of cooling; | | | |
| iv. Type of fuel used; | | | |
| v. The position of the | | | |
| combustion | | | |
| chamber, i.e. | | | |
| horizontal, vertical | | | |

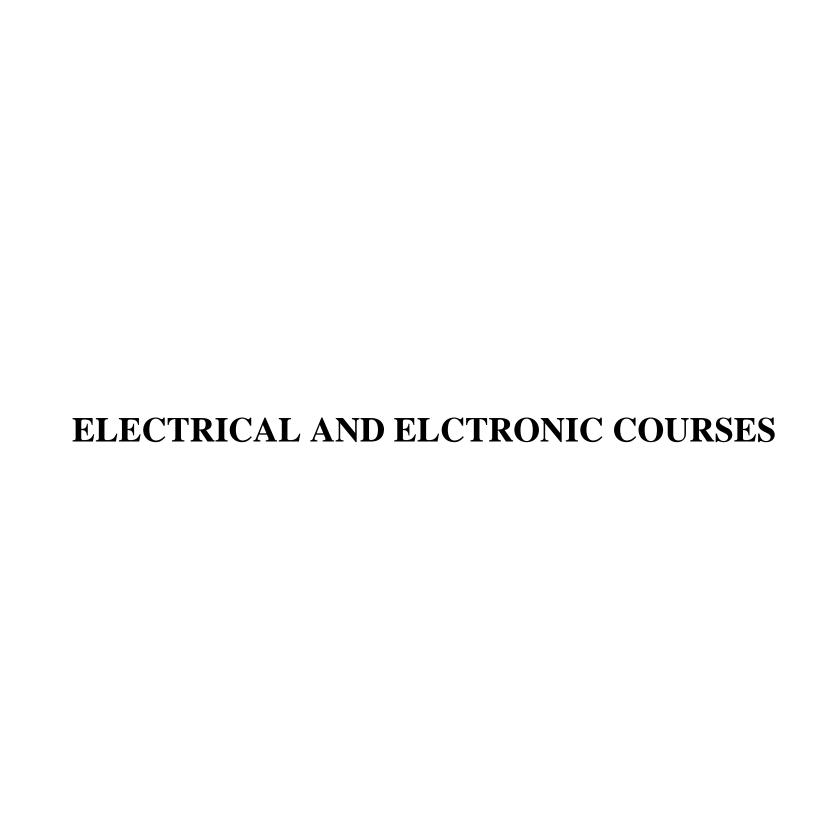

| | | | | | | T |
|------------------------------|-------------------|--------------|----------------|--------------|-------------------------|---|
| or vee; | | | | | | |
| vi. Type of movement | | | | | | |
| i.e. reciprocating | | | | | | |
| or rotary. | | | | | | |
| 3.19 List the parts of an | | | | | | |
| external combustion | | | | | | |
| engine. | | | | | | |
| 3.20 List the parts of an | | | | | | |
| external combustion | | | | | | |
| (I.C) engine | | | | | | |
| 3.21 Explain the function of | | | | | | |
| carburetor, distributor | | | | | | |
| and spark plug. | | | | | | |
| 3.22 Describe the fuel | | | | | | |
| injection in a diesel | | | | | | |
| plant. | | | | | | |
| 3.23 Describe the fuel | | | | | | |
| strokes in a 4-strokes | | | | | | |
| engine | | | | | | |
| 3.24 Illustrate the PV | | | | | | |
| diagram and the value | | | | | | |
| timing diagram. | | | | | | |
| 3.25 Describe the 2 stroke | | | | | | |
| engine. | | | | | | |
| 3.26 Differentiate between | | | | | | |
| 4 stroke and 2 stroke | | | | | | |
| engine. | | | | | | |
| 3.27 Explain the application | | | | | | |
| of 4 stroke and 2 | | | | | | |
| stroke engine. | | | | | | |
| 3.28 Describe the I.C | | | | | | |
| Engine power plant. | | | | | | |
| 3.29 Describe the gas | | | | | | |
| turbines power plant. | | | | | | |
| GENERAL OBJECTIVES | 4: Know the basic | properties o | f different qu | ality steams | using the steam tables. | |
| 4.1 Define gas and vapour. | | | | | | |

| 4.2 Describe the generation | | | | | |
|--------------------------------|-------------------|--------------|-----------------|-------------|--|
| of steam at constant | | | | | |
| pressure. | | | | | |
| 4.3 Draw the temperature- | | | | | |
| enthalpy diagram to | | | | | |
| Illustrate the properties | | | | | |
| of steam. | | | | | |
| 4.4 Explain sensible heat, | | | | | |
| latent heat and degree | | | | | |
| of super heat. | | | | | |
| 4.5 Differentiate between | | | | | |
| dry, saturated and wet | | | | | |
| saturated steam. | | | | | |
| 4.6 Determine dryness | | | | | |
| fraction. | | | | | |
| 4.7 Determine the | | | | | |
| properties of steam | | | | | |
| using steam table. | | | | | |
| 4.8 Solve basic problem | | | | | |
| related to different | | | | | |
| quality steam. | | | | | |
| 4.9 Define Dalton's Law of | | | | | |
| partial pressures. | | | | | |
| 4.10 Describe the steam | | | | | |
| calorimeter. | | | | | |
| 4.11 Determine the quality | | | | | |
| of wet steam using the | | | | | |
| steam calorimeter. | | | | | |
| GENERAL OBJECTIVES | 5: Know different | types of fue | ls and their co | ompositions | |
| 5.1 List typical solid, liquid | | | | | |
| and gaseous fuels and | | | | | |
| their sources. | | | | | |
| 5.2 State the chemical | | | | | |
| composition of fuels. | | | | | |
| 5.3 Define complete, | | | | | |
| incomplete and | | | | | |

| | <u> </u> | <u> </u> | 1 | | | Г |
|---------------------------------|--------------------------|---------------|-----------------|--------------|-----------------------|---|
| stoichiometric | | | | | | |
| combustion. | | | | | | |
| 5.4 Evaluate the theoretical | | | | | | |
| quality of air required in | | | | | | |
| 5.3 | | | | | | |
| 5.5 define air fuel ratio, rich | | | | | | |
| mixture, lean mixture | | | | | | |
| and mixture strength. | | | | | | |
| 5.6 Define gross (higher) | | | | | | |
| and net (lower) calorific | | | | | | |
| values. | | | | | | |
| 5.7 Determine the calorific | | | | | | |
| values of fuels using | | | | | | |
| Dulong's formula. | | | | | | |
| 5.8 Describe a method for | | | | | | |
| the determination of the | | | | | | |
| composition of an | | | | | | |
| exhaust gas. | | | | | | |
| GENERAL OBJECTIVES | 6: Understand the | different typ | pes of heat tra | nsfer and th | e laws governing them | |
| 6.1 Define heat transfer | | | | | | |
| across the boundaries of | | | | | | |
| a system. | | | | | | |
| 6.2 Describe the 3 methods | | | | | | |
| of heat transfer as | | | | | | |
| conduction, convection | | | | | | |
| and radiation. | | | | | | |
| 6.3 State Fouries Law of | | | | | | |
| conduction | | | | | | |
| 6.4 State Newton's Law of | | | | | | |
| cooling. | | | | | | |
| 6.5 Describe heat | | | | | | |
| exchangers and their | | | | | | |
| practical application. | | | | | | |
| 6.6 Explain natural and | | | | | | |
| forced convention. | | | | | | |
| 6.7 Determine Reynold's | | 1 | I | | | l |

| number | | | | | | |
|-------------------------------|-------------------|---------------|----------------|---------------|----------------------|--|
| 6.8 Explain black body | | | | | | |
| radiation and grey body | | | | | | |
| radiation | | | | | | |
| 6.9 Define the Stetan- | | | | | | |
| Boltzmen Law for the | | | | | | |
| emissive power of a | | | | | | |
| black body. | | | | | | |
| GENERAL OBJECTIVES | 7: Understand the | principle an | d the use of a | ir conditions | s and refrigeration. | |
| 7.1 Define air conditioning. | | | | | | |
| 7.2 State the role of air | | | | | | |
| conditioning in modern | | | | | | |
| life | | | | | | |
| 7.3 Illustrate dry bulb and | | | | | | |
| wet bulb temperature. | | | | | | |
| 7.4 Define the terms | | | | | | |
| specific humidity, | | | | | | |
| relative humidity and | | | | | | |
| ideal psychometrics. | | | | | | |
| 7.5 Plot 7.4 on a | | | | | | |
| psychometric chart. | | | | | | |
| 7.6 Explain how an air | | | | | | |
| conditioner works. | | | | | | |
| 7.7 List the common types | | | | | | |
| of refrigeration systems | | | | | | |
| 7.8 Identify refrigerators as | | | | | | |
| reversed heat engines. | | | | | | |
| 7.9 List the refrigerants | | | | | | |
| used in the system. | | | | | | |
| 7.10 Explain how a | | | | | | |
| refrigerator works. | | | | | | |
| GENERAL OBJECTIVES | 8: Understand the | effect of vib | ration on ma | chine elemei | nts. | |
| 8.1 Define mechanical | | | | | | |
| vibration. | | | | | | |
| 8.2 Compare damped and | | | | | | |
| undamped vibrations. | _ | | | | | |

| 8.3 Explain forced vibration | | | |
|-------------------------------|--|--|--|
| 8.4 Describe linear | | | |
| vibration. | | | |
| 8.5 Determine stiffness of | | | |
| materials. | | | |
| 8.6 Explain the rotation of a | | | |
| shaft between bearing | | | |
| 8.7 Explain whirling of | | | |
| shaft. | | | |
| 8.8 Explain self excited | | | |
| vibrations. | | | |

| PROGRAMME: NATIONAL DIPLOMA IN | CODE: EEC 112 | CREDIT HRS: 75 HRS |
|--------------------------------|---------------|--------------------|
| COMPUTER ENGINEERING | | |
| COURSE: ELECTRICAL ENGINEERING | COURSES | |
| SCIENCE | UNIT 3.0 | |
| | C1(11 0.0 | |

Goal: This course is intended to provide the student with basic knowledge of Electrical Engineering Science.

GENERAL OBJECTIVES:

- 1. Understand the concept of electric current flow.
- 2. Understand simple d.c. circuits.
- 3. Understand various types of energy and their inter-relationship.
- 4. Understand the concept of electrostatics, electric charge and capacitance of capacitors.
- 5. Understand the concept of magnetism and magnetic circuits.
- 6. Understand the concept of electromagnetism and electromagnetic induction.
- 7. Understand the concept of inductance and its application.
- 8. Understand the fundamentals of A.C. theory.

| Theoretical Content | | | | | | | | | | | |
|--|------------|--|-----------|--|--|--|--|--|--|--|--|
| GENERAL OBJECTIVES 1: Understand the concept of electric current flow. | | | | | | | | | | | |
| Specific Learning | Teacher's | | Learning | | | | | | | | |
| Outcomes | Activities | | Resources | | | | | | | | |
| 1.1 Define an atom | | | | | | | | | | | |
| 1.2 Explain the structure | | | | | | | | | | | |
| and composition of an | | | | | | | | | | | |
| atom. | | | | | | | | | | | |
| 1.3 Differentiate between | | | | | | | | | | | |
| conductors, insulators | | | | | | | | | | | |
| and semi-conductors. | | | | | | | | | | | |
| 1.4 Explain the concepts of | | | | | | | | | | | |
| current and electron | | | | | | | | | | | |
| flow. | | | | | | | | | | | |
| 1.5 Define electric current, | | | | | | | | | | | |

| potential difference electromotive force (e.m.f) and resistance, state their units and |
|--|
| (e.m.f) and resistance, |
| |
| state their units and |
| |
| symbols. |
| 1.6 State multiples and sub- |
| multiples of Electric |
| quantities; (e.g. Mega- |
| $m-10^6$, kilo-k- 10^3 , etc). |
| GENERAL OBJECTIVES 2: Understand simple d.c. circuits |
| 2.1 Define d.c. current. |
| 2.2 State the analogy |
| between current-flow, |
| and water flow. |
| 2.3 Describe basic d.c. |
| circuits. |
| 2.4 Explain ohm's law. |
| 2.5 verify by experiment the |
| ohm's law. |
| 2.6 Solve problem using |
| ohm's law. |
| 2.7 Define resistivity and |
| conductivity of a |
| conductor. |
| 2.8 State the relationship |
| between resistance of a |
| conductor, its resistivity, |
| length and area. |
| 2.9 Verify by experiment |
| the resistivity of a |
| material. |
| 2.10 Differentiate between |
| series and parallel |
| circuits. |
| 2.11 Solve problems |
| involving resistivity |

| and conductivity | | | |
|-------------------------------------|--|--|--|
| 2.12 Deduce the equivalent | | | |
| resistance of series and | | | |
| parallel circuits. | | | |
| 2.13 Explain Kirchhoff's | | | |
| laws. | | | |
| 2.14 Verify by experiment | | | |
| the kirchoff's laws. | | | |
| 2.15 Explain the super | | | |
| position principles. | | | |
| 2.16 Solve problems | | | |
| involving series and | | | |
| parallel circuits using | | | |
| kirchff's laws and | | | |
| superposition | | | |
| principles. | | | |
| 2.17 Define temperature | | | |
| coefficient of resistance. | | | |
| 2.18 Use the expression for | | | |
| resistance at | | | |
| temperature T ⁰ k and to | | | |
| O ⁰ k to calculate | | | |
| changes in resistance. | | | |
| 2.19 Draw the graph of | | | |
| resistance against | | | |
| Temperature. | | | |
| 2.20 Deduce from 2.18 the | | | |
| change in resistance | | | |
| due to change in | | | |
| temperature. | | | |
| 2.21 Determine by | | | |
| experiment the heating | | | |
| effect of electric | | | |
| current. | | | |
| 2.22 Solve problems | | | |
| involving effect of | | | |

| temperature on | | | | | | |
|------------------------------|-------------------|---------------|-------------------|------------------|----------------------------------|---------|
| resistance. | | | | | | |
| GENERAL OBJECTIVES | 3: Understand var | ious types of | f energy and th | neir inter-relat | ionship | |
| 3.1 Explain various types of | | | | | | |
| energy. | | | | | | |
| 3.2 Explain the relationship | | | | | | |
| between electrical, | | | | | | |
| mechanical and thermal | | | | | | |
| energy. | | | | | | |
| 3.3 State S.I. units of | | | | | | |
| various types of energy | | | | | | |
| in 3.2. | | | | | | |
| 3.4 State Joule' law. | | | | | | |
| 3.5 Solve problems | | | | | | |
| involving Joule's law. | | | | | | |
| 3.6 Determine by | | | | | | |
| experiment power in a | | | | | | |
| d.c. circuit. | | | | | | |
| GENERAL OBJECTIVES | 4: Understand the | concept of e | electrostatics, e | electric change | e and capacitance of capacitance | citors. |
| 4.1 Explain electric charge. | | | | | | |
| 4.2 State its unit. | | | | | | |
| 4.3 State coulomb's law | | | | | | |
| capacitors. | | | | | | |
| 4.4 Solve problems | | | | | | |
| involving coulomb's law. | | | | | | |
| 4.5 Define electric field | | | | | | |
| strength, electric flux | | | | | | |
| density, permittivity, | | | | | | |
| relative permitity, field | | | | | | |
| intensity, potential and | | | | | | |
| electric flux. | | | | | | |
| 4.6 Solve problems | | | | | | |
| involving the terms in | | | | | | |
| 4.5. | | | | | | |
| 4.7 Define capacitance. | | | | | | |
| 4.8 Derive an expression for | | | | | | |

| the capacitance of | | | | | | |
|------------------------------|------------------|--------------|---------------|---------------|-------|--|
| parallel plate capacitors | | | | | | |
| in terms of area, the | | | | | | |
| distance between plates | | | | | | |
| and composite | | | | | | |
| dielectrics. | | | | | | |
| 4.9 Derive an expression for | | | | | | |
| the capacitance of a | | | | | | |
| capacitor with | | | | | | |
| composite dielectric. | | | | | | |
| 4.10 Derive an expression | | | | | | |
| for the voltage | | | | | | |
| distribution between | | | | | | |
| series connected | | | | | | |
| capacitors. | | | | | | |
| 4.11 Deduce an expression | | | | | | |
| for the equivalent | | | | | | |
| capacitance for | | | | | | |
| capacitors connected in | | | | | | |
| series and in parallel. | | | | | | |
| 4.12 Derive an expression | | | | | | |
| for the energy stored in a | | | | | | |
| capacitor. | | | | | | |
| 4.13 Solve problems | | | | | | |
| involving 4.8 to 4.12. | | | | | | |
| 4.14 Determine by | | | | | | |
| experiments charging | | | | | | |
| and discharging on a | | | | | | |
| capacitor. | | | | | | |
| GENERAL OBJECTIVES 5 | : Understand the | concept of 1 | nagnetism and | magnetic circ | cuits | |
| 5.1 Define magnetic flux, | | | | | | |
| magnetic flux density | | | | | | |
| magneto motive force, | | | | | | |
| magnetic field strength, | | | | | | |
| reluctance, permeability | | | | | | |
| of free space magnetic | | | | | | |

| | | , | , | | | |
|--------------------------------|-------------------|--------------|----------------|----------------|---------------------|--|
| constants relative | | | | | | |
| permeability. | | | | | | |
| 5.2 State the symbols, units | | | | | | |
| and relationships of | | | | | | |
| terms in 5.1. | | | | | | |
| 5.3 Draw the electrical | | | | | | |
| equivalent of magnetic | | | | | | |
| circuit with or without | | | | | | |
| air-gap. | | | | | | |
| 5.4 State analogies between | | | | | | |
| electrical and magnetic | | | | | | |
| circuits. | | | | | | |
| 5.5 Solve simple magnetic | | | | | | |
| circuit problems. | | | | | | |
| 5.6 Distinguish between soft | | | | | | |
| and hard magnetic | | | | | | |
| materials. | | | | | | |
| GENERAL OBJECTIVES | 6: Understand the | concept of e | electromagneti | sm and electro | omagnetic induction | |
| 6.1 Explain the magnetic | | | | | | |
| affect of electric current. | | | | | | |
| 6.2 Draw magnetic fields | | | | | | |
| around straight | | | | | | |
| conductors, adjacent | | | | | | |
| parallel conductors and | | | | | | |
| solenoids. | | | | | | |
| 6.3 Demonstrate by | | | | | | |
| experiment the magnetic | | | | | | |
| effect of a current | | | | | | |
| carrying conductor in a | | | | | | |
| magnetic field. | | | | | | |
| 6.4 Explain the force on a | | | | | | |
| current carrying | | | | | | |
| conductor in a magnetic | | | | | | |
| field. | | | | | | |
| 6.5 State the direction of the | | | | | | |
| force in 6.4 | | | | | | |

| 6.6 Derive the expression | | | | | | |
|------------------------------|-------------------|--------------|---------------|-----------------|---|--|
| for the magnitude of the | | | | | | |
| force in 6.4 (i.e F = | | | | | | |
| mBIL newton). | | | | | | |
| 6.7 Explain the concept of | | | | | | |
| electromagnetic | | | | | | |
| induction. | | | | | | |
| 6.8 State Faraday's Laws of | | | | | | |
| electromagnetic | | | | | | |
| induction. | | | | | | |
| 6.9 State Lenz's law of | | | | | | |
| electromagnetic | | | | | | |
| induction. | | | | | | |
| 6.10 Derive the expressions | | | | | | |
| for magnitude of e.m.f | | | | | | |
| induced in a conductor | | | | | | |
| or a coil. | | | | | | |
| 6.11 Solve problems | | | | | | |
| involving 6.6 to 6.10 | | | | | | |
| above. | | | | | | |
| 6.12 State the applications | | | | | | |
| of electromagnetic | | | | | | |
| induction. | | | | | | |
| 6.13 Verify by experiments | | | | | | |
| Faraday's & Lenz's laws | | | | | | |
| GENERAL OBJECTIVES | 7: Understand the | concept of i | nductance and | its application | n | |
| 7.1 Define self and mutual | | _ | | | | |
| inductances. | | | | | | |
| 7.2 State the symbols and | | | | | | |
| units of the terms in 7.1 | | | | | | |
| above. | | | | | | |
| 7.3 State the expression for | | | | | | |
| the equivalent | | | | | | |
| inductance of | | | | | | |
| inductances connected | | | | | | |
| in series and in parallel. | | | | | | |

| | | | | | · |
|------------------------------|-------------------|-------------|---------------|--|---|
| 7.4 State the expression for | | | | | |
| the induced voltage | | | | | |
| across an inductor. | | | | | |
| 7.5 State the expression for | | | | | |
| the inductance in | | | | | |
| inductive coupled coils | | | | | |
| connected in series | | | | | |
| aiding or opposing. | | | | | |
| 7.6 Derive an expression for | | | | | |
| energy stored in an | | | | | |
| inductor. | | | | | |
| 7.7 Solve problem involving | | | | | |
| 7.3 to 7.6. | | | | | |
| 7.8 Describe using suitable | | | | | |
| diagram the operation of | | | | | |
| the induction coiled in a | | | | | |
| car ignition system. | | | | | |
| 7.9 Determine by | | | | | |
| experiment the | | | | | |
| inductance of a coil. | | | | | |
| 7.10 Determine by | | | | | |
| experiment energy loss | | | | | |
| in an inductor. | | | | | |
| GENERAL OBJECTIVES 8: | Understand the fu | ındamentals | of A.C theory | | |
| 8.1 Describe the production | | | | | |
| of alternating e.m.f by a | | | | | |
| rotating coil in a | | | | | |
| magnetic field. | | | | | |
| 8.2 Sketch a.c. waveforms | | | | | |
| both to scale and not to | | | | | |
| scale. | | | | | |
| 8.3 Define r.m.s. | | | | | |
| instantaneous, average, | | | | | |
| and peak valves, period, | | | | | |
| frequency of an a.c. | | | | | |
| waveform. | | | | | |
| | | | | | |

| 8.4 State relationship | | | |
|----------------------------|--|--|--|
| between instantaneous | | | |
| and peak values of a | | | |
| sinusoidal wave. | | | |
| 8.5 Solve problems | | | |
| involving 8.2 to 8.4. | | | |
| 8.6 Solve problems | | | |
| graphically on a.c. | | | |
| circuits with different | | | |
| combinations of | | | |
| resistance, inductance | | | |
| and capacitance. | | | |
| 8.7 Differentiate between | | | |
| series parallel resonance. | | | |
| 8.8 Explain phase lag or | | | |
| phase lead as applied to | | | |
| a.c circuits. | | | |
| 8.9 Explain the difference | | | |
| between single-phase | | | |
| and three-phase supply. | | | |
| 8.10 State advantages and | | | |
| disadvantages of three | | | |
| phase supply over | | | |
| single phase supply. | | | |
| 8.11 Demonstrate by | | | |
| experiment the | | | |
| relationship between | | | |
| the following | | | |
| frequency, period and | | | |
| amplitude of sinusoidal | | | |
| wave. | | | |
| 8.12 Determine by | | | |
| experiment the Q-factor | | | |
| of circuit containing | | | |
| R,L, and C in (a) series, | | | |
| (b) parallel. | | | |

| PROGRAMME: NATIONAL DIPLOMA IN | CODE: EEC 116 | CREDIT HRS: 60 HRS | | | | | |

| COMPUTER ENGINEERING | | | | | | | |
| COURSE: ELECTRICAL WORKSHOP COURSES UNIT 2.0 | | | | | | | |
| PRACTICE 1 | | | | | | | |
| | | | | | | | |

Goal: This course is designed to enable the student acquire basic skill necessary for Electrical installation work.

GENERAL OBJECTIVES:

- 1. Understand the applications of wiring and safety regulations.
- 2. Knows the use of electrical and electronic engineering tools and equipment.
- 3. Understand the construction and uses of different types of cables and the regulations relating to their uses.

| Theoretical Content | Theoretical Content | | | | | | | | | |
|-------------------------------------|--|-----------|--|--|--|--|--|--|--|--|
| GENERAL OBJECTIVES | GENERAL OBJECTIVES 1: Understand the applications of wiring and safety regulations | | | | | | | | | |
| Specific Learning | Teacher's | Learning | | | | | | | | |
| Outcomes | Activities | Resources | | | | | | | | |
| 1.1 List the main cause of | | | | | | | | | | |
| hazards in electrical and | | | | | | | | | | |
| electronic engineering. | | | | | | | | | | |
| 1.2 Explain methods of | | | | | | | | | | |
| preventing hazards. | | | | | | | | | | |
| 1.3 State briefly the scope | | | | | | | | | | |
| and purpose of the | | | | | | | | | | |
| health and safety at | | | | | | | | | | |
| work e.t.c. Act 1974, the | | | | | | | | | | |

| and 1944 factories act | | | | | | | | | | |

| | | | |
|-------------------------------|--|------|--|
| Regulation and Nigerian | | | |
| standard organization. | | | |
| 1.4 List several important | | | |
| considerations | | | |
| concerning general | | | |
| safety of Electrical and | | | |
| Electronic equipment | | | |
| and apparatus. | | | |
| 1.5 Define earth continuity | | | |
| conductor, earth | | | |
| electrode consumer's | | | |
| earth terminal. | | | |
| 1.6 Explain the necessity for | | | |
| earthing and state the | | | |
| relevant regulation | | | |
| concerning earthing. | | | |
| 1.7 Explain the protection of | | | |
| an installation by fuse | | | |
| and by ELCB. | | | |
| 1.8 Distinguish between | | | |
| solid earthing practice | | | |
| and earth leakage circuit | | | |
| breaker protection. | | | |
| 1.9 State a number of | | | |
| problems associated | | | |
| with earth leakage | | | |
| circuit breakers. | | | |
| 1.10 Describe how the | | | |
| human body can | | | |
| become part of an | | | |
| electric circuit. | | | |
| 1.11Explain how to prevent | | | |
| electric shock. | | | |
| 1.12 Explain the methods of | | | |
| treating electric shock | | | |
| 1.13 Demonstrate (Artificial | | | |

| respiration). | | | | | | |
|-------------------------------|--------------------|----------------|-----------------|----------------|--------------------|--|
| i. Mouth resuscitation; | | | | | | |
| ii. Revised Holder | | | | | | |
| Nelson resuscitation; | | | | | | |
| iii.External cardio | | | | | | |
| compression/cardiop | | | | | | |
| ulmonary | | | | | | |
| resuscitation | | | | | | |
| 1.14 Identify common burns | | | | | | |
| and wounds. | | | | | | |
| 1.15 Administer first aid | | | | | | |
| applicable to 1.14. | | | | | | |
| 1.16 List and use different | | | | | | |
| types of fire | | | | | | |
| extinguisher. | | | | | | |
| 1.17 Explain when each in | | | | | | |
| 1.14 is applicable. | | | | | | |
| GENERAL OBJECTIVES | 2: Know the use of | f electrical a | nd electronic e | ngineering too | ols and equipment. | |
| 2.1 List the tools obtainable | | | | | | |
| inside an electrician's | | | | | | |
| toolbox. | | | | | | |
| 2.2 Explain the use of | | | | | | |
| electrical workshop | | | | | | |
| tools | | | | | | |
| 2.3 Describe procedure for | | | | | | |
| carrying out routine | | | | | | |
| inspection of hand tools. | | | | | | |
| 2.4 Distinguish between a | | | | | | |
| hand tool and a machine | | | | | | |
| tool. | | | | | | |
| 2.5 Explain the correct | | | | | | |
| method of lighting blow | | | | | | |
| lamps. | | | | | | |
| 2.6 Light blow lamps | | | | | | |
| correctly. | | | | | | |
| 2.7 Use common workshops | | | | | | |

| tools and equipments for | | | | | | |
|-------------------------------|------------------|--------------|----------------|-----------------|----------------------------|-----------------------|
| the desired effect. | | | | | | |
| GENERAL OBJECTIVES 3 | : Understand the | construction | and uses of di | fferent types o | of cables and the regulati | ons relating to their |
| uses. | | | | | | |
| 3.1 List the main types of | | | | | | |
| insulating and | | | | | | |
| conducting materials. | | | | | | |
| 3.2 Distinguish between | | | | | | |
| conductors and | | | | | | |
| insulators. | | | | | | |
| 3.3 Describe, with the aid of | | | | | | |
| sketches, the | | | | | | |
| construction of different | | | | | | |
| types of cables. | | | | | | |
| 3.4 State the advantages and | | | | | | |
| disadvantages when | | | | | | |
| using: | | | | | | |
| i. P.V.C- insulated, | | | | | | |
| P.V.C -sheated | | | | | | |
| cables. | | | | | | |
| ii. Minerals-Insulated | | | | | | |
| metal-sheated cables. | | | | | | |
| iii.Armoured P.V.C- | | | | | | |
| Insulated, PVC | | | | | | |
| sheated cables. | | | | | | |
| iv. Steel and PVC | | | | | | |
| conducts. | | | | | | |
| v. Steel and PVC | | | | | | |
| trunking. | | | | | | |
| vi. Flexible cable and | | | | | | |
| cord etc. | | | | | | |
| 3.5 Explain the general IEE | | | | | | |
| Regulation related to | | | | | | |
| cables and their uses. | | | | | | |
| 3.6 Identify the cable colour | | | | | | |
| coding, commonly used | | | | | | |

| | | 1 | | |
|------------------------------|--|---|--|--|
| in Nigeria. | | | | |
| 3.7 Perform various types of | | | | |
| joints PVC and flexible | | | | |
| cables. | | | | |

| PROGRAMME: NATIONAL DIPLOMA IN COMPUTER ENGINEERING | CODE: EEC 124 | CREDIT HRS: 75 HRS |
|---|------------------|--------------------|
| COURSE: ELECTRONICS 1 | COURSES UNIT 3.0 | |
| | | |

Goal: This course is intended the student with basic knowledge of thermionic and semi-conductor devices.

GENERAL OBJECTIVES:

- 1. Understand the concept of thermionic emission.
- 2. Understand the simple concept of energy level in materials.
- 3. Know the operations, characteristics and applications of semi-conductor devices.
- 4. Understand the constructional features and configuration of an I.C.
- 5. Understand how the triode and the bipolar transistor can be used as a single stage amplifier.
- 6. Understand the zener diode and thyristor as switching devices.
- 7. Understand the constructional features and operation of a field-effect transistor (FET)

| Theoretical Content | Theoretical Content | | | | | | | | |
|--|---------------------|-----------|--|--|--|--|--|--|--|
| GENERAL OBJECTIVES 1: Understand the concept of thermionic emission. | | | | | | | | | |
| Specific Learning Teacher's Learning | | | | | | | | | |
| Outcomes | Activities | Resources | | | | | | | |
| 1.1 Explain the phenomenon | | | | | | | | | |
| of thermionic emissions. | | | | | | | | | |
| 1.2 Explain electron flow in | | | | | | | | | |
| a diode valve. | | | | | | | | | |
| 1.3 Sketch the diode valve | | | | | | | | | |
| characteristics | | | | | | | | | |
| 1.4 Obtain d.c and a.c | | | | | | | | | |
| resistance from 1.3 | | | | | | | | | |
| 1.5 Explain half-wave and | | | | | | | | | |
| full-wave rectification. | | | | | | | | | |
| 1.6 Explain the construction | | | | | | | | | |
| and principles of | | | | | | | | | |
| operations of a triode | | | | | | | | | |

| | | | |
|------------------------------|------|--|--|
| valve. | | | |
| 1.7 Determine by | | | |
| experiment the anode | | | |
| characteristics of a | | | |
| triode valve. | | | |
| 1.8 Draw the characteristics | | | |
| in 1.7 above | | | |
| 1.9 Draw typical family | | | |
| curves of la/vg (output | | | |
| characteristics). | | | |
| 1.10Draw typical family | | | |
| curves of la/vg (mutual | | | |
| characteristics). | | | |
| 1.11Define and determine | | | |
| the anode slope | | | |
| resistance. (r) Mutual | | | |
| conductance (gm) and | | | |
| amplification factor; | | | |
| (/u). | | | |
| 1.12Explain the effect of | | | |
| inter-electrode | | | |
| capacitances in a triode | | | |
| valve. | | | |
| 1.13Explain the | | | |
| construction and | | | |
| principles of operation | | | |
| of: Triode and Pentode. | | | |
| 1.14Determine by | | | |
| experiment the | | | |
| characteristics of valves | | | |
| listed in 1.13 | | | |
| 1.15Draw the characteristics | | | |
| of valves in 1.13. | | | |
| 1.16Explain the negative | | | |
| resistance effect in a | | | |
| triode. | | | |

| GENERAL OBJECTIVES | 2: Understand the | simple conce | ept of energy lo | evel in materia | als | |
|--|-------------------|--------------|------------------|-----------------|-----|--|
| 2.1 Outline energy levels in | | | | | | |
| materials. | | | | | | |
| 2.2 Explain valence and | | | | | | |
| conduction bands. | | | | | | |
| 2.3 Explain Fermi energy | | | | | | |
| levels. | | | | | | |
| 2.4 Distinguish between | | | | | | |
| conductors, | | | | | | |
| semiconductors and | | | | | | |
| insulators, using Fermi- | | | | | | |
| level concept. | | | | | | |
| 2.5 Explain intrinsic and | | | | | | |
| extrinsic | | | | | | |
| semiconductors. | | | | | | |
| 2.6 Explain carriers in semi- | | | | | | |
| conductors. | | | | | | |
| 2.7 Define majority and | | | | | | |
| minority carries. | | | | | | |
| 2.8 Outline the effect of | | | | | | |
| temperature on the | | | | | | |
| conductivity of semi- | | | | | | |
| conductors and | | | | | | |
| conductors. | | | | | | |
| GENERAL OBJECTIVES 3: Know the operations, characteristics and applications of semi-conductor devices. | | | | | | |
| 3.1 Explain P-N junction | | | | | | |
| diode (Forward and | | | | | | |
| Reverse bias). | | | | | | |
| 3.2 Sketch forward and | | | | | | |
| reverse characteristics of | | | | | | |
| the P-N junction diode. | | | | | | |
| 3.3 Explain silicon and | | | | | | |
| Germanium diode | | | | | | |
| characteristics. | | | | | | |
| 3.4 Explain zener diode | | | | | | |
| characteristics. | | | | | | |

| 0.771 .10 .1 | | | | | | T | |
|-------------------------------|--|--|--|--|--|---|--|
| 3.5 Identify the circuit | | | | | | | |
| symbols for diode. | | | | | | | |
| 3.6 Identify various types of | | | | | | | |
| diodes physically. | | | | | | | |
| 3.7 Explain the following: | | | | | | | |
| i. The zener effect, and | | | | | | | |
| ii. Avalanche effect. | | | | | | | |
| 3.8 State application of | | | | | | | |
| zener diode (clipping, | | | | | | | |
| stabilization etc.) | | | | | | | |
| 3.9 Explain the operation, | | | | | | | |
| using the characteristics | | | | | | | |
| and symbol of the | | | | | | | |
| following: | | | | | | | |
| i. Tunnel diode. | | | | | | | |
| ii. Photo diode. | | | | | | | |
| iii. Thermistors. | | | | | | | |
| 3.10 State the applications | | | | | | | |
| of (1) to (3) in 3.9 | | | | | | | |
| above. | | | | | | | |
| GENERAL OBJECTIVES | GENERAL OBJECTIVES 4: Understand the constructional features and configuration of an I.C | | | | | | |
| 4.1 Explain the structure | | | | | | | |
| and operation of a | | | | | | | |
| bipolar transistor (NPN | | | | | | | |
| and PNP). | | | | | | | |
| 4.2 Explain the biasing | | | | | | | |
| arrangement of NPN and | | | | | | | |
| PNP bipolar transistors. | | | | | | | |
| 4.3 Explain the circuit | | | | | | | |
| configuration of NPN | | | | | | | |
| and PNP bipolar | | | | | | | |
| transistors and their | | | | | | | |
| biasing arrangement: | | | | | | | |
| i. The common base | | | | | | | |
| configuration. | | | | | | | |
| ii. The common | | | | | | | |

| | T | | 1 | | T | I |
|---|-------------------|----------------|----------------|----------------|---------------------------|-----------|
| collector | | | | | | |
| configuration. | | | | | | |
| iii. The common emitter | | | | | | |
| configuration. | | | | | | |
| 4.4 Sketch the static | | | | | | |
| characteristics curves of | | | | | | |
| NPN and PNP bipolar | | | | | | |
| transistors for 4.3 (i) | | | | | | |
| and 4.3 (iii). | | | | | | |
| 4.5 Determine the input and | | | | | | |
| output resistances, | | | | | | |
| current and voltage | | | | | | |
| gains from 4.4. | | | | | | |
| 4.6 Determine by | | | | | | |
| experiments the | | | | | | |
| characteristic curve of | | | | | | |
| NPN and PNP | | | | | | |
| transistors. | | | | | | |
| GENERAL OBJECTIVES | 5: Understand hov | w the triode a | nd the bipolar | transistor can | be used as a single stage | amplifier |
| 5 1 E 1 ' 41 C' 1 | | | | | | |
| 5.1 Explain the fixed | | | | | | |
| biasing arrangement of a | | | | | | |
| _ | | | | | | |
| biasing arrangement of a | | | | | | |
| biasing arrangement of a single state transistor | | | | | | |
| biasing arrangement of a single state transistor amplifier. | | | | | | |
| biasing arrangement of a single state transistor amplifier. 5.2 Explain how to draw the | | | | | | |
| biasing arrangement of a single state transistor amplifier. 5.2 Explain how to draw the load line (D.C & A.C.) | | | | | | |
| biasing arrangement of a single state transistor amplifier. 5.2 Explain how to draw the load line (D.C & A.C.) output characteristic | | | | | | |
| biasing arrangement of a single state transistor amplifier. 5.2 Explain how to draw the load line (D.C & A.C.) output characteristic curve of a bipolar | | | | | | |
| biasing arrangement of a single state transistor amplifier. 5.2 Explain how to draw the load line (D.C & A.C.) output characteristic curve of a bipolar transistor. | | | | | | |
| biasing arrangement of a single state transistor amplifier. 5.2 Explain how to draw the load line (D.C & A.C.) output characteristic curve of a bipolar transistor. 5.3 Explain how to use the | | | | | | |
| biasing arrangement of a single state transistor amplifier. 5.2 Explain how to draw the load line (D.C & A.C.) output characteristic curve of a bipolar transistor. 5.3 Explain how to use the characteristic curves to | | | | | | |
| biasing arrangement of a single state transistor amplifier. 5.2 Explain how to draw the load line (D.C & A.C.) output characteristic curve of a bipolar transistor. 5.3 Explain how to use the characteristic curves to determine the following: | | | | | | |
| biasing arrangement of a single state transistor amplifier. 5.2 Explain how to draw the load line (D.C & A.C.) output characteristic curve of a bipolar transistor. 5.3 Explain how to use the characteristic curves to determine the following: i. A.C current gain; | | | | | | |
| biasing arrangement of a single state transistor amplifier. 5.2 Explain how to draw the load line (D.C & A.C.) output characteristic curve of a bipolar transistor. 5.3 Explain how to use the characteristic curves to determine the following: i. A.C current gain; ii. A.C. Voltage gain | | | | | | |

| characteristic of a triode | | | | | | |
|--|--------------------------|---------------|------------------|----------------|------------------------------|------|
| amplifier. | | | | | | |
| 5.5 Explain the working | | | | | | |
| principles of a triode | | | | | | |
| amplifier. | | | | | | |
| 5.6 Determine by | | | | | | |
| experiment the voltage | | | | | | |
| gain of a common | | | | | | |
| emitter. | C. II. 1 . 1.1 | 1' 1 | 1.1 | | • | |
| GENERAL OBJECTIVES | b: Understand the | zener diode a | and thyristor as | s switching de | vices. | T |
| 6.1 Explain basic structure | | | | | | |
| of the thyristor and the | | | | | | |
| zener diode. | | | | | | |
| 6.2 Explain the working | | | | | | |
| principle of the | | | | | | |
| thyristors and the zener | | | | | | |
| diode. | | | | | | |
| 6.3 List the application of | | | | | | |
| the thyristor and the zener diode. | | | | | | |
| | | | | | | |
| 6.4 State the advantages of | | | | | | |
| the thyristor switch over | | | | | | |
| other types of electromechanical | | | | | | |
| | | | | | | |
| switches e.g. relay mechanical switches. | | | | | | |
| | | | | | | |
| 6.5 Explain the operation of | | | | | | |
| zener diode as voltage stabilizer. | | | | | | |
| 6.6 Verify by experiment | | | | | | |
| the operation of a zener | | | | | | |
| diode as a voltage | <u> </u> | | | | | |
| stabilizer. | | | | | | |
| GENERAL OBJECTIVES | 7. Understand the | construction | al features and | operation of | | FFT) |
| 7.1 Explain the basic | . Onderstand the | Construction | ar reacures and | operation of a | i ficia-cricci transistor (1 | |
| constructional features | <u> </u> | | | | | |
| constructional reatures | | | | | | |

| of FET's (junction gate | | | |
|----------------------------|--|--|--|
| and insulated v gate). | | | |
| 7.2 Explain the different | | | |
| between depletion and | | | |
| data. | | | |
| 7.3 Plot the output and | | | |
| transfer characteristics | | | |
| from given data. | | | |
| 7.4 Determine ra, gm and u | | | |
| from 7.3. | | | |
| 7.5 State the precautions | | | |
| necessary when using | | | |
| FET's. | | | |
| 7.6 Determine by | | | |
| experiment, the output | | | |
| characteristic of a | | | |
| common source FET. | | | |
| 7.7 Obtain voltage gain, | | | |
| input and output | | | |
| resistance from output | | | |
| characteristic in 7.6 | | | |
| above. | | | |
| 7.8 Compare the properties | | | |
| of a FET with that of a | | | |
| triode valves and bipolar | | | |
| transistors. | | | |
| 7.9 Explain the use of | | | |
| bipolar and FET as | | | |
| switching devices using | | | |
| characteristics curves. | | | |

| PROGRAMME: NATIONAL DIPLOMA IN | CODE: EEC 126 | CREDIT HRS: 45 HRS |
|--|---------------------|--------------------|
| COMPUTER ENGINEERING | | |
| COURSE: ELECTRICAL WORKSHOP PRACTICE II | COURSES UNIT 1:0 | |
| | | |

Goal: This course is designed to enable the students acquire the knowledge and skill in Electrical Installation practice.

GENERAL OBJECTIVES:

On completion of this module, the student should be able to:

- 1. Understand various electrical wiring systems of equipment and accessories and the regulation relating to them.
- 2. Understand the testing and inspection of electrical installations.
- 3. Know the various soldering techniques.
- 4. Know the installation of electrical motors and starters.

Theoretical Content

GENERAL OBJECTIVES 1: Understand various electrical wiring systems of equipment and accessories and the regulation relating to them.

| them. | | | <i>U J</i> | | υ |
|-------------------------------|------------|-----------|------------|--|---|
| Specific Learning | Teacher's | Learning | | | |
| Outcomes | Activities | Resources | | | |
| 1.1 Identify different wiring | | | | | |
| methods such as | | | | | |
| conduits, ducts, trunking | | | | | |
| and surface. | | | | | |
| 1.2 Prepare item in 1.1 | | | | | |
| above for the regulation | | | | | |
| relating various | | | | | |
| installations. | | | | | |
| 1.3 State factors associated | | | | | |
| with the choice of a | | | | | |
| particular wiring system. | | | | | |
| 1.4 State the uses of wooden | | | | | |
| blocks and pattresses for | | | | | |
| electrical wiring. | | | | | |
| 1.5 Install electrical | | | | | |

| accessories such as | | | | | | |
|------------------------------|-------------------|------------------|----------------|------------------|--------|--|
| plugs, adaptor, ceiling | | | | | | |
| roses, sockets switches | | | | | | |
| etc. using them in 1.1 | | | | | | |
| above. | | | | | | |
| 1.6 Wire 2, 2-way switches | | | | | | |
| with two intermediate | | | | | | |
| switches to control | | | | | | |
| various lighting points. | | | | | | |
| 1.7 i. Wire electrical bell, | | | | | | |
| bell-indicator and alarm | | | | | | |
| circuits, ELCB, | | | | | | |
| domestic ring main | | | | | | |
| circuit cooker control | | | | | | |
| unit, consumer control | | | | | | |
| unit and discharge | | | | | | |
| lamps. | | | | | | |
| ii. Distribute power in a | | | | | | |
| consumer premises | | | | | | |
| employing single phase | | | | | | |
| four wire systems. | | | | | | |
| 1.8 State the regulation | | | | | | |
| relating to 1.4 to 1.6 | | | | | | |
| above | | | | | | |
| 1.9 Prepare requisition for | | | | | | |
| wiring materials. | | | | | | |
| GENERAL OBJECTIVES | 2: Understand the | e testing and in | spection of el | ectrical install | ations | |
| 2.1 State the basic | | | | | | |
| requirements for testing | | | | | | |
| and inspection of | | | | | | |
| electrical installation. | | | | | | |
| 2.2 Draw the electrical | | | | | | |
| diagrams of testing | | | | | | |
| procedures. | | | | | | |
| 2.3 Name various | | | | | | |
| instruments for carrying | ı | | | | | |

| out testing and | | | | | |
|------------------------------|-------------------|-------------------|--------------|---------------|--|
| inspection work. | | | | | |
| 2.4 Carry out the following | | | | | |
| test: | | | | | |
| i. Verification of | | | | | |
| polarity; | | | | | |
| ii. Continuity test; | | | | | |
| iii. Insulation resistance | | | | | |
| test; | | | | | |
| iv. Test of ring circuit | | | | | |
| continuity; | | | | | |
| v. Test of effectiveness | | | | | |
| of earthing. | | | | | |
| 2.5 Locate faults in cables | | | | | |
| using: | | | | | |
| i. Bridge methods, and | | | | | |
| ii. Murray loop teat. | | | | | |
| GENERAL OBJECTIVES | 3: Know the vari | ous soldering to | echniques. | | |
| 3.1 Identify three soldering | | | | | |
| equipment: | | | | | |
| i. Soldering iron (light | | | | | |
| duty). | | | | | |
| ii. Tinman's soldering | | | | | |
| iron (heavy duty). | | | | | |
| iii. Pot and ladle. | | | | | |
| 3.2 Explain the correct | | | | | |
| usage of soldering | | | | | |
| equipment in 3.1 above. | | | | | |
| 3.3 Perform soldering | | | | | |
| exercise, using the | | | | | |
| appropriate tools, | | | | | |
| equipment and | | | | | |
| materials. | | | | | |
| GENERAL OBJECTIVES | 4: Know the insta | allation of elect | rical motors | and starters. | |
| 4.1 Prepare mounts for | | | | | |
| motors, generators or | | | | | |

| transforms. | | | |
|-----------------------------|--|--|--|
| 4.2 Prepare and terminate | | | |
| cables on to the above | | | |
| machines. | | | |
| 4.3 Wire electric motors | | | |
| using: | | | |
| i. Direct-on-line | | | |
| starters; | | | |
| ii. Auto transformer | | | |
| starter; | | | |
| iii.Star-delta starter. | | | |
| 4.4 Test motor armature and | | | |
| stator windings. | | | |
| 4.5 Test machines for | | | |
| effectiveness. | | | |

| PROGRAMME: NATIONAL DIPLOMA IN | CODE: EEC 128 | CREDIT HRS: 5 HRS |
|--------------------------------|---------------|-------------------|
| COMPUTER ENGINEERING | | |
| COURSE: ELECT MEASUREMENT & | COURSES | |
| INSTRUMENTATION I | UNIT 3.0 | |
| | | |

Goal: This is intend to provide the student with the basic knowledge and skill in measurement and measuring instruments.

GENERAL OBJECTIVES:

- 1. Know the various types of indicating instruments.
- 2. Know the basic structure of an electromechanical instrument.
- 3. Understand the operation and construction of a permanent magnetic-moving coil instrument.
- 4. Understand the construction and principle of operation of ohmmeter, megger and multimeters
- 5. Understand the use of potentiometer for the measurement of electrical quantities in d.c and a.c circuits.
- 6. Understand the theory of errors in measurement and its applications.
- 7. Understand the construction, principles of operation and use of cathode ray oscilloscope (CRO).

| Theoretical Content | | | | | | | |
|-------------------------|---|-----------------|-----------------|---------------|-------|--|--|
| GENERAL OBJECTIVES | GENERAL OBJECTIVES 1: Know the various types of indicating instruments. | | | | | | |
| Specific Learning | Teacher's | Learning | | | | | |
| Outcomes | Activities | Resources | | | | | |
| 1.1 Identify various | | | | | | | |
| electromechanical and | | | | | | | |
| electronic instruments. | | | | | | | |
| 1.2 Explain the typical | | | | | | | |
| applications of | | | | | | | |
| electromechanical and | | | | | | | |
| electronic instruments. | | | | | | | |
| GENERAL OBJECTIVES | 2: Know the basis | ic structure of | an electromecha | nical instrur | nent. | | |
| 2.1 State the common | | | | | | | |
| devices used in an | | | | | | | |
| electromechanical | | | | | | | |
| instrument e.g | | | | | | | |
| Deflection, Controlling | | | | | | | |

| and Damping devices. | | | | | | |
|------------------------------|-------------------|-----------------|-------------------|--------------|-----------------------------|-----------|
| 2.2 Describe the types of | | | | | | |
| controlling devices i.e | | | | | | |
| spring control and | | | | | | |
| gravity control. | | | | | | |
| 2.3 Describe the methods of | | | | | | |
| damping e.g. | | | | | | |
| i. Eddy current | | | | | | |
| damping. | | | | | | |
| ii. Air viscous damping. | | | | | | |
| iii. Oil viscous damping. | | | | | | |
| 2.4 Describe the three basic | | | | | | |
| deflecting systems used | | | | | | |
| in electromechanical | | | | | | |
| instruments. | | | | | | |
| i. Permanent magnet- | | | | | | |
| moving coil d'Arsonval | | | | | | |
| ii. Moving iron system. | | | | | | |
| iii. Electrodynamics' | | | | | | |
| system. | | | | | | |
| GENERAL OBJECTIVES | 3: Understand the | e operation and | d construction of | f a permaner | nt magnetic-moving coil ins | strument. |
| 3.1 Explain with sketches | | | | • | | |
| the operation of a | | | | | | |
| permanent-magnet | | | | | | |
| moving coil instrument | | | | | | |
| (P.M.M) using | | | | | | |
| contrawound and spring | | | | | | |
| control. | | | | | | |
| 3.2 Describe permanent- | | | | | | |
| magnet moving coil | | | | | | |
| ammeters and | | | | | | |
| voltmeters. | | | | | | |
| 3.3 Explain the use of | | | | | | |
| shunts and multipliers | | | | | | |
| with ammeters and | | | | | | |
| voltmeters to extend the | | | | | | |

| | I | | | | T | |
|------------------------------|-------------------|-----------------|------------------|-------------|-------------------------------|-----------------------|
| ranges. | | | | | | |
| 3.4 Explain the limitations | | | | | | |
| of the simple p.m.m in | | | | | | |
| measuring high values | | | | | | |
| of voltage and currents. | | | | | | |
| 3.5 Calculate the value of | | | | | | |
| the multiplier and shunt | | | | | | |
| resistance for a given | | | | | | |
| application. | | | | | | |
| 3.6 Calibrate by | | | | | | |
| experiments electro- | | | | | | |
| dynamic ammeter, | | | | | | |
| voltmeter and wattmeter. | | | | | | |
| 3.7 Describe the operation | | | | | | |
| of instrument | | | | | | |
| transformers. | | | | | | |
| GENERAL OBJECTIVES | 4: Understand the | e construction | and principle of | operation o | f ohmmeter, merger and mu | ıltimeters |
| 4.1 Describe with the aid of | | | | | | |
| diagram the construction | | | | | | |
| of ohmmeter and | | | | | | |
| megger. | | | | | | |
| 4.2 Explain the operation of | | | | | | |
| ohmmeter and megger | | | | | | |
| 4.3 Measure resistance | | | | | | |
| using ohmmeters and | | | | | | |
| meggers. | | | | | | |
| GENERAL OBJECTIVES | 5: Understand the | e use of potent | iometer for the | measuremen | t of electrical quantities in | d.c and a.c circuits. |
| 5.1 Describe the slide wire | | • | | | • | |
| potentiometer. | | | | | | |
| 5.2 Explain the method of | | | | | | |
| standardization using | | | | | | |
| potentiometer. | | | | | | |
| 5.3 Describe the | | | | | | |
| measurement of low | | | | | | |
| resistance, and voltage | | | | | | |
| using potentiometer. | | | | | | |
| using potentionicter. | I . | | | | | |

| 5.4 Describe the calibration | | | | | | |
|------------------------------|--------------------------|------------------|------------------|----------------|------------------------------|-------------|
| of ammeter and | | | | | | |
| voltmeter using a | | | | | | |
| potentiometer. | | | | | | |
| 5.5 Describe the | | | | | | |
| commercial type of d.c. | | | | | | |
| potentiometer. | | | | | | |
| 1 * | | | | | | |
| 5.6 Measure voltage using | | | | | | |
| slide wire potentiometer. | Co I In donaton d the | . 41 | | | | |
| GENERAL OBJECTIVES | o: Understand the | e theory of erro | ors in measurem | ient and its a | ppncauons. | |
| 6.1 State different types of | | | | | | |
| errors (random | | | | | | |
| systematic errors). | | | | | | |
| 6.2 Define random and | | | | | | |
| systematic errors. | | | | | | |
| 6.3 Give examples of each | | | | | | |
| of errors in 6.2. | | | | | | |
| 6.4 calculate errors in | | | | | | |
| compound quantities i.e. | | | | | | |
| absolute error, fractional | | | | | | |
| errors, errors in sum, | | | | | | |
| errors in a difference, | | | | | | |
| errors in products and | | | | | | |
| errors in quotients. | | | | | | |
| GENERAL OBJECTIVES | 7: Understand the | e construction, | principles of op | peration and | use of cathode ray oscilloso | cope (CRO). |
| 7.1 Draw a simplified block | | | | | | |
| diagram of a C.R.O | | | | | | |
| 7.2 Explain the function of | | | | | | |
| each blocks in 7.1: | | | | | | |
| i. Cathode ray tube; | | | | | | |
| ii. Vertical and | | | | | | |
| horizontal | | | | | | |
| amplifiers; | | | | | | |
| iii. Time-base trigger | | | | | | |
| block; | | | | | | |
| iv. Sweep generator | | | | | | |

| blocks; | | | |
|-----------------------------|--|--|--|
| v. Signal delay block; | | | |
| vi. Sweep delay block. | | | |
| 7.3 Draw well labeled | | | |
| diagram of a cathode ray | | | |
| tube. | | | |
| 7.4 Explain the function of | | | |
| each parts of the cathode | | | |
| ray tube. | | | |
| 7.5 Explain how C.R.O can | | | |
| be used to measure: | | | |
| i. d. c. voltage. | | | |
| ii. a.c voltage. | | | |
| iii. Infrequency of | | | |
| sinusoidal | | | |
| waveform. | | | |
| 7.6 Explain the use of | | | |
| probes to get the best | | | |
| possible signal on the | | | |
| scope. | | | |
| 7.7 Measure voltage, | | | |
| frequency and amplitude | | | |
| of a.c and d.c using | | | |
| C.R.O | | | |

| PROGRAMME: NATIONAL DIPLOMA IN | CODE: EEC 232 | CREDIT HRS: 30 HRS |
|--------------------------------|---------------|--------------------|
| COMPUTER ENGINEERING | | |
| COURSE: ELECTRICAL CIRCUIT | COURSES | |
| THEORY I | UNIT 2.0 | |
| | | |

Goal: This course is intended to provide the students with basic knowledge in electric circuit analyses.

GENERAL OBJECTIVES:

- 1. Understand the Kirchhoff's laws and their application in solving d.c electrical problems.
- 2. Understand a.c theory and apply it to the solution of simple electrical circuit.
- 3. Understand Mesh and Nodal analyses and their applications in solving electrical problems.
- 4. Understand Network transformation and Duality principles.
- 5. Understand Network theorems and their applications d.c and a.c circuits.

| Theoretical Content | | | | | | | |
|--|------------------|------------------|---------------------|------------------|---------------------|--|--|
| GENERAL OBJECTIVES 1: Understand the Kirchhoff's laws and their application in solving d.c electrical problems. | | | | | | | |
| Specific Learning | Teacher's | Learning | | | | | |
| Outcomes | Activities | Resources | | | | | |
| 1.1 Explain Kirchhoff's | | | | | | | |
| voltage and current | | | | | | | |
| laws. | | | | | | | |
| 1.2 Derive formulae for | | | | | | | |
| series and parallel | | | | | | | |
| circuit with respect to | | | | | | | |
| total current and voltage | | | | | | | |
| drop. | | | | | | | |
| 1.3 Solve problems on | | | | | | | |
| Kirchhoff's laws. | | | | | | | |
| GENERAL OBJECTIVES | 2: Understand a. | c theory and app | oly it to the solut | ion of simple el | lectrical circuits. | | |
| 2.1 State different | | | | | | | |
| mathematical forms of | | | | | | | |
| representing a.c. signal | | | | | | | |
| e.g. trigonometry polar | | | | | | | |

| and j-notation. | | | |
|-----------------------------|--|--|--|
| 2.2 Convert a.c. signal in | | | |
| polar form to the j- | | | |
| notation. | | | |
| 2.3 Subtract, add, multiply | | | |
| and divide phasor using | | | |
| j-operator. | | | |
| 2.4 Solve simple problems | | | |
| using j-notation. | | | |
| 2.5 Draw to scale phasor | | | |
| diagrams for a.c. | | | |
| circuits. | | | |
| 2.6 Show with the aid of | | | |
| phasor diagrams that the | | | |
| current in a capacitor | | | |
| circuit leads the voltage | | | |
| and the current in the | | | |
| inductive circuit lags the | | | |
| voltage. | | | |
| 2.7 Distinguish between | | | |
| inductive and capacitive | | | |
| reactance. | | | |
| 2.8 Draw voltage and | | | |
| current wave forms on | | | |
| same axis to show | | | |
| lagging and leading | | | |
| angles. | | | |
| 2.9 Draw the phasor | | | |
| diagrams for series and | | | |
| parallel a.c. circuits. | | | |
| 2.10 Calculate voltage, | | | |
| current power and power | | | |
| factor in series and | | | |
| parallel circuits. | | | |
| 2.11 Explain series and | | | |
| parallel resource. | | | |

| 2.12 State conditions for | | | | | | |
|-------------------------------|------------------|-----------------|------------------|-------------------|--------------------------|---------|
| series and parallel | | | | | | |
| resource. | | | | | | |
| 2.13 Prove the relevant | | | | | | |
| formulae for 2.12 above | | | | | | |
| e.g. q-factor, dynamic | | | | | | |
| impedance, bandwidth, | | | | | | |
| resonance frequency. | | | | | | |
| 2.14 Sketch I and Z against | | | | | | |
| F for series and parallel | | | | | | |
| circuits where I=current, | | | | | | |
| Z= impedance, F= | | | | | | |
| frequency. | | | | | | |
| 2.15 Calculate the Q-factor | | | | | | |
| for a coil; loss factor for | | | | | | |
| a capacitor. | | | | | | |
| 2.16 Explain, with the aid of | | | | | | |
| a diagram, bandwidth. | | | | | | |
| 2.17 Solve problems | | | | | | |
| involving bandwidth and | | | | | | |
| circuit Q-factor. | | | | | | |
| GENERAL OBJECTIVES | 3: Understand Me | esh and Nodal a | nalyses and thei | r applications in | n solving electrical pro | oblems. |
| 3.1 Explain the following | | | | | | |
| terms used in electric | | | | | | |
| network: | | | | | | |
| i. Active | | | | | | |
| element/circuit e.g. | | | | | | |
| battery/circuit | | | | | | |
| containing a battery | | | | | | |
| etc. | | | | | | |
| ii. Passive | | | | | | |
| Element/circuit e.g. | | | | | | |
| resistor/a source less | | | | | | |
| circuit. | | | | | | |
| iii. Branch. | | | | | | |
| iv. Node. | | | | | | |

| v. Loop; | | | | | | |
|-----------------------------|------------------|------------------|------------------|-----------------|---------------|--|
| vi. Network. | | | | | | |
| 3.2 Explain the basic | | | | | | |
| principle of melh circuit | | | | | | |
| analysis. | | | | | | |
| 3.3 Solve problem on items | | | | | | |
| listed in 3.2 above. | | | | | | |
| 3.4 Explain the basic | | | | | | |
| principle of Nodal | | | | | | |
| analysis. | | | | | | |
| 3.5 Solve problem on 3.4 | | | | | | |
| above. | | | | | | |
| GENERAL OBJECTIVES | 4: Understand No | etwork transforn | nation and Dual | ity principles. | | |
| 4.1 Reduce a complex | | | | | | |
| network to its series or | | | | | | |
| parallel equivalent. | | | | | | |
| 4.2 Identify star and delta | | | | | | |
| networks. | | | | | | |
| 4.3 Derive the formula for | | | | | | |
| transformation of a delta | | | | | | |
| to a star network and | | | | | | |
| vice-versa. | | | | | | |
| 4.4 Solve problems on 4.3 | | | | | | |
| above. | | | | | | |
| 4.5 Explain the meaning of | | | | | | |
| Duality principle. | | | | | | |
| 4.6 Establish duality | | | | | | |
| between resistance, | | | | | | |
| conductance, in | | | | | | |
| ductance, capacitance, | | | | | | |
| voltage-current. | | | | | | |
| 4.7 Fine the dual of | | | | | | |
| network. | | | | | | |
| 4.8 Solve network problems | | | | | | |
| using duality principle | | | | | | |
| GENERAL OBJECTIVES | 5: Understand No | etwork theorems | and their applic | cations d.c and | a.c circuits. | |

| | | | |
|-----------------------------|------|--|--|
| 5.1 State Thevenin's | | | |
| Theorem. | | | |
| 5.2 Explain the basic | | | |
| principle of Thevenin's | | | |
| theorem. | | | |
| 5.3 Solve problems on | | | |
| simple networks using | | | |
| Thevenin's theorem. | | | |
| 5.4 Solve problems | | | |
| involving repeated use | | | |
| of Thevenin's theorem. | | | |
| 5.5 State Norton's Theorem. | | | |
| 5.6 Explain the basic | | | |
| principle of Norton's | | | |
| Theorem. | | | |
| 5.7 Compare Norton's | | | |
| theorem with | | | |
| Thevenin's theorem. | | | |
| 5.8 Solve problem using | | | |
| Norton's theorem. | | | |
| 5.9 State millman's | | | |
| theorem. | | | |
| 5.10Explain the basic | | | |
| principle of millman's | | | |
| theorem. | | | |
| 5.11 Solve network | | | |
| problems using | | | |
| millman's theorem. | | | |
| 5.12 State reciprocity | | | |
| theorem. | | | |
| 5.13 Explain the basic | | | |
| principle of reciprocity | | | |
| theorem. | | | |
| 5.14 Solve network | | | |
| problems using | | | |
| Reciprocity theorem. | | | |

| PROGRAMME: NATIONAL DIPLOMA IN | CODE: EEC 234 | CREDIT HRS: 75 HRS |

| COMPUTER ENGINEERING | | |
| COURSE: ELECTRONIC II | COURSES UNIT 3.0 | |
| | | |

Goal: This course is intended to enable the student acquire the basic knowledge of operation of amplifier, oscillators, switching circuits and power supplies.

GENERAL OBJECTIVES:

- 1. Understand the operation of signal amplifiers.
- 2. Understand the general principles of feedback and oscillators.
- 3. Understand and apply the principles of switching circuits.
- 4. Know the action of basic electronic logic gates.
- 5. Understand the basic circuits used in power supplies.

| Theoretical Content | | | | | | | | | |
|--|------------|-----------|--|--|--|--|--|--|--|
| GENERAL OBJECTIVES 1: Understand the operation of signal amplifiers. | | | | | | | | | |
| Specific Learning | Teacher's | Learning | | | | | | | |
| Outcomes | Activities | Resources | | | | | | | |
| 1.1 Explain different types | | | | | | | | | |
| of biasing arrangement | | | | | | | | | |
| of transistor amplifier. | | | | | | | | | |
| i. Fixed bias. | | | | | | | | | |
| ii. Collector-base bias | | | | | | | | | |
| without and with a | | | | | | | | | |
| decoupling | | | | | | | | | |
| capacitor. | | | | | | | | | |
| iii. Potential divider | | | | | | | | | |
| bias. | | | | | | | | | |
| iv. Junction FET | | | | | | | | | |
| simple bias. | | | | | | | | | |

| | | | T | |
|------------------------------|--|--|---|--|
| 1.2 Draw the circuit diagram | | | | |
| of a single stage | | | | |
| common emitter and | | | | |
| source transistor | | | | |
| amplifiers having | | | | |
| resistive load, | | | | |
| transformer and tuned | | | | |
| circuit loads. | | | | |
| 1.3 Calculate the voltage | | | | |
| and power gains of the | | | | |
| amplifiers in 1.2 above. | | | | |
| 1.4 Explain the principle of | | | | |
| operation of the circuit | | | | |
| in 1.2 above. | | | | |
| 1.5 Explain the principles | | | | |
| and methods of | | | | |
| interstage coupling: | | | | |
| i. Resistance- | | | | |
| capacitive coupling. | | | | |
| ii. Direct coupling | | | | |
| iii. Transformer | | | | |
| coupling. | | | | |
| 1.6 List the application of | | | | |
| the different coupling | | | | |
| methods. | | | | |
| 1.7 Explain with a sketch, | | | | |
| the frequency response | | | | |
| of the coupling methods | | | | |
| in 1.5. | | | | |
| 1.8 Explain the biasing | | | | |
| conditions for classes | | | | |
| A,B, AB, and C | | | | |
| amplifiers. | | | | |
| 1.9 List the main | | | | |
| applications of each type | | | | |
| of amplifier in 1.8 | | | | |
| or amplified in 1.0 | | | | |

| | | | | | T | Γ |
|------------------------------|-------------------|------------------|------------------|------------------|---|---|
| above. | | | | | | |
| 1.10Explain the operation of | | | | | | |
| simple push-pull | | | | | | |
| amplifier : | | | | | | |
| i. Transformer-coupled. | | | | | | |
| ii. Transformer less | | | | | | |
| coupling. | | | | | | |
| 1.11Determine by | | | | | | |
| experiments the | | | | | | |
| performance of | | | | | | |
| amplifiers using | | | | | | |
| different biasing | | | | | | |
| methods. | | | | | | |
| 1.12 Determine by | | | | | | |
| experiment the | | | | | | |
| gain/frequency curve of | | | | | | |
| a transistor amplifier. | | | | | | |
| GENERAL OBJECTIVES 2 | 2: Understand the | e general princi | ples of feedback | and oscillators. | | |
| 2.1 Draw the block diagram | | | | | | |
| of a basic feedback | | | | | | |
| amplifier. | | | | | | |
| 2.2 Define positive and | | | | | | |
| negative feedback in | | | | | | |
| amplifiers. | | | | | | |
| 2.3 Explain the general | | | | | | |
| expression for stage gain | | | | | | |
| of a basic feedback | | | | | | |
| amplifier. | | | | | | |
| 2.4 State the effect of | | | | | | |
| applying negative | | | | | | |
| feedback to an amplifier | | | | | | |
| in relation to: | | | | | | |
| i. Gain. | | | | | | |
| ii. Gain stability. | | | | | | |
| iii. Bandwidth. | | | | | | |
| iv. Distortion. | | | | | | |

| | | | | 1 | |
|-------------------------------|------------------|------------------|-------------------|----------------|--|
| v. Noise. | | | | | |
| vi. Input and output | | | | | |
| resistance. | | | | | |
| 2.5 Explain how oscillations | | | | | |
| can be produced by an | | | | | |
| amplifier with positive | | | | | |
| feedback. | | | | | |
| 2.6 Explain the operation of: | | | | | |
| i. R- oscillator. | | | | | |
| ii. L-C oscillator | | | | | |
| (Hartley & colpitts) | | | | | |
| 2.7 Describe methods of | | | | | |
| employing frequency | | | | | |
| stability of oscillators | | | | | |
| e.g. piezo-electric crystal | | | | | |
| control etc. | | | | | |
| 2.8 Determine by experience | | | | | |
| the effect applying in | | | | | |
| negative feedback to an | | | | | |
| amplifier in relation to | | | | | |
| the items listed in 2.4 | | | | | |
| above. | | | | | |
| 2.9 Determine by | | | | | |
| experiment the operation | | | | | |
| of: | | | | | |
| R-C oscillator | | | | | |
| L-C oscillator (Hartley | | | | | |
| and coipitts) | | | | | |
| GENERAL OBJECTIVES | 3: Understand an | d apply the prin | nciples of switch | ning circuits. | |
| 3.1 Explain the | | | | | |
| characteristics of switch. | | | | | |
| 3.2 Explain with aid of | | | | | |
| switches thee principle | | | | | |
| of operation of the | | | | | |
| following multivibrators | | | | | |
| i. Bistable. | | | | | |
| | | | | • | |

| ii. Monostable | | | | | |
|------------------------------|-------------------|--------------------|------------------|----------|------|
| iii. Astable. | | | | | |
| | . IZ | | | | |
| GENERAL OBJECTIVES 4 | : Know the action | on of basic elect | ronic logic gate | es. | |
| 4.1 Explain the operation of | | | | | |
| the following electronic | | | | | |
| logic gates using | | | | | |
| appropriate symbols and | | | | | |
| truth-table: | | | | | |
| i. The 'NOT' gate or | | | | | |
| inventers; | | | | | |
| ii. The 'AND' gate; | | | | | |
| iii. The 'OR' gate; | | | | | |
| iv. The 'AND' gate | | | | | |
| v. The 'NOR' gate | | | | | |
| GENERAL OBJECTIVES 5 | : Understand the | e basic circuits u | ised in power s | upplies. | |
| 5.1 Explain with sketches | | | | | |
| half-wave and full-wave | | | | | |
| rectification and | | | | | |
| calculate ripple factors. | | | | | |
| 5.2 Describe with diagrams | | | | | |
| the operation of a bridge | | | | | |
| rectifier. | | | | | |
| 5.3 Explain the use of the | | | | | |
| following as smoothing | | | | | |
| circuits: | | | | | |
| i. The capacitor input | | | | | |
| filter. | | | | | |
| ii. The inductance input | | | | | |
| filter. | | | | | |
| 5.4 Explain the action of a | | | | | |
| stabilized power supply | | | | | |
| using: | | | | | |
| i. Zener diode. | | | | | |
| ii. Series regulator. | | | | | |
| iii. Shunt regular. | | | | | |
| 5.5 Demonstrate by | | | | | |

| experiments: | | | |
|----------------|--|--|--|
| i. Half-wave | | | |
| rectification; | | | |
| ii. Full-wave | | | |
| rectification. | | | |

| PROGRAMME: | NATIONAL | DIPLOMA | IN | CODE: EEC 235 | CREDIT HRS: 60 HRS |

| COMPUTER ENG | INEERING | | | | |
| COURSE: ELECTION INSTRUMENTATION | | EMENT & | | COURSES UNIT 2.0 | |
| | | | | | |

Goal: This course is intended to enable the student select, connect and use electronic/electrical instruments for measurement of physical quantities.

GENERAL OBJECTIVES:

- 1. Understand the use of different types of meters for measuring power and power factor.
- 2. Understand the use of different types of bridges (a.c. and d.c.).
- 3. Understand the principle of operation of a fluxmeter and its application.
- 4. Understand the principle and use of digital instruments.
- 5. Know the various factors which should be considered when selecting an instrument.
- 6. Understand the main types of measurements and measuring instruments.

| Theoretical Content | | | | | | | |
|--|------------|-----------|--|--|--|--|--|
| GENERAL OBJECTIVES 1: Understand the use of different types of meters for measuring power and power factor. | | | | | | | |
| Specific Learning | Teacher's | Learning | | | | | |
| Outcomes | Activities | Resources | | | | | |
| 1.1 Explain the | | | | | | | |
| electrodynamics | | | | | | | |
| principles of different | | | | | | | |
| types of power | | | | | | | |
| measurement. | | | | | | | |
| 1.2 Describe the operation | | | | | | | |
| of electrodynamics | | | | | | | |
| wattmeter and power | | | | | | | |
| factor meter. | | | | | | | |
| 1.3 Explain the induction | | | | | | | |
| principle of power | | | | | | | |
| measurement. | | | | | | | |
| 1.4 Describe the induction | | | | | | | |

| | | | T | T | | T |
|-------------------------------|-------------------|-------------------|------------------|---------------------|------------|---|
| wattmeter. | | | | | | |
| 1.5 Describe the use of two | | | | | | |
| wattmeter for power | | | | | | |
| measurement in a 3 | | | | | | |
| phase circuit. | | | | | | |
| 1.6 Measure Power in: | | | | | | |
| a. Single phase circuit; | | | | | | |
| b. 3 phase circuit, using | | | | | | |
| wattmeter and p.f. | | | | | | |
| meters | | | | | | |
| GENERAL OBJECTIVES 2 | 2: Understand the | e use of differen | t types of bridg | es (a.c. and d.c.) | | |
| 2.1 Explain the term null | | | | (| | |
| indicator. | | | | | | |
| 2.2 Describe the expression | | | | | | |
| for the measurement of | | | | | | |
| an unknown resistance | | | | | | |
| by Wheatstone bridge | | | | | | |
| circuit. | | | | | | |
| 2.3 Derive the expression for | | | | | | |
| the measurement of an | | | | | | |
| unknown resistance by | | | | | | |
| Wheatstone bridge | | | | | | |
| circuit. | | | | | | |
| 2.4 Describe the Carey | | | | | | |
| Foster's slide wire | | | | | | |
| bridge. | | | | | | |
| 2.5 Explain, how a.c. bridge | | | | | | |
| can be used to measure; | | | | | | |
| i. Resistance; | | | | | | |
| ii. Inductance; | | | | | | |
| · · | | | | | | |
| iii. Capacitance; | | | | | | |
| iv. Frequency | | | | | | |
| 2.6 Measure the items listed | | | | | | |
| in 2.5 above. | De I Indonet 1 (1 | i ai 1 C | anotion - f - fl | | mliantian | |
| GENERAL OBJECTIVES 3 | : Understand the | e principle of op | eration of a flu | xilleter and its ap | pincation. | |
| 3.1 Describe the | | | | | | |

| | | | | | T. |
|-------------------------------|------------------|-----------------|-------------------|------------|----|
| constructional features of | | | | | |
| a fluxmeter. | | | | | |
| 3.2 Explain the principle of | | | | | |
| operation of a fluxmeter. | | | | | |
| 3.3 Explain the use of a | | | | | |
| fluxmeter for drawing B | | | | | |
| H curves. | | | | | |
| 3.4 Determine by | | | | | |
| experiments the B.H | | | | | |
| curves for different | | | | | |
| magnetic materials using | | | | | |
| a flux meter. | | | | | |
| GENERAL OBJECTIVES 4 | : Understand the | principle and u | se of digital ins | struments. | |
| 4.1 Explain with aid of block | | | | | |
| diagram the working | | | | | |
| principles of a digital | | | | | |
| voltmeter and ammeter. | | | | | |
| 4.2 Explain how the DVM | | | | | |
| can be used to measure: | | | | | |
| a. Voltage; | | | | | |
| b. Current; | | | | | |
| c. Resistance. | | | | | |
| 4.3 State the limitations of | | | | | |
| the DVM for measuring | | | | | |
| high frequency signals. | | | | | |
| 4.4 Explain with aid of a | | | | | |
| bock diagram, the | | | | | |
| working principle of a | | | | | |
| digital frequency meter. | | | | | |
| 4.5 State advantages of | | | | | |
| digital meters over other | | | | | |
| electromechanical | | | | | |
| measuring instruments. | | | | | |
| 4.6 Measure Voltage, current | | | | | |
| and frequency using | | | | | |
| digital instruments. | | | | | |

| GENERAL OBJECTIVES 5 | • Know the vari | ous factors which | sh should be co | nsidered when se | lecting an instrument | |
|---|-------------------|-------------------|------------------|-------------------|-----------------------|---|
| 5.1 Explain the importance | . Know the varie | ous factors write | in should be co. | iisidered when se | leeting an instrument | • |
| of the factors using the | | | | | | |
| following factors in | | | | | | |
| selecting instruments for | | | | | | |
| measurement | | | | | | |
| i. Range. | | | | | | |
| ii. Accuracy. | | | | | | |
| iii. Response. | | | | | | |
| iv. Input. | | | | | | |
| v. Stability. | | | | | | |
| vi. Operation. | | | | | | |
| vii. Reliability. | | | | | | |
| viii. Sensitivity. | | | | | | |
| GENERAL OBJECTIVES | S. Understand the | main types of | manguramants | and magguring in | etrumente | |
| 6.1 Explain instrumentation | . Understand the | e main types of | | and measuring in | struments. | |
| and its importance. | | | | | | |
| 6.2 Explain the working | | | | | | |
| | | | | | | |
| principles and uses of the following instruments: | | | | | | |
| | | | | | | |
| a. Indicating instrument; | | | | | | |
| b. Recording | | | | | | |
| instrument; | | | | | | |
| c. Controlling | | | | | | |
| instruments | | | | | | |
| 6.3 Differentiate the | | | | | | |
| instruments stated in 6.2 | | | | | | |
| | | | | | | |
| above, giving example of each. | | | | | | |
| 6.4 Calibrate each types of | | | | | | |
| instrument in 6.2 | | | | | | |
| msuument III 0.2 | | | | | | |

| PROGRAMME: NATIONAL DIPLOMA IN COMPUTER | CODE: EEC 237 | CREDIT HRS: 60 HRS |
|--|------------------|--------------------|
| ENGINEERING | | |
| COURSE: ELECTRICAL/ ELECTRONIC MAINTENANCE | COURSES UNIT 2.0 | |
| AND REPAIRS | | |
| | | |

Goal: This course is intended to provide the student with practical skills in maintenance and repairs of electrical/electronic equipment.

GENERAL OBJECTIVES:

- 1. Understand the general use of tools and testing instruments.
- 2. Understand and apply jointing soldering and desoldering techniques.
- 3. Know different circuit components
- 4. Understand the use of manufactures service manual and circuit wiring diagrams.
- 5. Know the maintenance of domestic and industrial equipment.

| Theoretical Content | | | | | | |
|---|-------------------|----------------|------------------|----------------|--|--|
| GENERAL OBJECTIVES | 1: Understand the | general use of | tools and testin | g instruments. | | |
| Specific Learning | Teacher's | Learning | | | | |
| Outcomes | Activities | Resources | | | | |
| 1.1 Identify the following | | | | | | |
| testing instrument and | | | | | | |
| tools. | | | | | | |
| i. Multi-tester; | | | | | | |
| ii. Transistor tester; | | | | | | |
| iii. Bearing extractor; | | | | | | |
| iv. Line vice; | | | | | | |
| v. Oil strength tester; | | | | | | |
| vi. Oscilloscope; | | | | | | |
| vii. Electronic voltmeter | | | | | | |
| instruments. | | | | | | |
| 1.2 Explain the uses of the | | | | | | |
| items of 1.1 | | | | | | |
| GENERAL OBJECTIVES 2: Understand and apply jointing soldering and desoldering techniques. | | | | | | |
| 2.1 Outline cabling | | | | | | |

| | | | | | 1 | |
|-----------------------------|-------------------|----------------|-------|---|---|-----|
| procedure and practice. | | | | | | |
| 2.2 Explain the following: | | | | | | |
| a. Jointing techniques; | | | | | | |
| b. Soldering techniques; | | | | | | |
| c. Crimping and | | | | | | |
| fastening method. | | | | | | |
| 2.3 Explain disordering | | | | | | |
| procedure and | | | | | | |
| techniques. | | | | | | |
| 2.4 Demonstrate the | | | | | | |
| procedure and | | | | | | |
| techniques in 2.2. | | | | | | |
| 2.5 Demonstrate the | | | | | | |
| procedure in 2.3. | | | | | | |
| 2.6 Solder simple circuits. | | | | | | |
| 2.7 Carry out joints of | | | | | | |
| different types of cables. | | | | | | |
| GENERAL OBJECTIVES | 3: Know different | circuit compor | nents | | | |
| 3.1 Identify the values of | | 1 | | | | |
| resistors and capacitors | | | | | | |
| using colour codes. | | | | | | |
| 3.2 List different types of | | | | | | |
| resistors (carbon, wire- | | | | | | |
| wound, ketal oxide etc. | | | | | | |
| and capacitors. | | | | | | |
| 3.3 Identify resistors by | | | | | | |
| their preferred values | | | | | | |
| and power rating. | | | | | | |
| 3.4 Identify capacitors by | | | | | | |
| their working voltage | | | | | | |
| and types. | | | | | | |
| 3.5 Identify the symbols of | | | | | | |
| the following common | | | | | | |
| electrical/electronic | | | | | | |
| components. | | | | | | |
| i. Transistors; | | | | | | |
| , | | 1 | | 1 | 1 | l . |

| ii. Diodes; | | | | | | |
|-------------------------------|-------------------|---------------|------------------|-------------------|--------------------|--|
| iii. Thyristors; | | | | | | |
| iv. Integrated circuit | | | | | | |
| (IC's); | | | | | | |
| v. Disc; | | | | | | |
| vi. Triac. | | | | | | |
| 3.6 Identify various types of | | | | | | |
| transformers (current, | | | | | | |
| voltage-isolation and | | | | | | |
| autotransformers). | | | | | | |
| 3.7 Explain open-circuit and | | | | | | |
| short-circuit defects in | | | | | | |
| components. | | | | | | |
| 3.8 Outline various methods | | | | | | |
| of testing components: | | | | | | |
| a. In-circuit. | | | | | | |
| b. Out of circuit. | | | | | | |
| 3.9 Wire up component to | | | | | | |
| make simple | | | | | | |
| electrical/electronic | | | | | | |
| circuits. | | | | | | |
| GENERAL OBJECTIVES | 4: Understand the | use of manufa | ctures service n | nanual and circui | t wiring diagrams. | |
| 4.1 Discuss circuit tracing. | | | | | | |
| 4.2 Outline trouble shooting | | | | | | |
| and fault isolating | | | | | | |
| techniques. | | | | | | |
| 4.3 List observation test | | | | | | |
| method: | | | | | | |
| i. Visual; | | | | | | |
| ii. Touch; | | | | | | |
| iii. Smell; | | | | | | |
| iv. Hearing. | | | | | | |
| 4.4 Explain d.c and a.c | | | | | | |
| signal testing. | | | | | | |
| 4.5 Identify the module by | | | | | | |
| measurement (voltage | | | | | | |

| and resistance test). | | | | | |
|-----------------------------|------------------|----------------|------------------|------------------|--|
| 4.6 Explain stage or module | | | | | |
| by substitution. | | | | | |
| 4.7 Identify faulty | | | | | |
| components by | | | | | |
| measurement (voltage | | | | | |
| and resistance test). | | | | | |
| Replace faulty | | | | | |
| components. | | | | | |
| GENERAL OBJECTIVES | 5: Know the main | tenance of dom | nestic and indus | trial equipment. | |
| 5.1 Explain the | | | | | |
| maintenance of | | | | | |
| batteries and battery- | | | | | |
| chargers; and acid | | | | | |
| handling. | | | | | |
| 5.2 Explain the method of | | | | | |
| trouble shooting and | | | | | |
| repair of the following | | | | | |
| household appliances: | | | | | |
| i. Electrical fans; | | | | | |
| ii. Electrical washing | | | | | |
| machines; | | | | | |
| iii. Refrigerators; | | | | | |
| iv. Air conditioners; | | | | | |
| v. Electric iron, | | | | | |
| cooker, kettle; | | | | | |
| vi. Electrical heater | | | | | |
| etc. | | | | | |
| 5.3 Explain trouble | | | | | |
| shooting and repairs | | | | | |
| of | | | | | |
| i. a.c. generator. | | | | | |
| ii. A.c. motor; | | | | | |
| iii. Electric sound | | | | | |
| system. | | | | | |
| 5.4 Explain maintenance | | | | | |

| and testing of | | | |
|------------------------|--|--|--|
| transformers. | | | |
| 5.5 Carry out the | | | |
| maintenance of the | | | |
| items mentioned in 5.2 | | | |
| to 5.4 above. | | | |

| PROGRAMME: NATIONAL DIPLOMA IN COMPUTER | CODE: EEC 242 | CREDIT HRS: 30 HRS |
|---|------------------|--------------------|
| ENGINEERING | | |
| COURSE: ELECTRICAL CIRCUIT THEORY II | COURSES UNIT 2.0 | |
| | | |

Goal: This course is intended to enable the student acquire further knowledge in electric and magnetic circuit analysis.

GENERAL OBJECTIVES:

- 1. Understand the principles of power calculation in a.c. circuits.
- 2. Understand the basic principles involved in three-phase system and their applications.
- 3. Understand and apply time domain analysis of RC, RL and RLC circuits.
- 4. Understand the magnetic coupling phenomena.

| Theoretical Content | | | | | | | | |
|--|--|--|------------|-----------|--|--|--|--|
| GENERAL OBJECTIVES 1: Understand the principles of power calculation in a.c. circuits. | | | | | | | | |
| Specific Learning | | | Teacher's | Learning | | | | |
| Outcomes | | | Activities | Resources | | | | |
| 1.1 Calculate power in A.C | | | | | | | | |
| circuit containing: | | | | | | | | |
| i. Resistance; | | | | | | | | |
| ii. Inductance; | | | | | | | | |
| iii.Capacitance; | | | | | | | | |
| iv. Combinations of | | | | | | | | |
| 1.2 Explain power factor | | | | | | | | |
| and factors affecting its | | | | | | | | |
| value. | | | | | | | | |
| 1.3 Explain the following: | | | | | | | | |
| i. Apparent power; | | | | | | | | |
| ii. Reactive power; | | | | | | | | |
| iii. Active power. | | | | | | | | |
| 1.4 Explain methods of | | | | | | | | |
| power factor correction. | | | | | | | | |
| 1.5 Solve problems on | | | | | | | | |
| power factor, active | | | | | | | | |

| | 1 | | | | | |
|--|---------------------|------------------|------------------|------------------|------------------------|----|
| power, apparent power, | | | | | | |
| reactive power and | | | | | | |
| power factor correction. | | | | | | |
| GENERAL OBJECTIVES | 2: Understand the b | pasic principles | s involved in th | ree-phase system | and their applications | S. |
| 2.1 Define polyphase | | | | | | |
| system. | | | | | | |
| 2.2 Explain the basic | | | | | | |
| different between single | | | | | | |
| phase and three-phase | | | | | | |
| systems. | | | | | | |
| | | | | | | |
| | | | | | | |
| _ | | | | | | |
| | | | | | | |
| 3-phase circuits. | | | | | | |
| 2.5 Explain how 3-phase | | | | | | |
| | | | | | | |
| | | | | | | |
| _ | | | | | | |
| - | | | | | | |
| • | | | | | | |
| 1 | | | | | | |
| - | | | | | | |
| current in a star and | | | | | | |
| delta connected | | | | | | |
| windings. | | | | | | |
| _ | | | | | | |
| | | | | | | |
| (balance and | | | | | | |
| unbalanced) | | | | | | |
| 2.9 Explain the 2-wattmeter | | | | | | |
| and single-wattmeter | | | | | | |
| | | | | | | |
| _ | | | | | | |
| 2.10 Solve problems on 2.5 | | | | | | |
| to 2.9 | | | | | | |
| 2.3 Explain the phase sequence of a three-phase system. 2.4 State the advantages of 3-phase circuits. 2.5 Explain how 3-phase emf are produced. 2.6 Distinguish between star and delta 3-phase system. 2.7 Derive the relationship between line and phase values of voltages and current in a star and delta connected windings. 2.8 Derive an expression for power in 3-phase circuit (balance and unbalanced) 2.9 Explain the 2-wattmeter and single-wattmeter methods of measuring 3-phase power. 2.10 Solve problems on 2.5 | | | | | | |

| GENERAL OBJECTIVES 3: Understand and apply time domain analysis of RC, RL and RLC circuits. | | | | | | | | |
|---|---------------------|---------------|---------------|----|--|--|--|--|
| 3.1 Explain the meaning of | | | - | | | | | |
| transients. | | | | | | | | |
| 3.2 Sketch the growth and | | | | | | | | |
| decay curves in RC | | | | | | | | |
| circuits. | | | | | | | | |
| 3.3 Derive formulae for | | | | | | | | |
| current & voltage | | | | | | | | |
| growths and decay in | | | | | | | | |
| RC ircuits. | | | | | | | | |
| 3.4 Define time constant. | | | | | | | | |
| 3.5 Explain time constant in | | | | | | | | |
| RC circuits. | | | | | | | | |
| 3.6 Derive expression for | | | | | | | | |
| the growth and decay of | | | | | | | | |
| voltage and current in | | | | | | | | |
| RL circuits. | | | | | | | | |
| 3.7 Sketch curve for growth | | | | | | | | |
| and decay of current and | | | | | | | | |
| voltage in RL circuits. | | | | | | | | |
| GENERAL OBJECTIVES | 4: Understand the i | magnetic coup | ling phenomen | a. | | | | |
| 4.1 Describe magnetic | | | | | | | | |
| coupling. | | | | | | | | |
| 4.2 Define mutual | | | | | | | | |
| inductance. | | | | | | | | |
| 4.3 Determine the polarity | | | | | | | | |
| of coupled coils. | | | | | | | | |
| 4.4 Define coefficient of | | | | | | | | |
| coupling. | | | | | | | | |
| 4.5 Define an equivalent | | | | | | | | |
| circuit for magnetically | | | | | | | | |
| coupled coils. | | | | | | | | |
| 4.6 Define an ideal | | | | | | | | |
| transformer. | | | | | | | | |
| 4.7 Use 4.5 to derive an | | | | | | | | |
| equivalent circuit of an | | | | | | | | |

| ideal transformer. | | | |
|-----------------------------|--|--|--|
| 4.8 Explain with the aid of | | | |
| sketches, an equivalent | | | |
| circuit of a practical | | | |
| transformer. | | | |

| PROGRAMME: NATIONAL DIPLOMA IN | CODE: EEC 244 | CREDIT HRS: 75 HRS |
|---------------------------------------|------------------|--------------------|
| COMPUTER ENGINEERING | | |
| COURSE: TELECOMMUNICATION ENGINEERING | COURSES UNIT 3.0 | |
| | | |

Goal: This course is intended to enable the student acquire basic knowledge of telecommunication engineering principles.

GENERAL OBJECTIVES:

- 1. Understand the basic principles of telecommunication systems.
- 2. Understand the principles of operation and application and demodulation.
- 3. Understand the basic principles of modulation and demodulation.
- 4. Know the principles of radio and black/white T.V transmission.
- 5. Understand the principles of radio and black white television receptions.
- 6. Understand the basic working principles of telephone and telegraph systems.
- 7. Know various frequency bands within the radio spectrum.
- 8. Understand the principles of electromagnetic wave radiation.
- 9. Understand the principles of radio wave propagation

| Theoretical Content | | | | | |
|-----------------------------|------------------|--------------------|-----------------|--------------------|--|
| GENERAL OBJECTIVES | 1: Understand th | ne basic principle | es of telecommu | inication systems. | |
| Specific Learning | Teacher's | Learning | | | |
| Outcomes | Activities | Resources | | | |
| 1.1 Draw the block diagram | | | | | |
| of a simple | | | | | |
| communication system | | | | | |
| showing: | | | | | |
| i. Input transducer; | | | | | |
| ii. Transmitter; | | | | | |
| iii. Transmission | | | | | |
| channel; | | | | | |
| iv. Receivers; | | | | | |
| v. Output transducer. | | | | | |
| 1.2 Explain the function of | | | | | |
| the blocks listed in 1.1 | | | | | |

| GENERAL OBJECTIVES | 2: Understand the | principles of o | peration and ap | plication and dem | odulation. | |
|------------------------------|-------------------|-----------------|-----------------|-------------------|------------|--|
| 2.1 Describe sound | | | | | | |
| transducers: | | | | | | |
| i. Microphones. | | | | | | |
| ii. Loud speaker's | | | | | | |
| application of | | | | | | |
| various. | | | | | | |
| 2.2 Explain, with the aid of | | | | | | |
| diagrams the principles | | | | | | |
| of operation and uses of: | | | | | | |
| i. Carbon microphone; | | | | | | |
| ii. Crystal microphone; | | | | | | |
| iii. Moving coil | | | | | | |
| loudspeaker; | | | | | | |
| iv. capacitor | | | | | | |
| microphone. | | | | | | |
| GENERAL OBJECTIVES | 3: Understand the | basic principle | s of modulation | n and demodulatio | n. | |
| 3.1 Explain the significance | | | | | | |
| of modulation and | | | | | | |
| demodulation in | | | | | | |
| communication systems. | | | | | | |
| 3.2 Explain the following | | | | | | |
| modulation processes: | | | | | | |
| i. Amplitude | | | | | | |
| modulation; | | | | | | |
| ii. Frequency | | | | | | |
| modulation. | | | | | | |
| 3.3 Explain the following | | | | | | |
| regarding amplitude | | | | | | |
| modulation: | | | | | | |
| i. Side frequencies; | | | | | | |
| ii. Side band; | | | | | | |
| iii. Modulation | | | | | | |
| evelope; | | | | | | |
| iv. Bandwidth. | | | | | | |
| 3.4 Solve problems | | | | | | |

| involving the following: | | | |
|----------------------------|--|--|--|
| i. Modulation index; | | | |
| ii. Bandwidth. | | | |
| 3.5 Explain the following | | | |
| terms regarding | | | |
| frequency modulation: | | | |
| i. Modulation index; | | | |
| ii. Deviation ratio; | | | |
| iii. Frequency | | | |
| deviation; | | | |
| iv. System deviation; | | | |
| v. Frequency swing. | | | |
| 3.6 Explain why F.M. has a | | | |
| wider bandwidth than | | | |
| A.M. | | | |
| 3.7 Compare the parameters | | | |
| of F.M. with A.M. | | | |
| 3.8 Solve problems | | | |
| involving 3.6 and 3.7 | | | |
| above. | | | |
| 3.9 Explain the working | | | |
| principles of amplitude | | | |
| demodulator. | | | |
| 3.10Explain the working | | | |
| principles of frequency | | | |
| demodulation. | | | |
| 3.11 Determine by | | | |
| experiments the | | | |
| amplitude modulation | | | |
| and demodulation of | | | |
| telecommunication | | | |
| system. | | | |
| 3.12 Determine by | | | |
| experiments the | | | |
| frequency modulation | | | |
| and demodulation of | | | |

| telecommunication | | | | | | |
|-----------------------------|-------------------|------------------|----------------|---------------------|----------|--|
| system | | | | | | |
| GENERAL OBJECTIVES | 4: Know the princ | iples of radio a | nd black/white | T.V transmission | | |
| 4.1 Draw block diagrams of | 1 | 1 | | | | |
| the following radio | | | | | | |
| transmitters using: | | | | | | |
| i. Amplitude | | | | | | |
| modulation; | | | | | | |
| ii. Frequency | | | | | | |
| modulation. | | | | | | |
| 4.2 Explain the function of | | | | | | |
| each block in 4.1. | | | | | | |
| 4.3 Draw the block diagram | | | | | | |
| of a television | | | | | | |
| transmitter (black & | | | | | | |
| white). | | | | | | |
| 4.4 Explain the function of | | | | | | |
| each block in 4.3 | | | | | | |
| 4.5 Explain how vision and | | | | | | |
| sound signals are | | | | | | |
| generated separately and | | | | | | |
| transmitted together. | | | | | | |
| 4.6 Perform an experiment | | | | | | |
| on superheterodyne | | | | | | |
| receiver. | | | | | | |
| GENERAL OBJECTIVES | 5: Understand the | principles of ra | dio and black | white television re | ceptions | |
| 5.1 Draw the block diagram | | • | | | • | |
| of the following radio | | | | | | |
| receivers: | | | | | | |
| i. Straight; | | | | | | |
| ii. Superheterodyne. | | | | | | |
| 5.2 Explain the function of | | | | | | |
| each block diagram in | | | | | | |
| 5.1. | | | | | | |
| 5.3 Explain the choice of | | | | | | |
| intermediate frequency | | | | | | |

| in the superheterodyne | | | | | | |
|---|-------------------|---------------|------------------|--------------------|--------------|--|
| receiver. | | | | | | |
| 5.4 Explain the following | | | | | | |
| phenomena in | | | | | | |
| superheterodyne | | | | | | |
| receiver: | | | | | | |
| i. Adjacent channel | | | | | | |
| interference; | | | | | | |
| ii. Image interference; | | | | | | |
| iii. Intermediate | | | | | | |
| frequency (I.F) | | | | | | |
| breakthrough. | | | | | | |
| 5.5 Explain the use of | | | | | | |
| double superhet to | | | | | | |
| suppress image and | | | | | | |
| adjacent channel | | | | | | |
| interferences. | | | | | | |
| 5.6 Explain the function of | | | | | | |
| the automatic gain | | | | | | |
| control (A.G.C). | | | | | | |
| 5.7 Explain with the aid of a | | | | | | |
| block diagram, the | | | | | | |
| working principle of an | | | | | | |
| F.M. radio receiver. | | | | | | |
| 5.8 Explain with the aid of a | | | | | | |
| block diagram, the | | | | | | |
| working principle of a | | | | | | |
| monochrome T.V | | | | | | |
| receiver. | | | | | | |
| GENERAL OBJECTIVES | 6: Understand the | basic working | principles of te | lephone and telegi | raph systems | |
| 6.1 Explain the working | | | | | | |
| principle of Manual | | | | | | |
| telephone systems: | | | | | | |
| i. Simple telephone | | | | | | |
| circuit; | | | | | | |
| ii. Magneto system; | | | | | | |

| iii. Central Battery | | | | | |
|------------------------------|------------------|---------------------|-------------------|--------------|--|
| signaling. | | | | | |
| 6.2 Describe the working | | | | | |
| principle of an | | | | | |
| automatic telephone | | | | | |
| system. | | | | | |
| 6.3 Explain the significance | | | | | |
| of telephone trunk | | | | | |
| system. | | | | | |
| 6.4 Explain transmission of | | | | | |
| information using more | | | | | |
| code. | | | | | |
| 6.5 Outline the working | | | | | |
| principle of simple | | | | | |
| | | | | | |
| telephone circuit. | l. Vacou venicus | fue are an are houd | | dia amaatuu | |
| GENERAL OBJECTIVES 7 | : Know various | rrequency band | is within the rac | aio spectrum | |
| 7.1 List the frequency range | | | | | |
| allocated to each of the | | | | | |
| following bands and | | | | | |
| their uses: | | | | | |
| i. (e.l.f), extremely low | | | | | |
| frequency; | | | | | |
| ii. (v.l.f) very low | | | | | |
| frequency; | | | | | |
| iii. low frequency; | | | | | |
| iv. (m.f) medium | | | | | |
| frequency; | | | | | |
| v. (h.f.) high | | | | | |
| frequency; | | | | | |
| vi. (v.h.f) very high | | | | | |
| frequency; | | | | | |
| vii. (u.h.f.) ultra high | | | | | |
| frequency | | | | | |
| viii. (s.h.f.) super high | | | | | |
| frequency; | | | | | |
| ix. (e.h.f.) extremely | | | | | |

| high frequency. | | | | | | |
|-------------------------------|--------------------------|------------------|----------------|----------------|-----|-----|
| GENERAL OBJECTIVES | 8: Understand the | principles of el | lectromagnetic | wave radiation | | |
| 8.1 Explain the function of | | | | | | |
| an aerial as a radiator; | | | | | | |
| 8.2 Know the current and | | | | | | |
| voltage distribution of | | | | | | |
| dipole; | | | | | | |
| 8.3 Explain aerial | | | | | | |
| impedance and radiation | | | | | | |
| resistance; | | | | | | |
| 8.4 Define an isotropic | | | | | | |
| radiator; | | | | | | |
| 8.5 Define the gain of an | | | | | | |
| aerial. | | | | | | |
| 8.6 Define the beam width | | | | | | |
| of an aerial. | | | | | | |
| 8.7 Sketch the polar diagram | | | | | | |
| or the radiation patterns | | | | | | |
| of a horizontal and | | | | | | |
| vertical dipole. | | | | | | |
| 8.8 Identify various types of | | | | | | |
| aerials e.g. Yagi, | | | | | | |
| Rhombic etc. | | | | | | |
| 8.9 Sketch Yagi and | | | | | | |
| rhombic aerials. | | | | | | |
| 8.10 Explain the effect of | | | | | | |
| frequency on aerial | | | | | | |
| dimensions and | | | | | | |
| performance. | | | | | | |
| 8.11 Determine by | | | | | | |
| experiment the | | | | | | |
| parameters of an aerial. | | | • | .• | | |
| GENERAL OBJECTIVES | 9: Understand the | principles of ra | idio wave prop | agation. | l e | l e |
| 9.1 Explain the following | | | | | | |
| terms in relation to | | | | | | |
| wave propagation: | | | | | | |

| i. Ground waves; | | | |
|----------------------------|--|--|--|
| ii. Sky waves; | | | |
| iii. Space waves. | | | |
| 9.2 Explain the existence | | | |
| and usefulness of the | | | |
| troposphere; | | | |
| 9.3 Explain the effects of | | | |
| the troposphere on | | | |
| propagation below | | | |
| 30MHz. | | | |
| 9.4 Explain the various | | | |
| layers of the ionosphere | | | |
| such as: | | | |
| i. The d-layer; | | | |
| ii. The e-layer; | | | |
| iii. The p-layer. | | | |
| 9.5 Explain critical and | | | |
| maximum usable | | | |
| frequency. | | | |
| 9.6 Explain optimum | | | |
| working frequency. | | | |
| 9.7 Solve problems | | | |
| involving wave | | | |
| propagation. | | | |

| PROGRAMME: NATIONAL DIPLOMA IN COMPUTER ENGINEERING | CODE: COM III | CREDIT HRS: 30 HRS (2/0/0/WEEK) |
|---|------------------|------------------------------------|
| COURSE: INTRODUCTION TO COMPUTERS | COURSES UNIT 2.0 | |
| | | |

Goal: To acquaint the students with equipments used for electronic data processing

GENERAL OBJECTIVES:

- 10. Outline the role of the computer in modern society.
- 11. Understand computer Hardware configuration.
- 12. Know the concept of some software.
- 13. Know various type of computer data processing system.
- 14. Understand the basic principles of transmission.
- 15. Know number system.
- 16. Understand the concept of algorithm and flow charting.

| Theoretical Content | | | | | |
|----------------------------|---------------------|-----------------|-----------------|---------|--|
| GENERAL OBJECTIVES | 1: Outline the role | e of the comput | er in modern so | ociety. | |
| Specific Learning | Teacher's | Learning | | | |
| Outcomes | Activities | Resources | | | |
| Historical Background | | | | | |
| 1.1 Define the computer | | | | | |
| 1.2 Describe the | | | | | |
| development of | | | | | |
| computer in particular, | | | | | |
| Abacus, Pascal, | | | | | |
| Babbage, Hollerith and | | | | | |
| the ENIAC. | | | | | |
| Classification of | | | | | |
| Computers | | | | | |
| 1.3 Classify computer | | | | | |

| according to generation from 1 st to 5 th generations (and any subsequent generations) 1.4 Distinguish between analog, digital and hybrid computers Computers and society 1.5 Explain the social implications of computers on society, in particular privacies and quality of life. |
|--|
| generations (and any subsequent generations) 1.4 Distinguish between analog, digital and hybrid computers Computers and society 1.5 Explain the social implications of computers on society, in particular privacies |
| subsequent generations) 1.4 Distinguish between analog, digital and hybrid computers Computers and society 1.5 Explain the social implications of computers on society, in particular privacies |
| 1.4 Distinguish between analog, digital and hybrid computers Computers and society 1.5 Explain the social implications of computers on society, in particular privacies |
| analog, digital and hybrid computers Computers and society 1.5 Explain the social implications of computers on society, in particular privacies |
| hybrid computers Computers and society 1.5 Explain the social implications of computers on society, in particular privacies |
| Computers and society 1.5 Explain the social implications of computers on society, in particular privacies |
| 1.5 Explain the social implications of computers on society, in particular privacies |
| implications of computers on society, in particular privacies |
| computers on society, in particular privacies |
| in particular privacies |
| |
| and quality of life. |
| |
| 1.6 List the benefits of |
| computers to the society |
| GENERAL OBJECTIVES 2: Understand computer Hardware configuration. |
| Hardware configuration |
| 2.1 Describe computer |
| hardware configuration. |
| 2.2 List some input units. |
| 2.3 Describe the function of |
| the output units. |
| 2.4 Describe the function of |
| C.P.U |
| 2.5 List some auxiliary units |
| 2.6 Describe the functions |
| of the auxiliary memory |
| 2.7 Define bits, nibbles, |
| bytes, word, storage size |
| in terms of K. |
| GENERAL OBJECTIVES 3: Know the concept of some software. |
| Concept of Software |
| 3.1 Distinguish between the |
| low-level and high-level |
| languages. |
| 3.2 Explain source and |

| object programs | | | | | |
|-----------------------------|-------------------------|-----------------|-------------------|-------------|--|
| 3.3 Define a translator. | | | | | |
| 3.4 Describe types of | | | | | |
| translators; assembler; | | | | | |
| compiler; interpreter. | | | | | |
| 3.5 Explain the use of | | | | | |
| package programs. | | | | | |
| GENERAL OBJECTIVES | 4: Know various t | ype of compute | er data processi | ing system. | |
| Types of Computer data | | | | | |
| processing systems. | | | | | |
| 4.1 Define Batch | | | | | |
| processing, Real time, | | | | | |
| processing, Time | | | | | |
| sharing and distributed | | | | | |
| processing. | | | | | |
| 4.2 Differentiate between | | | | | |
| Batch processing, Real | | | | | |
| Time processing, Time | | | | | |
| Sharing and distributed | | | | | |
| Processing systems. | | | | | |
| GENERAL OBJECTIVES | 5: Understand the | basic principle | s of transmission | on. | |
| Principles of Data | | | | | |
| Transmission | | | | | |
| 5.1 Define Data | | | | | |
| Transmission. | | | | | |
| 5.2 Explain the term | | | | | |
| Telecommunications. | | | | | |
| 5.3 State different methods | | | | | |
| of data transmission. | | | | | |
| 5.4 List Data Transmission | | | | | |
| speeds. | | | | | |
| GENERAL OBJECTIVES | 6: Know number s | system | | | |
| Number Systems | | | | | |
| 6.1 Describe binary, octal, | | | | | |
| decimal and | | | | | |
| hexadecimal number | | | | | |

| system. | | | | | |
|---------------------------|-------------------|-----------------|-----------------|-------------|--|
| 6.2 Convert from one | | | | | |
| number system to | | | | | |
| another e.g. decimal to | | | | | |
| binary. | | | | | |
| GENERAL OBJECTIVES | 7: Understand the | concept of algo | orithm and flov | v charting. | |
| Algorithms and flow | | | | | |
| chatting | | | | | |
| 7.1 Define algorithms on | | | | | |
| very general basis. | | | | | |
| 7.2 Describe all ANSI | | | | | |
| flowcharts as descriptive | | | | | |
| algorithms. | | | | | |

| PROGRAMME: NATIONAL DIPLOMA IN COMPUTER ENGINEERING TECHNOLOGY | CODE: COM I22 | CREDIT HRS: 75 HRS (2/3/0/WEEK) |
|--|------------------|------------------------------------|
| COURSE: COMPUTER OPERATIONS | COURSES UNIT 3.0 | |
| | | |

Goal: To provide the student with working knowledge of the operations of computer systems.

GENERAL OBJECTIVES:

- 1.0 Know the organizational structure of a data processing department.
- 2.0 Know the procedures of computer operations
- 3.0 Know the various types of data preparation methods and items of equipment used.
- 4.0 Know the importance of security within the computer environment.
- 5.0 Understand external file library structure.

| Theoretical Content | Theoretical Content | | | | | | | |
|--|---------------------|------------------|-----------------|--|--|--|--|--|
| GENERAL OBJECTIVES 1: Know the organizational structure of a data processing department. | | | | | | | | |
| Specific Learning | Teacher's | ncher's Learning | | | | | | |
| Outcomes | Activities | Resources | | | | | | |
| Organizational structure | | | | | | | | |
| of a DP Department. | | | | | | | | |
| 1.1 Describe the | | | | | | | | |
| organizational structure | | | | | | | | |
| of a data processing | | | | | | | | |
| department. | | | | | | | | |
| 1.2 Describe the functions | | | | | | | | |
| of the various personnel | | | | | | | | |
| in a data processing | | | | | | | | |
| department. | | | | | | | | |
| GENERAL OBJECTIVES | 2: Know the proc | edures of comp | uter operations | | | | | |
| Procedures of Computer | | | | | | | | |
| Operations | | | | | | | | |
| 2.1 Describe the principles | | | | | | | | |
| and procedure of | | | | | | | | |

| operating the computer system (fix up start-up and shut down system). 2.2 Identify the operating system environment as single-user, multi-user. | | | | | | |
|--|-------------------------|-------------------|------------------|------------------|--------------------|--|
| and shut down system). 2.2 Identify the operating system environment as | | | | | | |
| 2.2 Identify the operating system environment as | | 1 | | | | |
| system environment as | | | | | | |
| • | | | | | | |
| single-user, multi-user. | | | | | | |
| | | | | | | |
| 2.3 Identify the functions of | | | | | | |
| the constituents of | | | | | | |
| operating systems. | | | | | | |
| 2.4 Explain operator system | | | | | | |
| commands. | | | | | | |
| 2.5 Describe the functions | | | | | | |
| and operations of a | | | | | | |
| master console. | | | | | | |
| 2.6 Describe initialization | | | | | | |
| and formatting of | | | | | | |
| storage devices disks, | | | | | | |
| tapes, diskettes etc. | | | | | | |
| GENERAL OBJECTIVES | 3: Know the vario | ous types of data | a preparation m | ethods and items | of equipment used. | |
| Types of Data Preparation | | | | | | |
| Methods | | | | | | |
| 3.1 Apply the techniques of | | | | | | |
| capturing data in off line | | | | | | |
| mode. | | | | | | |
| 3.2 Perform data | | | | | | |
| verification. | | | | | | |
| | | | | | | |
| 3.3 Explain data | | | | | | |
| 3.3 Explain data transmission methods. | | | | | | |
| * | | | | | | |
| transmission methods. | | | | | | |
| transmission methods. 3.4 Identify the items of equipment used 3.1 to 3.3 | | | | | | |
| transmission methods. 3.4 Identify the items of equipment used 3.1 to 3.3 GENERAL OBJECTIVES | 4: Know the impo | ortance of secur | ity within the c | omputer environm | ent. | |
| transmission methods. 3.4 Identify the items of equipment used 3.1 to 3.3 GENERAL OBJECTIVES Security of the | 4: Know the impo | ortance of secur | ity within the c | omputer environm | ent. | |
| transmission methods. 3.4 Identify the items of equipment used 3.1 to 3.3 GENERAL OBJECTIVES Security of the Environment | 4: Know the impo | ortance of secur | ity within the c | omputer environm | nent. | |
| transmission methods. 3.4 Identify the items of equipment used 3.1 to 3.3 GENERAL OBJECTIVES Security of the | 4: Know the impo | ortance of secur | ity within the c | omputer environm | ent. | |
| 3.2 Perform data verification. | | | | | | |

| 4.2 Identify and explain | | | | | |
|-------------------------------|--------------------|-------------------|--------------|--|--|
| standard environment | | | | | |
| operating procedures of | | | | | |
| computer installations. | | | | | |
| 4.3 Explain the need for | | | | | |
| computer room. | | | | | |
| 4.4 Identify and describe | | | | | |
| computer systems | | | | | |
| auditing. | | | | | |
| Safety Procedures | | | | | |
| 4.5 Explain prevailing | | | | | |
| safety regulations in | | | | | |
| computer installation. | | | | | |
| 4.6 Describe methods of | | | | | |
| preventing hazards (fire, | | | | | |
| flooding, sabotage etc). | | | | | |
| 4.7 Describe file security | | | | | |
| methods in computer | | | | | |
| installations. | | | | | |
| 4.8 Explain the need for file | | | | | |
| security in computer | | | | | |
| installations. | | | | | |
| 4.9 Explain the user | | | | | |
| passwords and user | | | | | |
| names. | | | | | |
| GENERAL OBJECTIVES : | 5: Understand exte | ernal file librar | y structure. | | |
| External File Library | | | | | |
| Structure | | | | | |
| 5.1 Describe the need for | | | | | |
| libraries in computer | | | | | |
| installations. | | | | | |
| 5.2 Describe a model library | | | | | |
| structure. | | | | | |
| 5.3 Explain the need for | | | | | |
| user identification | | | | | |
| procedure within an | | | | | |

| installation. | | | |
|---------------|--|--|--|
| | | | |

| PROGRAMME: NATIONAL DIPLOMA IN COMPUTER ENGINEERING TECHNOLOGY | CODE: COM 221 | CREDIT HRS: 75 HRS (2/3/0/WEEK) |
|--|------------------|------------------------------------|
| COURSE: COMPUTER PROGRAMMING (FORTRAN) | COURSES UNIT 3.0 | |
| | | |

Goal: The course is designed to enable the student to develop efficient, reliable computer programming in FORTRAN.

GENERAL OBJECTIVES:

- 1.0 Know the basic building block of FORTRAN and the rules for using these.
- 2.0 Know how to control the execution of a program.
- 3.0 Know the other building blocks of FORTRAN.
- 4.0 Know some more advanced FORTRAN statements.
- 5.0 Adopt good style of programming

| Theoretical Content | Theoretical Content | | | | | | | |
|---|---------------------|-----------|--|--|--|--|--|--|
| GENERAL OBJECTIVES 1: Know the basic building block of FORTRAN and the rules for using these. | | | | | | | | |
| Specific Learning | Teacher's | Learning | | | | | | |
| Outcomes | Activities | Resources | | | | | | |
| Building blocks of | | | | | | | | |
| FORTRAN | | | | | | | | |
| 1.1 State the character set of | | | | | | | | |
| FORTRAN. | | | | | | | | |
| 1.2 Define constants and | | | | | | | | |
| variables in FORTRAN. | | | | | | | | |
| 1.3 Describe the different | | | | | | | | |
| types of constants and | | | | | | | | |
| variables in FORTRAN. | | | | | | | | |
| 1.4 Describe the FORTRAN | | | | | | | | |
| coding form. | | | | | | | | |

| | | | | | T . |
|-------------------------------|------------------|------------------|------------------|------|-----|
| 1.5 Identify the general | | | | | |
| structure of a | | | | | |
| FORTRAN statement. | | | | | |
| 1.6 Write assignment | | | | | |
| statements. | | | | | |
| 1.7 State the precedence of | | | | | |
| arithmetic operations in | | | | | |
| FORTRAN. | | | | | |
| 1.8 Explain arithmetic | | | | | |
| functions in different | | | | | |
| operation modes. | | | | | |
| 1.9 Explain logical | | | | | |
| arithmetic with | | | | | |
| FORTRAN. | | | | | |
| 1.10 Distinguish between | | | | | |
| logical if and Arithmetic | | | | | |
| If statement. | | | | | |
| 1.11Describe the general | | | | | |
| form of FORTRAN | | | | | |
| statement. | | | | | |
| 1.12Write input statements | | | | | |
| READ/FORMAT. | | | | | |
| 1.13Write output statement | | | | | |
| WRITE/FORMAT. | | | | | |
| 1.14Explain the use of stop | | | | | |
| and END statements. | | | | | |
| 1.15Write sample | | | | | |
| FORTRAN programs | | | | | |
| using coding forms. | | | | | |
| GENERAL OBJECTIVES | 2: Know how to c | ontrol the execu | ution of a progr | ram. | |
| Execution of a program | | | | | |
| 2.1 Identify the basic | | | | | |
| control execution of a | | | | | |
| program, statements: | | | | | |
| STOP, PAUSE, GOTO | | | | | |
| and the computed | | | | | |

| GOTO, the IF | | | | | |
|------------------------------|-------------------|-----------------|--------------|--------|--|
| statement, and | | | | | |
| execution of a program | | | | | |
| using the | | | | | |
| DO/CONTINUE | | | | | |
| statements. | | | | | |
| 2.2 Control the execution of | | | | | |
| a program using the | | | | | |
| DO/CONTINUE | | | | | |
| statements. | | | | | |
| 2.3 Explain the nesting of | | | | | |
| DO S and the implied | | | | | |
| DO statement. | | | | | |
| 2.4 Explain the concept of | | | | | |
| subscripted variables, | | | | | |
| the use of arrays and the | | | | | |
| DIMENSION statement. | | | | | |
| GENERAL OBJECTIVES | 3: Know the other | building block | s of FORTRAI | N. | |
| Other Building Blocks | | | | | |
| 3.1 Identify the FORTRAN | | | | | |
| library blocks of | | | | | |
| FORTRAN functions. | | | | | |
| 3.2 Build and use | | | | | |
| FORTRAN subprogram | | | | | |
| functions subroutines. | | | | | |
| 3.3 Describe the use of | | | | | |
| statement functions. | | | | | |
| GENERAL OBJECTIVES | 4: Know some mo | ore advanced FO | ORTRAN state | ments. | |
| Advance FORTRAN | | | | | |
| statements | | | | | |
| 4.1 Control program | | | | | |
| execution using the, | | | | | |
| STOP, PAUSE, CALL | | | | | |
| AND EXIT statements. | | | | | |
| 4.2 Carry out advance data | | | | | |
| handling in programs by | | | | | |

| means of implicitly, | | | | | |
|------------------------------|-------------------|----------------|-------|--|--|
| DATA LIST, | | | | | |
| COMMON BLOCK and | | | | | |
| Equivalence statements. | | | | | |
| 4.3 Using debug facility | | | | | |
| statement. | | | | | |
| GENERAL OBJECTIVES : | 5: Adopt good sty | le of programm | ning. | | |
| Style of Programming | | | | | |
| 5.1 Explain the "harmful | | | | | |
| effects" of GOTO. | | | | | |
| 5.2 Draw structure | | | | | |
| Flowcharts. | | | | | |
| 5.3 Describe the solution to | | | | | |
| a problem using pseudo- | | | | | |
| code. | | | | | |
| 5.4 Document a programme | | | | | |
| using HIPO Code. | | | | | |

| PROGRAMME: NATIONAL DIPLOMA IN COMPUTER | CODE: CTE 212 | CREDIT HRS: 30 HRS |
|---|------------------|--------------------|
| ENGINEERING TECHNOLOGY | | (2/0/0/WEEK) |
| COURSE: DIGITAL COMPUTER FUNDAMENTAL I | COURSES UNIT 2.0 | |
| | | |

Goal: This course is intended to provide the student with the knowledge of the principles of Boolean Algebra in the operations and applications of logic devices.

GENERAL OBJECTIVES:

- 1.0 Understand the concept of data and information presentation in digital system.
- 2.0 Understand the different codes used in digital system.
- 3.0 Know the fundamentals of Boolean Algebra.
- 4.0 Understand the various methods of minimization required to simplify digital combinational circuits.
- 5.0 Understand basic digital functions.

| Theoretical Content | Theoretical Content | | | | | | |
|--|---------------------|-----------|--|--|--|--|--|
| GENERAL OBJECTIVES 1: Understand the concept of data and information presentation in digital system. | | | | | | | |
| Specific Learning | Teacher's | Learning | | | | | |
| Outcomes | Activities | Resources | | | | | |
| Number System and Code | | | | | | | |
| 1.1 Define digits of a | | | | | | | |
| number. | | | | | | | |
| 1.2 Explain the base of a | | | | | | | |
| number. | | | | | | | |
| 1.3 List the number of | | | | | | | |
| digits of figures | | | | | | | |
| available in various | | | | | | | |
| number systems: Base | | | | | | | |
| 10, Base 8, Base 2, | | | | | | | |
| Base 16. | | | | | | | |
| 1.4 Outline the significance | | | | | | | |
| of weighting of digits in | | | | | | | |
| a number system. | | | | | | | |

| | | | | I | | T | |
|------|-------------------------|-------------------|-----------------|-------------------|---------|---|---|
| 1.5 | Convert other number | | | | | | |
| | system to decimal and | | | | | | |
| | vice-versa. | | | | | | |
| 1.6 | Explain why binary | | | | | | |
| | number system is used | | | | | | |
| | in digital system. | | | | | | |
| 1.7 | State the special | | | | | | |
| | relationship between | | | | | | |
| | binary, octal and | | | | | | |
| | hexadecimal. | | | | | | |
| 1.8 | Explain the advantages | | | | | | |
| | of octal and | | | | | | |
| | hexadecimal over the | | | | | | |
| | binary data. | | | | | | |
| 1.9 | Describe the various | | | | | | |
| | binary based codes: | | | | | | |
| | BCD Code, Excess -3 | | | | | | |
| | code, Gray code, ASCII | | | | | | |
| | code and Seven- | | | | | | |
| | Segment display code. | | | | | | |
| 1.10 | OPerform exercise in | | | | | | |
| | problems involving the | | | | | | |
| | conversion from one | | | | | | |
| | number system to | | | | | | |
| | another. | | | | | | |
| GE | NERAL OBJECTIVES | 2: Understand the | different codes | s used in digital | system. | | |
| Bin | ary Arithmetic | | | | | | |
| 2.1 | Explain the following | | | | | | |
| | binary operation, | | | | | | |
| | additions, subtraction, | | | | | | |
| | multiplication and | | | | | | |
| | division. | | | | | | |
| 2.2 | Explain signed binary | | | | | | |
| | number system. | | | | | | |
| 2.3 | Explain the difference | | | | | | |
| | between the | | | | | | |
| • | | | | • | • | | • |

| representation of | | | | | | |
|------------------------------|-------------------|----------------|-----------------|----------------------|------------------------|-------------------|
| positive and negative | | | | | | |
| numbers. | | | | | | |
| 2.4 Define N's complement | | | | | | |
| where N is any number. | | | | | | |
| 2.5 Perform addition and | | | | | | |
| subtraction using 1's | | | | | | |
| complement. | | | | | | |
| 2.6 Explain the limitation | | | | | | |
| of 1's complement. | | | | | | |
| 2.7 Explain 2's | | | | | | |
| complement. | | | | | | |
| 2.8 Perform addition and | | | | | | |
| subtraction using 2's | | | | | | |
| complement. | | | | | | |
| 2.9 Identify fixed point and | | | | | | |
| floating point numbers. | | | | | | |
| 2.10 Explain the mantissa | | | | | | |
| and characteristic of a | | | | | | |
| floating point number. | | | | | | |
| 2.11 Solve problems | | | | | | |
| involving number | | | | | | |
| systems. | | | | | | |
| 2.12 demonstrate practically | | | | | | |
| the binary operation in | | | | | | |
| 2.11 above. | | | | | | |
| GENERAL OBJECTIVES | 3. Understand the | various method | ds of minimizat | tion required to sir | nnlify digital combin | ational circuits |
| Minimization Procedures | 5. Onderstand the | various memoc | is of minimizat | lon required to sin | ilpiniy digital comoni | ational circuits. |
| 3.1 Explain Venn's | | | | | | |
| diagram. | | | | | | |
| 3.2 Use the Venn's | | | | | | |
| diagram to explain: | | | | | | |
| i. Union of a set. | | | | | | |
| ii. Intersection of a set | | | | | | |
| iii.Universal sets | | | | | | |
| | | | | | | |
| iv. Complement of a set | | | | | | |

| | | | |
|-----------------------------|------|--|--|
| 3.4 Apply venn's diagram | | | |
| to simplify Boolean | | | |
| expression. | | | |
| 3.5 Use Duality of a | | | |
| switching function to | | | |
| prove identities. | | | |
| 3.6 Explain the | | | |
| complement of | | | |
| function. | | | |
| 3.7 Solve problems by | | | |
| finding the complement | | | |
| of various functions | | | |
| using duality-method. | | | |
| 3.8 Explain the principles | | | |
| of karnaugh map. | | | |
| 3.9 Draw karnaugh map for | | | |
| two three and four | | | |
| variables. | | | |
| 3.10State the advantages of | | | |
| Karnaugh map | | | |
| | | | |
| techniques for | | | |
| simplification of | | | |
| Boolean Algebra. | | | |
| 3.11State Boolean Algebra | | | |
| postulations for: AND, | | | |
| OR, and NOT | | | |
| junctions. | | | |
| 3.12Sketch logic diagram | | | |
| that implement the | | | |
| simplified logic | | | |
| expression in 3.11 | | | |
| above using 'AND' | | | |
| 'OR' and 'NOT' gates | | | |
| 3.13Implement the circuit | | | |
| of 3.12 above using | | | |
| gates: AND and OR | | | |

| 3.14Reduce a given | | | | | |
|-----------------------------|-------------------|-------------------|------------------|----------|-----|
| Boolean equation | | | | | |
| having up to four | | | | | |
| variables to its simplest | | | | | |
| form. | | | | | |
| 3.15Explain the importance | | | | | |
| of minimization in | | | | | |
| digital system design. | | | | | |
| GENERAL OBJECTIVES | 4. Know the fund: | amentals of Ro | olean Algebra | | |
| Boolean Algebra | ** Ithow the rund | inicitals of Boo | Jiedii 7 iigee1u | | |
| 4.1 define the inverse | | | | | |
| operation of Boolean | | | | | |
| Algebra and the or | | | | | |
| operation. | | | | | |
| 4.2 State the Boolean | | | | | |
| postulates: The | | | | | |
| commutative laws, | | | | | |
| Associative laws, | | | | | |
| Identity laws, | | | | | |
| Distributive laws, | | | | | |
| Negation law and De | | | | | |
| Morgan's theorem. | | | | | |
| 4.3 Define the truth table. | | | | | |
| 4.4 Construct a truth table | | | | | |
| for up to 4 variables. | | | | | |
| 4.5 Form logic expression | | | | | |
| from statement of | | | | | |
| conditions. | | | | | |
| 4.6 Define a Karnaugh | | | | | |
| map (K-map). | | | | | |
| GENERAL OBJECTIVES : | 5: Understand has | ic digital functi | ons | | |
| Logic Functions | J. Onderstand bas | ie digitai raneti | ons. | | |
| 5.1 Explain how YES/NO, | | | | | |
| TRUE/FALSE, ON/OF | | | | | |
| can be coded by '1' and | | | | | |
| '0' | | | | | |
| U | 1 | | | <u> </u> | l . |

| 5.2 | Draw logic gate | | | |
|-----|-----------------------|--|--|--|
| | symbols to represent | | | |
| | AND, OR, NOT | | | |
| | NAND and NOR. | | | |
| 5.3 | Explain the operation | | | |
| | pf AND, OR and NOT | | | |
| | using truth table and | | | |
| | logic gates. | | | |
| 5.4 | Solve problems | | | |
| | involving basic logic | | | |
| | functions. | | | |

| PROGRAMME: NATIONAL DIPLOMA IN COMPUTER | CODE: CTE 211 | CREDIT HRS: 75 HRS |

| ENGINEERING TECHNOLOGY | | (2/3/0/WEEK) |
| COURSE: MICROCOMPUTER FUNDAMENTALS | COURSES UNIT 3.0 | |
| | | |

Goal: This course is intended to provide the student with the knowledge of Microcomputer Fundamentals

GENERAL OBJECTIVES:

- 1.0 Know the processor and the component parts.
- 2.0 Understand the basic digital computer architecture.
- 3.0 Know the operation of the digital computer system.
- 4.0 Understand the preparation and handling of components of computer systems.
- 5.0 Understand the interconnections between the blocks of a computer.
- 6.0 Know the peripherals interface.
- 7.0 Know the various point devices.
- 8.0 Know the different types of modems and their uses.
- 9.0 Understand the multi-user environment

| Theoretical Content | Theoretical Content | | | | | | |
|---|---|-----------|--|--|--|--|--|
| GENERAL OBJECTIVES 1: Know the processor and the component parts. | | | | | | | |
| Specific Learning | Teacher's | Learning | | | | | |
| Outcomes | Activities | Resources | | | | | |
| 1.1 Explain the | | | | | | | |
| microprocessor. | | | | | | | |
| 1.2 Explain the central | | | | | | | |
| processing unit (CPU). | | | | | | | |
| 1.3 Draw a block diagram | | | | | | | |
| of a typical | | | | | | | |
| microprocessor and | | | | | | | |
| explain the function of | | | | | | | |
| each component part. | | | | | | | |
| GENERAL OBJECTIVES | GENERAL OBJECTIVES 2: Understand the basic digital computer architecture. | | | | | | |
| 2.1 Identify various blocks | _ | | | | | | |

| | | | | 1 | T | T |
|-----------------------------|--------------------------|------------------|-----------------|-------------------|----------------|-----|
| for making up the | | | | | | |
| computer i.e: | | | | | | |
| a). I.O Devices | | | | | | |
| (monitor, printer, | | | | | | |
| keyboards etc) | | | | | | |
| b). Storage | | | | | | |
| devices/memories | | | | | | |
| c). Control units | | | | | | |
| d). Power supplies: | | | | | | |
| internal and | | | | | | |
| external-UPS, AVR | | | | | | |
| GENERAL OBJECTIVES | 3: Know the opera | tion of the digi | tal computer sy | ystem. | | |
| 3.1 Explain the operation | • | | | | | |
| and functions of the | | | | | | |
| following: I.O devices, | | | | | | |
| C.P.U, Storage devices, | | | | | | |
| Controls, and Power | | | | | | |
| supplies i.e. internal | | | | | | |
| and external AVR & | | | | | | |
| UPS | | | | | | |
| GENERAL OBJECTIVES | 4: Understand the | preparation and | d handling of c | omponents of com | puter systems. | |
| 4.1 explain the preparation | | 1 | | | | |
| and handling of storage | | | | | | |
| devices. | | | | | | |
| 4.2 Explain the importance | | | | | | |
| of control unit. | | | | | | |
| GENERAL OBJECTIVES | 5: Understand the | interconnection | ns between the | blocks of a compu | iter. | |
| 5.1 Draw the linkages | | | | • | | |
| between the various | | | | | | |
| blocks of a computer. | | | | | | |
| 5.2 Explain the sequence | | | | | | |
| of transmission of | | | | | | |
| information between | | | | | | |
| the various blocks. | | | | | | |
| 5.3 Describe the various | | | | | | |
| parts connection (serial, | | | | | | |
| parts connection (serial, | 1 | | | l . | l . | l . |

| | T | | | Т | T | Т | | |
|---|--------------------|------------------|----------------|---------|---|---|--|--|
| parallel) | | | | | | | | |
| GENERAL OBJECTIVES 6: Know the peripherals interface. | | | | | | | | |
| 6.1 Explain various | | | | | | | | |
| general interface and | | | | | | | | |
| the principles of I/O | | | | | | | | |
| interface. | | | | | | | | |
| 6.2 Explain various | | | | | | | | |
| interfacing techniques. | | | | | | | | |
| GENERAL OBJECTIVES | 7: Know the vario | us point device | es. | | | | | |
| 7.1 Describe the various | | • | | | | | | |
| forms of pointing | | | | | | | | |
| devices (mouse, the | | | | | | | | |
| track ball, lighten etc.) | | | | | | | | |
| 7.2 Carry out simple | | | | | | | | |
| maintenance on the | | | | | | | | |
| pointing devices. | | | | | | | | |
| GENERAL OBJECTIVES | 8: Know the differ | rent types of me | odems and thei | r uses. | | | | |
| 8.1 Identify the various | | | | | | | | |
| modems with | | | | | | | | |
| transmission speeds | | | | | | | | |
| without repeaters. | | | | | | | | |
| GENERAL OBJECTIVES | 9: Understand the | multi-user env | ironment. | | | | | |
| 9.1 Connect simple multi- | | | | | | | | |
| user systems without | | | | | | | | |
| repeater stations. | | | | | | | | |
| | - | | | | | | | |

| COURSE: COMPUTER WORKSHOP PRACTICE I | COURSES UNIT 1.0 | (0.00.00.00.00.00.00.00.00.00.00.00.00.0 |
| | | |

Goal: This course is intended to enable the students to have the knowledge of the various components of the computer system assemble and install the system.

GENERAL OBJECTIVES:

- 1.0 Know the various components of the computer system.
- 2.0 The use of installation/maintenance manual.
- 3.0 Know preventive maintenance.
- 4.0 Assemble and install a computer system

| Theoretical Content | | | | | | | | |
|---|------------|-----------|--|--|--|--|--|--|
| GENERAL OBJECTIVES 1: Know the various components of the computer system. | | | | | | | | |
| Specific Learning | Teacher's | Learning | | | | | | |
| Outcomes | Activities | Resources | | | | | | |
| 1.1 Identify the system unit, | | | | | | | | |
| monitor, mouse, | | | | | | | | |
| scanner, printer, plotter | | | | | | | | |
| etc. | | | | | | | | |
| 1.2 Identify the various | | | | | | | | |
| components of the | | | | | | | | |
| system unit such as: | | | | | | | | |
| ✓ Motherboards | | | | | | | | |
| ✓ CPU | | | | | | | | |
| ✓ CPU overdrive | | | | | | | | |
| ✓ Controller card | | | | | | | | |
| ✓ VGA card | | | | | | | | |

| | ✓ Expansion slots | | | | | |
|-----|---------------------------------|---------------------|------------------|---------------|--|--|
| | (8,16,32,64 bits) | | | | | |
| 1.3 | Identify the hard disk | | | | | |
| | types EIDE, IDE, SCSI | | | | | |
| | etc. | | | | | |
| 1.4 | Identify the memory | | | | | |
| | types on the board/card: | | | | | |
| | Cache, VRAM, SRAM, | | | | | |
| | DRAM etc. | | | | | |
| 1.5 | Identify the floppy disk | | | | | |
| | drives $3^{1/2} / 5^{1/4}$ disk | | | | | |
| | drives. | | | | | |
| GE | ENERAL OBJECTIVES | 2: The use of insta | allation/mainter | nance manual. | | |
| 2.1 | Interpret the | | | | | |
| | installation/maintenanc | | | | | |
| | e manuals. | | | | | |
| 2.2 | Carry out RAM | | | | | |
| | upgrade. | | | | | |
| 2.3 | Explain site preparation | | | | | |
| | method. | | | | | |
| 2.4 | Explain the need for | | | | | |
| | equipment inventory. | | | | | |
| 2.5 | Carry out the pre- | | | | | |
| | installation checks of a | | | | | |
| | computer i.e. electrical, | | | | | |
| | mechanical, humidity | | | | | |
| | etc. | | | | | |
| 2.6 | Carry out simple | | | | | |
| | computer installation. | | | | | |
| GE | NERAL OBJECTIVES | 3: Know preventiv | ve maintenance | · · | | |
| 3.1 | Explain the importance | | | | | |
| | of preventive | | | | | |
| 1 | maintenance of | | | | | |
| 1 | hardware. | | | | | |
| 3.2 | Carry out routine | | | | | |
| 1 | cleaning and | | | | | |

| | | | | | | 1 |
|-----|-------------------------|-------------------|-----------------|------------|--|---|
| | demagnetization of disk | | | | | |
| | drives, motherboards | | | | | |
| | etc. | | | | | |
| 3.3 | Demonstrate prevention | | | | | |
| | procedures e.g. routine | | | | | |
| | checks. | | | | | |
| 3.4 | Apply dust prevention | | | | | |
| | procedure for Computer | | | | | |
| | systems, Carpets etc. | | | | | |
| 3.5 | Know how to make | | | | | |
| | system disks with | | | | | |
| | utilities. | | | | | |
| GE | NERAL OBJECTIVES | 4: Assemble and i | nstall a comput | er system. | | |
| 4.1 | Assemble a computer | | | | | |
| | system. | | | | | |
| 4.2 | Installation and | | | | | |
| | configuration of a | | | | | |
| | computer system. | | | | | |

| PROGRAMME: NATIONAL DIPLOMA IN COMPUTER ENGINEERING TECHNOLOGY | CODE: CTE 213 | CREDIT HRS: 75 HRS (0/3/0/WEEK) |
|--|------------------|------------------------------------|
| COURSE: DIGITAL COMPUTER FUNDAMENTAL II | COURSES UNIT 4.0 | |
| | | |

Goal: This course is intended to provide the student with basic understanding of the composition and characteristics of digital computers.

GENERAL OBJECTIVES:

- 1.0 Understand the features of different logic gates.
- 2.0 Know the sequence and data flow controls.
- 3.0 Understand the basic principles of bistable elements.
- 4.0 Understand the principle of the counter and data transfer register.
- 5.0 Know the implementation of the addition operation in the computer
- 6.0 Know the different digital circuit components.
- 7.0 Understand the characteristic of basic digital devices.
- 8.0 Understand the design and construction of simple combinational logic circuits using the basic devices.
- 9.0 Understand the operation of the basic principles of bistable elements.
- 10.0 Understand the operation of simple sequential circuits.

| Theoretical Content | Theoretical Content | | | | | | | |
|------------------------------|---------------------|------------------|-------------------|----|--|--|--|--|
| GENERAL OBJECTIVES | 1: Understand the | features of diff | ferent logic gate | es | | | | |
| Specific Learning | Teacher's | Learning | | | | | | |
| Outcomes | Activities | Resources | | | | | | |
| 1.1 Explain the principle of | | | | | | | | |
| operation of | | | | | | | | |
| combinational logic. | | | | | | | | |
| 1.2 Illustrate the action of | | | | | | | | |
| gates using truth table. | | | | | | | | |
| 1.3 Write down a logical | | | | | | | | |
| sum of product | | | | | | | | |
| equations. | | | | | | | | |
| 1.4 Draw circuit diagram | | | | | | | | |
| that implements the | | | | | | | | |
| equation of 1.3 using | | | | | | | | |
| AND, OR, NOT gates: | | | | | | | | |
| i. NAND | | | | | | | | |
| ii. NOR | | | | | | | | |
| iii. Exclusive – OR | | | | | | | | |
| iv. Exclusive – NOR | | | | | | | | |
| functions. | | | | | | | | |
| 1.5 Design logic circuits | | | | | | | | |
| using a combination of | | | | | | | | |
| logic gates. | | | | | | | | |
| 1.6 Describe the action of | | | | | | | | |
| the Diode. | | | | | | | | |
| 1.7 Describe the | | | | | | | | |
| construction of the | | | | | | | | |
| AND, or OR gates | | | | | | | | |
| using diode. | | | | | | | | |
| GENERAL OBJECTIVES | 2: Know the seque | ence and data f | low controls. | | | | | |
| 2.1 Explain error detection. | | | | | | | | |
| 2.2 Explain the features and | | | | | | | | |
| attributes of the | | | | | | | | |
| different logic families. | | | | | | | | |
| 2.3 Explain the | | | | | | | | |

| characteristics and circuit parameter of | | | | | | |
|---|--------------------------|------------------|-------------------|----------------------|-----|--|
| | | | | | | |
| logic families e.g. | | | | | | |
| i. Fan-in/fan-out. | | | | | | |
| ii. Speed/power factor | | | | | | |
| logic levels. | | | | | | |
| iii. Noise immunity | | | | | | |
| iv. Heat dissipation | | | | | | |
| GENERAL OBJECTIVES | 2. Understand the | hasia principla | a of bistable als | monts | | |
| | 5: Understand the | basic principle | s of distable ele | ements. | | |
| 3.1 Define a bistable (flip | | | | | | |
| flop). | | | | | | |
| 3.2 Describe the action of | | | | | | |
| a flip flop. | | | | | | |
| 3.3 Describe the operation | | | | | | |
| of the following | | | | | | |
| bistables elements: | | | | | | |
| i. RS Flip-flop; | | | | | | |
| ii. Clocked RS flip- | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| I.C bistable elements | | | | | | |
| e.g. SN7474 and SN | | | | | | |
| 7476 | | | | | | |
| GENERAL OBJECTIVES | 4: Understand the | principle of the | e counter and d | ata transfer registe | er. | |
| 4.1 Describe the operation | | | | | | |
| of the basic binary | | | | | | |
| ripple counter. | | | | | | |
| 4.2 Describe operation of | | | | | | |
| | | | | | | |
| counters. | | | | | | |
| 7476 GENERAL OBJECTIVES 4 4.1 Describe the operation of the basic binary ripple counter. 4.2 Describe operation of the up and down | 4: Understand the | principle of the | e counter and d | ata transfer registe | er. | |

| 4.3 | Describe the operation | | | | | | |
|-----|--------------------------|---|-------------------|------------------|---------------------|--------|--|
| | of the modules counter | | | | | | |
| | using as example Mod- | | | | | | |
| | 10, Mod-12, and Mod-6 | | | | | | |
| | counters. | | | | | | |
| 4.4 | Define a shift-left, a | | | | | | |
| | shift-right and shift | | | | | | |
| | round registers. | | | | | | |
| 4.5 | Describe the parallel | | | | | | |
| | transfer of data through | | | | | | |
| | registers. | | | | | | |
| 4.6 | Describe the serial- | | | | | | |
| | parallel transfer | | | | | | |
| | operation. | | | | | | |
| GE | NERAL OBJECTIVES | 5: Know the imple | ementation of t | he addition ope | eration in the comp | outer. | |
| 5.1 | Describe the serial | | | | | | |
| | adder. | | | | | | |
| 5.2 | Describe the parallel | | | | | | |
| | adder. | | | | | | |
| 5.3 | Describe the half-adder. | | | | | | |
| 5.4 | Describe the full-adder. | | | | | | |
| GE | NERAL OBJECTIVES | 6: Know the difference of th | rent digital circ | uit components | S. | | |
| 6.1 | Describe different logic | | | | | | |
| | element. | | | | | | |
| 6.2 | Identify AND, OR, | | | | | | |
| | NOT, NOR, NAND, | | | | | | |
| | and XOR gates | | | | | | |
| GE | NERAL OBJECTIVES | 7: Understand the | characteristic o | of basic digital | devices. | | |
| 7.1 | Describe the operation | | | | | | |
| | of different logic | | | | | | |
| | elements e.g. AND, | | | | | | |
| | OR, NOT etc gates. | | | | | | |
| 7.2 | Demonstrate practically | | | | | | |
| | the logic operation of | | | | | | |
| | AND, OR NOT using | | | | | | |
| | Logic gates and | | | | | | |

| Discrete elements. | | | | | | |
|-----------------------------|--------------------------|------------------|------------------|----------------------|-------------------|--|
| GENERAL OBJECTIVES | 3: Understand the | design and con | struction of sir | nple combinationa | l logic circuits. | |
| 8.1 Analyze and draw the | | | | | | |
| circuit diagram that | | | | | | |
| implement various | | | | | | |
| circuit combinations. | | | | | | |
| 8.2 Demonstrate practically | | | | | | |
| the operations of | | | | | | |
| combinational logic | | | | | | |
| function. | | | | | | |
| GENERAL OBJECTIVES | 9: Understand the | operation of th | e basic princip | les of bistable eler | nents. | |
| 9.1 Draw some specific IC | | | | | | |
| bistable elements e.g. | | | | | | |
| SN 7474, SN 7476 | | | | | | |
| 9.2 Construct the elements | | | | | | |
| in 4.1 above. | | | | | | |
| GENERAL OBJECTIVES | 10: Understand the | e operation of s | simple sequenti | al circuits. | | |
| 10.1 Analyse the design | | | | | | |
| techniques of sequential | | | | | | |
| circuits. | | | | | | |
| 10.2 Perform experiments | | | | | | |
| to illustrate sequential | | | | | | |
| circuit (counters, | | | | | | |
| registers) using the | | | | | | |
| various bistable | | | | | | |
| elements. | | | | | | |

| PROGRAMME: NATIONAL DIPLOMA IN COMPUTER | CODE: CTE 214 | CREDIT HRS: 15 HRS | | | | | | |

| ENGINEERING TECHNOLOGY (0/3/0/WEEK) | | | | | | | | |
| COURSE: COMPUTER ARCHITECTURE | COURSES UNIT 1.0 | | | | | | | |
| | | | | | | | | |

Goal: This course is intended to provide the ND students with a skeletal knowledge of the structural and functional characteristics of the various components of a computing system.

GENERAL OBJECTIVES:

- 1.0 Know the basic concept of computer architecture
- 2.0 Understand concept of memory organization
- 3.0 Appreciate the conventional 8/16/32-bit computer architecture
- 4.0 Know the addressing modes
- 5.0 Know interrupts and their various types

| Theoretical Content | Theoretical Content | | | | | | |
|----------------------------|---|----------------|-----------------|--------------------|--|--|--|
| GENERAL OBJECTIVES | GENERAL OBJECTIVES 1: Know the basic concept of computer architecture | | | | | | |
| Specific Learning | Teacher's | Learning | | | | | |
| Outcomes | Activities | Resources | | | | | |
| 1.1 Describe the various | | | | | | | |
| word formats. | | | | | | | |
| 1.2 Explain the concept of | | | | | | | |
| Von Neumman's | | | | | | | |
| Structure. | | | | | | | |
| 1.3 Explain various units | | | | | | | |
| and registers of a | | | | | | | |
| typical CPU. | | | | | | | |
| 1.4 Explain the various | | | | | | | |
| methods of addressing | | | | | | | |
| software and hardware | | | | | | | |
| trade offs. | | | | | | | |
| GENERAL OBJECTIVES | 2: Understand cor | ncept of memor | y organizations | S | | | |
| 2.1 Explain microcomputer | | | | | | | |
| control Bus, Address | | | | | | | |
| Bus and Data Bus. | | | | | | | |
| 2.2 Explain the use of | | | | | | | |
| memory management | | | | | | | |
| and mention techniques | | | | | | | |
| commonly used. | | | | | | | |
| 2.3 Explain the concept of | | | | | | | |
| cache memory. | | | | | | | |
| GENERAL OBJECTIVES: | 3: Appreciate the | conventional 8 | /16/32-bit comp | outer architecture | | | |
| 3.1 Explain the Von | | | | | | | |
| Neumman's Structure | | | | | | | |
| 3.2 Explain conventional | | | | | | | |
| 8/16/32 bit computer | | | | | | | |
| architecture. | | | | | | | |
| 3.3 Define the concept of | | | | | | | |
| pipeline instruction | | | | | | | |

| | | | T | 1 | 1 | 1 |
|-----|-------------------------|-------------------|------------------|-----------|---|---|
| | sets, reduced | | | | | |
| | instruction. | | | | | |
| 3.4 | List microprocessor | | | | | |
| | CPU of 8/16/32 bit | | | | | |
| | architecture. | | | | | |
| GE | NERAL OBJECTIVES | 4: Know the addre | essing modes | | | |
| 4.1 | Explain instruction | | | | | |
| | components opcode and | | | | | |
| | operand. | | | | | |
| 4.2 | Explain operand types- | | | | | |
| | Register, Memory, and | | | | | |
| | immediate. | | | | | |
| 4.3 | Explain instruction | | | | | |
| | Fetch and Execute. | | | | | |
| 4.4 | Explain addressing | | | | | |
| | modes-Direct, indirect, | | | | | |
| | immediate and | | | | | |
| | indexing. | | | | | |
| GE | NERAL OBJECTIVES | 5: Know interrupt | s and their vari | ous types | | |
| 5.1 | Define interrupt and | | | | | |
| | Enumerate types. | | | | | |
| 5.2 | Explain Branching | | | | | |
| | techniques. | | | | | |

| PROGRAMME: NATIONAL DIPLOMA IN COMPUTER ENGINEERING TECHNOLOGY | CODE: CTE 221 | CREDIT HRS: 60 HRS (0/3/0/WEEK) |
|--|---------------|------------------------------------|
| COURSE: COMPUTER PROGRAMMING (ASSEMBLY LANGUAGE) | COURSES UNIT | (0/5/0/WEEK) |
| | 2.0 | |

Goal: This course is designed to provide the student with skills in programming in Assembly language and intro to Micro Programming

GENERAL OBJECTIVES:

- 1.0 Understand number system.
- 2.0 Know the basic terms in assembly language.
- 3.0 Understand the different instruction formats.
- 4.0 Know the representative groups of instruction in the instruction set.
- 5.0 Know the different addressing modes.
- 6.0 Know the assembly language program layout.
- 7.0 Understand the process of running assembly language programs.
- 8.0 Understand the micro processor and how to program on a micro processor.

| Theoretical Content | Theoretical Content | | | | | | |
|--|---------------------|----------------|----------------|--|--|--|--|
| GENERAL OBJECTIVES | 1: Understand nur | nber system. | | | | | |
| Specific Learning | Teacher's | Learning | | | | | |
| Outcomes | Activities | Resources | | | | | |
| 1.1 Describe the binary, octal and hexadecimal number systems. | | | | | | | |
| 1.2 Explain the conversion between the base in 1.1 above. | | | | | | | |
| 1.3 Describe addition, multiplication, subtraction and division in binary number system. | | | | | | | |
| 1.4 Describe addition and subtraction in octal and hexadecimal number system. | | | | | | | |
| GENERAL OBJECTIVES | 2: Know the basic | terms in assen | nbly language. | | | | |
| 2.1 Define the following terms: Operation code operand, instruction and register. | | | | | | | |
| 2.2 Explain the relationships among operation code, operand and instruction. | | | | | | | |
| 2.3 Explain and illustrate with examples what is meant by machine instruction. | | | | | | | |
| 2.4 Describe zero, one and two – operand | | | | | | | |

| | instructions. | | | | | | |
|-----|--------------------------|-------------------|------------------|-------------------|----------------------|------|--|
| 2.5 | Explain the difference | | | | | | |
| | between a machine | | | | | | |
| | language and an | | | | | | |
| | assembly language. | | | | | | |
| GE | NERAL OBJECTIVES | 3: Understand the | different instru | action formats. | | | |
| 3.1 | Explain instruction | | | | | | |
| | formats. | | | | | | |
| 3.2 | Explain the fields of an | | | | | | |
| | instruction format. | | | | | | |
| 3.3 | Explain the function of | | | | | | |
| | registers. | | | | | | |
| 3.4 | Describe different types | | | | | | |
| | of instructions register | | | | | | |
| | – register storage, | | | | | | |
| | storage-storage. | | | | | | |
| | Indexed register and | | | | | | |
| | immediate operand | | | | | | |
| | instructions. | | | | | | |
| GE | NERAL OBJECTIVES | 4: Know the repre | esentative group | os of instruction | n in the instruction | set. | |
| 4.1 | Define an instruction | | | | | | |
| | set. | | | | | | |
| 4.2 | Describe arithmetic | | | | | | |
| | instruction: addition, | | | | | | |
| | subtraction, | | | | | | |
| | multiplication and | | | | | | |
| | division. | | | | | | |
| 4.3 | Describe AND, OR and | | | | | | |
| | exclusive NOR | | | | | | |
| | instruction. | | | | | | |
| 4.4 | Describe the branch | | | | | | |
| | instruction: conditional | | | | | | |
| | and unconditional. | | | | | | |
| 4.5 | Implement the | | | | | | |
| | conditional and | | | | | | |
| | unconditional branch | | | | | | |

| instruct | | | | | | | |
|---------------|-------------------|--------------------------|-----------------|----------------|------------------|----|--|
| 4.6 Describ | e, compare | | | | | | |
| instruct | ion. | | | | | | |
| 4.7 Describ | e load and store | | | | | | |
| instruct | ion. | | | | | | |
| 4.8 Describ | e bit | | | | | | |
| manipu | lation | | | | | | |
| instruct | ion. | | | | | | |
| 4.9 Describ | e move | | | | | | |
| instruct | ions. | | | | | | |
| 4.10 Explain | n input/output | | | | | | |
| instruct | | | | | | | |
| GENERAL | OBJECTIVES | 5: Know the diffe | rent addressing | modes | | | |
| 5.1 Describ | e different types | | | | | | |
| of addre | essing modes: | | | | | | |
| relative | , absolute, | | | | | | |
| | , immediate, | | | | | | |
| indexed | l and deferred. | | | | | | |
| 5.2 List exa | amples of each | | | | | | |
| types of | f addressing | | | | | | |
| | in 5.1 above. | | | | | | |
| GENERAL | OBJECTIVES | 6: Know the asser | nbly language | program layout | • | | |
| 6.1 Describ | e the position of | | | | | | |
| labels, | oeration codes, | | | | | | |
| operano | ds and | | | | | | |
| comme | nts. | | | | | | |
| 6.2 Illustrat | te the positions | | | | | | |
| in 6.1 a | bove with | | | | | | |
| assemb | ly language | | | | | | |
| coding | forms. | | | | | | |
| 6.3 Describ | e free format | | | | | | |
| and for | matted source | | | | | | |
| progran | n | | | | | | |
| GENERAL | OBJECTIVES | 7: Understand the | process of run | ning assembly | language program | s. | |
| 7.1 Describ | e the command | | | | | | |
| sequenc | ce required to | | | | | | |

| | | T . | | | | | T . |
|-----|---|-------------------|----------------|-----------------|-------------------|------------|-----|
| | run an Assembly | | | | | | |
| | language program. | | | | | | |
| 7.2 | Run assembly language | | | | | | |
| | program. | | | | | | |
| 7.3 | Explain the running of | | | | | | |
| | Assembly language e.g. | | | | | | |
| | BASIC, PASCAL, | | | | | | |
| | COBOL. | | | | | | |
| GE | NERAL OBJECTIVES | 8: Understand the | micro processo | or and how to p | rogram on a micro | processor. | |
| | Define the term | | • | • | | • | |
| | microprogramming. | | | | | | |
| 8.2 | Describe the difference | | | | | | |
| | between microprogram | | | | | | |
| | and hard-wired system. | | | | | | |
| 8.3 | Draw the | | | | | | |
| 0.5 | Microprogram system | | | | | | |
| | and hardwired system | | | | | | |
| | and explain the | | | | | | |
| | functions of each | | | | | | |
| | component. | | | | | | |
| 84 | Explain the | | | | | | |
| 0.4 | Microprocessor's | | | | | | |
| | function in a system | | | | | | |
| | and show the layout of | | | | | | |
| | the expression. | | | | | | |
| 0.5 | Describe the basic | | | | | | |
| 0.5 | structure of a | | | | | | |
| | microprocessor, a | | | | | | |
| | register and operation | | | | | | |
| | of a microprocessor | | | | | | |
| | | | | | | | |
| 0.6 | based computer. Demonstrate the use of | | | | | | |
| 8.0 | | | | | | | |
| | substitute memory | | | | | | |
| | command, NEXT | | | | | | |
| | command, EXC GO | | | | | | |
| | command, Examine | | | | | | |

| | T | T | |
|----------------------------|---|---|--|
| Register command. | | | |
| 8.7 Demonstrate – Register | | | |
| Data Transfer single | | | |
| step command. | | | |
| 8.8 Write some basic data | | | |
| transfer instruction. | | | |
| 8.9 Write the hand | | | |
| assembly, coding form | | | |
| (8 bit). | | | |
| 8.10The direct, indirect | | | |
| addressing. | | | |
| 8.11Explain the BCD | | | |
| Arithmetic instruction, | | | |
| using the Ib – b | | | |
| Arithmetic. | | | |
| 8.12Explain the BCD | | | |
| Arithmetic. | | | |
| 8.13Demonstrate the use of | | | |
| logical operators, such | | | |
| as the logical AND, | | | |
| Logical OR, Exclusive | | | |
| OR, rotate and | | | |
| compare. | | | |
| 8.14Write simple programs, | | | |
| using the jump and | | | |
| subroutine instruction. | | | |

| PROGRAMME: NATIONAL DIPLOMA IN COMPUTER ENGINEERING | CODE: CTE 222 | CREDIT HRS: 45 HRS |
|---|---------------------|--------------------|
| TECHNOLOGY | | (0/3/0/WEEK) |
| COURSE: COMPUTER WORKSHOP PRACTICE II | COURSES UNIT | |
| | 1.0 | |

Goal: This course is intended to train the students in general corrective maintenance, diagnostic techniques and to a greater extent understand circuit diagram and indentify the components contained therein.

GENERAL OBJECTIVES:

- 1.0 Understand the circuit diagrams of monitors, UPS Power Packs etc.
- 2.0 Understand the principles of operation and use of basic electronic measuring instruments in trouble shooting.
- 3.0 Know diagnostic techniques involved in corrective maintenance.
- 4.0 Trace faults on the various components of the circuits using a modular approach.

| Theoretical Content | | | | | | |
|------------------------------|-------------------|-----------------|-----------------|-------------------|-----------------------|----------------------|
| GENERAL OBJECTIVES | 1: Understand the | circuit diagran | ns of monitors, | UPS Power Packs | etc. | |
| Specific Learning | Teacher's | Learning | , | | | |
| Outcomes | Activities | Resources | | | | |
| 1.1 Understand the circuit | | | | | | |
| diagrams and identify | | | | | | |
| the components in | | | | | | |
| Monitors, UPS, Power | | | | | | |
| packs etc. | | | | | | |
| GENERAL OBJECTIVES | 2: Understand th | e principles of | operation and | use of basic elec | ctronic measuring ins | struments in trouble |
| shooting. | | | | | | |
| 2.1 Using multimeter, | | | | | | |
| oscilloscope to test the | | | | | | |
| various components on | | | | | | |
| board/cards such as: | | | | | | |
| resistors, diodes, | | | | | | |
| transistors, ICS etc. | | | | | | |
| 2.2 Explain basic trouble- | | | | | | |
| shooting techniques in | | | | | | |
| computer fault | | | | | | |
| diagnosis e.g. fault | | | | | | |
| identification by | | | | | | |
| eliminations | | | | | | |
| 2.3 Explain types of cables, | | | | | | |
| choice and methods of | | | | | | |
| testing, as well as the | | | | | | |
| instruments used for | | | | | | |
| testing: | | | | | | |
| i. Twisted pair cable. | | | | | | |
| ii. Coaxial cables | | | | | | |
| iii.RS-232 standard | | | | | | |
| communication | | | | | | |
| cables. | | | | | | |

| GE | NERAL OBJECTIVES | 3: Know diagnosti | ic techniques in | volved in corre | ective maintenance | e. | |
|-----|--------------------------|--------------------|------------------|-----------------|--------------------|-------------------|--|
| 3.1 | Explain the need for | | | | | | |
| | diagnostic software: | | | | | | |
| | Disk manager, | | | | | | |
| | Checkkit, Norton, PC | | | | | | |
| | Tools, some utilities in | | | | | | |
| | MS-Dos and MS- | | | | | | |
| | windows and Scandisk, | | | | | | |
| | defreg, mammaker, etc. | | | | | | |
| 3.2 | Use diagnostic software | | | | | | |
| | in corrective | | | | | | |
| | maintenance. | | | | | | |
| 3.3 | Use anti-virus kits in | | | | | | |
| | detection, cure and | | | | | | |
| | prevention of virus. | | | | | | |
| GE | NERAL OBJECTIVES | 4: Trace faults on | the various con | nponents of the | circuits using a m | nodular approach. | |
| 4.1 | Trace and identify | | | | | | |
| | faults on various | | | | | | |
| | components of the | | | | | | |
| | circuits and correct the | | | | | | |
| | errors logic using | | | | | | |
| | modular approach: | | | | | | |
| | Monitor, UPS, Power | | | | | | |
| | pack and Boards and | | | | | | |
| | cards etc. | | | | | | |

| PROGRAMME: NATIONAL DIPLOMA IN COMPUTER ENGINEERING | CODE: CTE 223 | CREDIT HRS: 30 HRS |
|---|---------------------|--------------------|
| TECHNOLOGY | | (0/3/0/WEEK) |
| COURSE: OPERATING SYSTEM | COURSES UNIT | |
| | 2.0 | |

Goal: The course is designed to teach the functions of operating systems

GENERAL OBJECTIVES:

- 1.0 Know the different types of operating systems
- 2.0 Know the function and philosophy of operating systems
- 3.0 Know the components of an operating system
- 4.0 Understand the general concept of system programming
- 5.0 Understand the use of utilities and libraries
- 6.0 Understand input/output devices handlers

| Theoretical Content | | | | | | | |
|----------------------------|---|------------------|-----------------|------------|--|--|--|
| GENERAL OBJECTIVES | GENERAL OBJECTIVES 1: Know the different types of operating systems | | | | | | |
| Specific Learning | Teacher's | Learning | | | | | |
| Outcomes | Activities | Resources | | | | | |
| 1.1 Define operating | | | | | | | |
| systems. | | | | | | | |
| 1.2 Explain the importance | | | | | | | |
| of operating systems | | | | | | | |
| using real-life examples | | | | | | | |
| e.g. DOS, Windows, | | | | | | | |
| UNIX, etc. | | | | | | | |
| 1.3 Classify operating | | | | | | | |
| systems into closed | | | | | | | |
| shop and open shop. | | | | | | | |
| 1.4 List some examples of | | | | | | | |
| closed- shop and open- | | | | | | | |
| shop operating systems | | | | | | | |
| 1.5 Apply the operating | | | | | | | |
| systems in 1.4 above to | | | | | | | |
| micro and main frame | | | | | | | |
| computers | | | | | | | |
| 1.6 Define, batch, Real- | | | | | | | |
| time, Time-sharing and | | | | | | | |
| net working operating | | | | | | | |
| systems | | | | | | | |
| 1.7 List some examples of | | | | | | | |
| Batch, real-time, Time- | | | | | | | |
| sharing and net working | | | | | | | |
| operating systems | | | | | | | |
| GENERAL OBJECTIVES | 2: Know the function | tion and philoso | ophy of operati | ng systems | | | |
| 2.1 State the functions of | | | | | | | |
| operating systems in | | | | | | | |
| relation to memory | | | | | | | |
| management, processor | | | | | | | |

| | | | | | Т | T | T |
|-----|---------------------------------------|-------------------|----------------|------------------|-----------|---|---|
| | management, device | | | | | | |
| | management and | | | | | | |
| | interrupt handling and | | | | | | |
| | information | | | | | | |
| | management. | | | | | | |
| 2.2 | State the characteristics | | | | | | |
| | of operating systems: | | | | | | |
| | concurrency, sharing, | | | | | | |
| | long-term storage and | | | | | | |
| | non-determinacy. | | | | | | |
| 2.3 | State the features of | | | | | | |
| | operating systems: | | | | | | |
| | efficiency, reliability, | | | | | | |
| | maintainability and | | | | | | |
| | size. | | | | | | |
| 2.4 | Carry out operating | | | | | | |
| | systems design | | | | | | |
| | techniques: top-down, | | | | | | |
| | bottom up. | | | | | | |
| GE | NERAL OBJECTIVES 3 | 3: Know the comr | onents of an o | nerating system |) | | |
| | Define operating | or iknow the comp | onems of an o | betating by stem | | | |
| 3.1 | system files –IO.SYS, | | | | | | |
| | COMMAND.COM, | | | | | | |
| | CONFIG.SYS. | | | | | | |
| 3 2 | Describe the functions | | | | | | |
| 3.2 | of the basic commands: | | | | | | |
| | i.e. FORMAT, DIR, | | | | | | |
| | CHKDSK, TYPE, | | | | | | |
| | BACKUP, MODE, | | | | | | |
| | SYS, AUTOEXEC, | | | | | | |
| | DISCOMP, FDISK, | | | | | | |
| | · · · · · · · · · · · · · · · · · · · | | | | | | |
| CE | etc. | 4. TT: 14 1 41 | | | · | | |
| | NERAL OBJECTIVES | 4: Understand the | general concep | ot of system pro | ogramming | | |
| 4.1 | Define Systems | | | | | | |
| | Programming. | | | | | | |
| 4.2 | Define application | | | | | | |

| | 1 |
|--|---|
| programming | |
| 4.3 Differentiate between a | |
| systems program and | |
| an application program. | |
| 4.4 Identify areas involved | |
| in systems | |
| programming e.g. | |
| compilers, assemblers, | |
| operating systems, | |
| device drivers, interrupt | |
| handlers | |
| GENERAL OBJECTIVES 5: Understand the use of utilities and libraries | |
| 5.1 Define utilities. | |
| 5.2 Explain utilities. | |
| 5.3 Define Library. | |
| 5.4 Explain Libraries. | |
| 5.5 Relate utilities to | |
| Libraries. | |
| 5.6 Implement libraries and | |
| utility programs | |
| GENERAL OBJECTIVES 6: Understand input/output devices handlers | |
| 6.1 Describe I/O processing | |
| 6.2 Describe interrupts, | |
| masking. | |
| 6.3 Describe traps. | |
| 6.4 Differentiate between | |
| traps and interrupts | |
| 6.5 Explain CPU states. | |

| PROGRAMME: NATIONAL DIPLOMA IN COMPUTER ENGINEERING | CODE: CTE 223 | CREDIT HRS: 75 HRS |
|---|---------------|--------------------|
| TECHNOLOGY | | (0/3/0/WEEK) |
| COURSE: COMPUTER POWER SYSTEMS (INSTALLATION AND | COURSES UNIT | |
| MAITENANCE) | 3.0 | |
| | | |

Goal: The course is intended to provide the students with the general knowledge of different energy sources applicable in computer systems. It is also designed to introduce students to computer network installations.

GENERAL OBJECTIVES:

- 1.0 Know the types of power supply sources for computer systems.
- 2.0 Understand the necessity for uninterruptible power supply and the general principle of UPS.
- 3.0 Know the types of protection against power supply fluctuation, surges and outages, static electricity etc.
- 4.0 Know the types of cabling requirements and installation in computer systems and networks.
- 5.0 Know the basic power supply units and methods of troubleshooting in computer networks.
- 6.0 Know the types of protection required for data line against fluctuation, surges and outages.

| Theoretical Content | | | | | | | |
|--|-------------------|-----------------|------------------|--------------------|-----------------------|------------------------|--|
| GENERAL OBJECTIVES 1: Know the types of power supply sources for computer systems. | | | | | | | |
| Specific Learning | Teacher's | Learning | | | | | |
| Outcomes | Activities | Resources | | | | | |
| 1.1 Explain the different | | | | | | | |
| sources of electrical | | | | | | | |
| energy applicable in | | | | | | | |
| powering computer | | | | | | | |
| systems | | | | | | | |
| i). National grid supply | | | | | | | |
| ii). Standby generator | | | | | | | |
| iii). Solar cells | | | | | | | |
| GENERAL OBJECTIVES 2 | 2: Understand the | necessity for u | ninterruptible p | power supply and t | he general principle | of UPS. | |
| 2.1 Explain the need fore | | | | | | | |
| steady power supply as | | | | | | | |
| a means of protecting | | | | | | | |
| computer software. | | | | | | | |
| 2.2 Explain the principle of | | | | | | | |
| operation and | | | | | | | |
| components of a UPS. | | | | | | | |
| GENERAL OBJECTIVES: | 3: Know the types | of protection | against power s | upply fluctuation, | surges and outages, s | tatic electricity etc. | |
| 3.1 Explain the principles | | | | | | | |
| of operation of | | | | | | | |
| Automatic Voltage | | | | | | | |
| Regulator (AVR). | | | | | | | |
| 3.2 Explain the principles | | | | | | | |
| of operation and | | | | | | | |
| components of | | | | | | | |
| Automatic Voltage | | | | | | | |
| switcher (AVS). | | | | | | | |
| 3.3 Explain the sources and | | | | | | | |
| effects of static | | | | | | | |
| electricity and methods | | | | | | | |
| of its elimination. | | | | | | | |

| GENERAL OBJECTIVES | 4: Know the types | of cabling red | uirements and i | installation in com | puter systems and ne | tworks |
|----------------------------|-------------------|----------------|-----------------|---------------------|-----------------------|---------|
| 4.1 Explain the types of | Tenow the types | or casing req | | | pater systems and ne | CW OIRS |
| cables used in; | | | | | | |
| i). Power supply | | | | | | |
| ii). Communication | | | | | | |
| between systems. | | | | | | |
| iii). Communication | | | | | | |
| between systems and | | | | | | |
| peripherals. | | | | | | |
| 4.2 Explain methods of | | | | | | |
| cabling for computer | | | | | | |
| networks: | | | | | | |
| i). Suspended ceilings | | | | | | |
| ii). Raised floors | | | | | | |
| iii). Cable trays | | | | | | |
| 4.3 Explain the types of | | | | | | |
| cables choice and | | | | | | |
| methods of testing, as | | | | | | |
| well as the instruments | | | | | | |
| used for testing: | | | | | | |
| i) Twisted pair cables | | | | | | |
| ii) Coaxial cables | | | | | | |
| iii) RS-232 standard | | | | | | |
| communication | | | | | | |
| cables. | | | | | | |
| GENERAL OBJECTIVES | 5: Know the basic | power supply | units and metho | ods of troubleshoo | ting in computer nety | works. |
| 5.1 Explain the principles | | | | | | |
| of operation and trouble | | | | | | |
| shooting methods of | | | | | | |
| power supply units: | | | | | | |
| i) Transformer | | | | | | |
| ii) Rectifiers | | | | | | |
| iii)Voltage stabilizers | | | | | | |
| 5.2 Explain the process of | | | | | | |
| cooling and the essence | | | | | | |
| of having a good | | | | | | |

| ventilation and cooling | | | | | | |
|----------------------------|--------------------------|-----------------|-----------------|----------------------|------------------------|---------|
| systems. | | | | | | |
| GENERAL OBJECTIVES | 6: Know the types | of protection r | equired for dat | a line against fluct | tuation, surges and ou | itages. |
| 6.1 Explain the methods of | | | | | | |
| testing data lines and | | | | | | |
| identifying faults. | | | | | | |
| 6.2 Identify the types of | | | | | | |
| protection of integrity | | | | | | |
| of data in computer | | | | | | |
| networks. | | | | | | |
